

Kevin Martinez**Address:** 1378 Broadway Avenue, Holbrook, New York-11741**Phone Number:** 312 768 8021**Email:** kevinmt804@gmail.com**Summary:**

- With over 3 years of professional experience as a dedicated IT Java Developer, I have been actively engaged in the analysis, design, and development of diverse J2EE Business applications, including web-based and n-tier solutions.
- Proficient in utilizing core technologies such as Java, Servlets, JSP, and XML, I bring a wealth of expertise to every project.
- I have a proven track record of implementing service projects following Agile Methodology, actively participating in scrum meetings to ensure project success.
- Proficient in web designing and development, I leverage a wide array of tools including HTML5, CSS3, JavaScript, XML, JSP, and JSON to deliver robust solutions.
- My familiarity with the Spring Framework extends to Spring Boot, Spring JDBC, and Spring Source, enabling me to develop scalable and efficient applications.
- Extensively experienced in developing web applications using Java8, J2EE, JSP, Spring, and various APIs like JDBC, XML, and JavaBeans, I ensure that projects meet their objectives by understanding requirements, business rules, use cases, and acceptance criteria thoroughly.
- Proficient in writing and executing test cases using JIRA, I possess the ability to review test cases effectively, ensuring the quality and reliability of the software.
- Solid experience in Object-oriented programming practices, particularly using Selenium with Java, allows me to deliver high-quality, maintainable code.
- Additionally, I have a strong command of HTML, CSS, JavaScript, and Python, further enhancing my capabilities as a versatile developer..

Education:**Master of Science (M.S.) – Physics****Nov 2022****CINVESTAV, Mexico City, Mexico**

Worked in scientific research on Superconductivity which involved data analysis using various programs.

BSc - Mathematics and Physics**Jun 2019****IPN, Mexico City****Certifications:**

- Coursera Google Data Analytics

Skills:

Languages	Core Java, Java, J2EE, SQL, JavaScript, Python, SQL
Java/J2EE Technologies	Core Java, JSP, JMS, Java Beans, Java Multithreading, Java Database Connectivity (JDBC)
Web Technologies	HTML5, XML, JSON, CSS3,
Java Frameworks	Hibernate, Spring, Spring Boot, REST API, Operating Systems, Geographical Information Systems.
Design & GUI Tools	Eclipse, MAVEN
App servers	IBM Web Sphere, Apache Tomcat
Databases/Tools	Oracle, SQL Server, MySQL
Methodologies	Agile, Waterfall
Operating Systems	Windows, Linux, UNIX
Web Services	REST API, MICROSERVICES

Work Experience:**BeaconFire Inc. – East Windsor, NJ****Jan 2021 - Current****Software Engineer I**

- Acquired proficiency in backend development utilizing Java, JDBC, Spring Boot, and MySQL, with a focus on building robust and scalable applications.
- Designed intuitive user interactions for web pages, ensuring seamless user experiences across various platforms.
- Implemented login and register pages using JSP, Servlet, and MySQL database, demonstrating expertise in both Core Java and Advance Java projects.
- Engaged in Core Java application development, applying advanced concepts and techniques to deliver high-quality solutions.
- Utilized Git extensively for version control, ensuring efficient code management and collaboration by consistently pushing code to GitHub repositories.
- Configured Maven dependencies to streamline application building processes, generating Pom.xml files to manage project dependencies effectively.
- Enhanced code productivity in login systems by employing JavaScript and jQuery, alongside JDBC for user access and validation, and conducted thorough testing using JUnit.
- Developed user interfaces using a combination of HTML, CSS, PHP, JSP, Java, jQuery, and Ajax, creating visually appealing and responsive designs.
- Leveraged MySQL as the primary database solution, ensuring efficient data storage and retrieval for various applications.
- Created a login page using Java, Angular, and SQL, demonstrating versatility in frontend and backend technologies.
- Implemented a Spring MVC application with MySQL database integration using the Spring Framework, emphasizing modularity and maintainability.
- Contributed to the design and development of APIs, leveraging Java Spring Boot, Hibernate, Bootstrap, HTML, and CSS to create robust and scalable backend solutions.

Environment: Java, J2EE, Html, CSS, Web Services (REST, SOAP), REST API, Hibernate, JDBC, Subversion, IBM WebSphere Application Server 7.5, Harvest (CA SCM), ClearQuest, Bootstrap, Spring 3.0, XSLT, XML, XSD, JUnit, AJAX, jQuery.
