Summary

- SAP BASIS Consultant with 4+ years of experience supporting SAP S/4HANA, ECC, NetWeaver ABAP/Java, and HANA landscapes across AWS, Azure, and on-premise environments.
- Hands-on experience in SAP S/4HANA implementation, system conversion, upgrade, migration, and cloud transformation projects using SUM/DMO and SWPM methodologies.
- Strong expertise in SAP HANA Administration including HANA Cockpit, backup/restore, tenant database management, performance tuning, workload analysis, and system monitoring.
- Experienced in RISE with SAP environments and hyperscaler platforms including AWS and Azure for high-availability SAP deployments.
- Proficient in SAP BTP configuration including Subaccounts, Entitlements, Destinations, Cloud Connector setup, and Integration Suite connectivity.
- Skilled in SAP transport management (STMS/TMS), release cycles, transport governance, and production support using ST22, SM21, and SM37 transaction monitoring.
- Experienced in SAP Fiori/Gateway administration, Solution Manager (ChaRM, ITSM, EWA), and enterprise system optimization initiatives.
- Strong collaboration experience working with cross-functional teams, cloud administrators, infrastructure teams, SAP vendors, and business stakeholders in enterprise environments.

Technical Skills

- **SAP Platforms:** SAP ECC 6.0, SAP S/4HANA, SAP NetWeaver (ABAP & Java), SAP Fiori, SAP Gateway, SAP Solution Manager, SAP Router, SAP BTP, SAP Process Orchestration (PO), SAP Datasphere, NWiDM, LVM, CPS
- **BASIS Administration:** SAP Installation & Configuration, S/4HANA Conversion, System Refresh, Client Copy, Kernel Upgrades, SPAM/SAINT, Transport Management System (STMS/TMS), Release & Import Cycles, ChaRM, ITSM, EWA Reports
- **Migration & Upgrade Tools:** SUM, DMO, SWPM, SAP Migration Monitor, HANA Studio, HANA Cockpit
- **SAP HANA Administration:** HANA Monitoring, Backup & Restore, Tenant Database Management, Performance Tuning, Memory Optimization, Workload Analysis
- **Cloud Platforms:** RISE with SAP on AWS, AWS (EC2, S3, RDS), Microsoft Azure, SAP BTP (Subaccounts, Entitlements, Destinations, Cloud Connector, Integration Suite)
- **Monitoring & Performance:** ST22, SM21, SM37, SAP Early Watch Alerts, Solution Manager Monitoring, HANA Cockpit, System Performance Optimization

Professional Experience

Ele Vance Health

Jan 2025 – Present | Ohio, USA

SAP Basis Administrator

- Support SAP S/4HANA production environments hosted on Azure and AWS cloud platforms, ensuring system stability, high availability, and performance optimization across enterprise landscapes.
- Configure and manage SAP BTP services including Subaccounts, Entitlements, Destinations, Cloud Connector, and Integration Suite connectivity for secure enterprise application integrations.
- Manage SAP transport routes, release cycles, and import sequencing using STMS/TMS to maintain transport governance across Development, QA, and Production environments.
- Monitor SAP systems using ST22, SM21, SM37, HANA Cockpit, and SAP Solution Manager to proactively identify and resolve runtime, batch job, and system performance issues.
- Collaborate with SAP infrastructure, cloud, integration, and functional teams in multi-vendor environments to support S/4HANA implementation, migration, and operational activities.
- Support SAP Fiori and Gateway administration including service activation, role assignment, OData connectivity, and troubleshooting authentication and access issues.
- Configure SAP HANA system replication, backup/recovery strategies, and high-availability clustering using Pacemaker and Azure infrastructure services.

- Perform SAP HANA administration activities including tenant database management, workload analysis, memory optimization, and database performance tuning.
- Execute system refreshes, client copies, kernel upgrades, and patching activities while maintaining compliance with enterprise change management standards.
- Provide 24/7 production support and root cause analysis for critical incidents while ensuring SLA adherence and operational continuity.

Accenture Solutions Pvt Ltd

Jul 2020 – Aug 2024 | Hyderabad, India

SAP BASIS Consultant (Packaged Application Development Analyst)

- Participated in end-to-end SAP S/4HANA implementation and conversion projects using SUM with DMO methodology across enterprise SAP landscapes.
- Worked on RISE with SAP architecture deployments on AWS hyperscaler environments including high-availability, disaster recovery, and cloud migration configurations.
- Installed and configured SAP S/4HANA, SAP Solution Manager, SAP GRC, SAP PO, and SAP Fiori environments including post-installation validation and system readiness activities.
- Configured SAP BTP integrations including Cloud Connector setup, Destination configuration, Integration Suite connectivity, and secure communication between SAP and cloud applications.
- Managed SAP HANA administration activities including backup/restore operations, tenant database management, workload monitoring, memory optimization, and performance tuning.
- Executed heterogeneous SAP OS/DB migrations using SWPM and Migration Monitor for Oracle and MSSQL databases migrating to SAP HANA environments.
- Coordinated with SAP, infrastructure, cloud, and functional teams to identify project risks, dependencies, integration challenges, and implementation bottlenecks during migration activities.
- Performed SAP transport governance activities including transport route configuration, release management, import sequencing, and production deployment coordination using STMS.
- Supported SAP Fiori and Gateway administration activities including service activation, role configuration, and connectivity troubleshooting for enterprise users.
- Configured SAP Solution Manager ChaRM, ITSM workflows, and Early Watch Alert monitoring to improve governance, monitoring, and audit readiness across SAP landscapes.
- Performed SAP BASIS administration tasks including client copies, system refreshes, kernel upgrades, patching, and incident resolution across multiple environments.
- Implemented AWS backup, monitoring, and disaster recovery strategies to improve business continuity and operational resilience for enterprise SAP systems.

Certifications

- SAP Certified Specialist – SAP S/4HANA Conversion and SAP System Upgrade (C_TADM_23)
- Accenture Solution Pvt Ltd Certified SAP BASIS CONSULTANT

Education

University of Illinois Springfield

Aug 2024 – Dec 2025 | Springfield, Illinois

Master of science in Data Analytics

Relevant Coursework: Data Mining, Advanced Database concepts, Machine Learning, Data Visualization, Statistical Computation, Deep Learning and Big Data Analytics.

Vignan Institute of technology and science

Aug 2017 – Aug 2021 | Hyderabad, India

Bachelor of Technology in Computer Science and Engineering
