Python Developer

PROFESSIONAL SUMMARY:

- Around 5 years of experience as a **Python Developer**, a proficient coder in **multiple languages and x**
- Wrote Python scripts to parse **XML** documents and load the data in a database and developed **web-based** applications using **Python, CSS, and HTML**.
- Worked on applications and developed them with **XML, JSON, and XSL** (**PHP, Django, Python, Rails**).
- Experienced in developing **Web Services** with **Python** programming language.
- Cleaned data and processed third-party spending data into maneuverable deliverables within specific formats with **Excel macros** and **Python libraries**.
- Experienced in developing **web-based** applications using **Python, Django, PHP, C++, XML, CSS, HTML, DHTML, JavaScript, and JQuery**.
- Experienced in working with various **Python IDEs** using **Pycharm, PyScripter, Spyder, PyStudio, and PyDev**.
- Developed complex and interactive visualizations using various features and functionalities offered by **Tableau**, such as calculated fields, parameters, sets, and actions.
- Good experience in software development in **Python** and **IDEs: pycharm, sublime text, Jupyter Notebook**.
- Experienced in **web application development** using **Django/Python** and **HTML/CSS** for server-side rendered applications. Hands-on experience working in **WAMP** (**Windows, Apache, MYSQL, and Python/PHP**) and **LAMP** (**Linux, Apache, My SQL, and Python/PHP**) Architecture.
- Worked on **Anaconda Python Environment**.
- Developed views and templates with **Python** and **Django's** view controller and templating language to create a user-friendly website interface.
- Experience in implementing **Python** alongside using various libraries such as **matplotlib** for **charts and graphs**, **MySQL db.** for **database connectivity**, **python-twitter**, **PySide**, **Pickle**, **Pandas data frame**, **network**, **urllib2**.
- Experienced in using Python libraries like **Beautiful Soup**, **NumPy**, **SciPy**, **matplotlib**, **Python-twitter**, **NetworkX**, **urllib2**, **MySQLdb** for **databaseconnectivity** and **IDEs - SublimeText, Spyder, PyC harm**.
- Experienced in **Requirement gathering, Use Case development, Business Process flow, and Business Process Modeling**.
- Extensively used **UML** to develop various **use cases, class diagrams, and sequence diagrams**.
- Well-versed in the design and development of presentation layers for **web applications** using technologies like **HTML5, CSS3, JavaScript, JQuery, AJAX, AngularJS, Bootstrap, JSON, and XML**.
- Exceptionally solid background in composing **APIs** along with **Web Services** over **Python**.
- Experience in using **Adobe Flash, SVN, Eclipse, JIRA, GitHub, and CVS**.
- Experience working knowledge in **UNIX** and **Linux** shell environments using command line utilities.
- Experience with **Unit Testing / Test Driven Development (TDD), Load Testing, and Integration Testing**.
- Experienced in version control systems using **CVS, SVN, and Git / Git hub** and issue tracking tools like **Jira** and **Bug Zilla**.
- Experienced in writing **SQL Queries, Stored procedures, functions, packages, tables, views, and triggers**.

- Experience in working with **Python ORM** Libraries including **Django ORM**, and **SQLAlchemy**.
- Experience in **building frameworks** and automating complex workflows using **Python** for **Test Automation**.
- Experience in implementing server-side technologies with restful **API** and **MVC design** patterns with **node JS** and **Django framework**.
- Hands-on experience in using **NOSQL libraries** like **MongoDB**, **Cassandra**, and **Redis** and **relational databases** like **Oracle**, **SQLite**, **PostgreSQL**, and **MYSQL databases**.
- Worked on **UNIX shell scripts** for business processes and loading data from different interfaces to **HDFS**.
- Experience in deploying applications in **heterogeneous Application Servers TOMCAT**, **Web Logic**, and **Oracle Applications. Server**.
- Good Knowledge of **Amazon AWS concepts** like **EMR** and **EC2 web services** which provide fast and efficient processing of **Big Data**.
- Proficiency with the application servers like **WebSphere**, **WebLogic**, **JBoss**, and **Tomcat**.
- Proficient in **Object-oriented design** experience, with extensive experience in **Python-C/C++** binding using **Boost Python** and **Python C types**.
- Integrated data from different sources **into Tableau**, including **structuring data sets**, performing data cleaning and transformation, and optimizing data connections for efficient dashboard performance.
- Experience with **File Handling** and **SSH (Secure Shell)**.
- Working knowledge of errors and exceptions handling **debugging** using **PDB**, **Eclipse**, and **Pycharm**.
- Experience with **Docker**, and deployment of applications inside software containers.
- Excellent **Debugging**, **Problem-Solving**, **Optimization**, and **Testing Skills using Git Lab**
- Experience in using Scikit-Learn and Stats models in **Python** for **Machine Learning** and **Data Mining**.
- Use of **NLTK**, **Open NLP** & **Stanford NLP** for Natural Language Processing and sentiment analysis.
- Experience with **SQL Server Management Studio**, **SQL Developer**, **Toad**, and **MySQL GUI Tool**.
- Build reusable user interface components with **JSX (JavaScript XML)**, which blends JavaScript and **HTML-like syntax**, component-based design to build the **UI hierarchy**, handle events, and manage the UI state.
- Identified and repaired problems, flaws, and errors in their code by using **debugging tools**, **analyzing error logs**, and implementing solutions to maintain the application's quality and stability.
- Worked on developing the architecture of **cloud-based applications**, selecting relevant AWS services based on application needs, **designing fault-tolerant and scalable solutions**, and implementing best practices for security and performance.
- Developed apps utilizing **AWS services and tools**, and built serverless functions, **APIs**, **web apps**, or backend services that link to numerous AWS services using programming languages such as **Python**, **Java**, **Node.js**.
- Integrated **Athena** with other AWS services.
- Wrote and deployed serverless functions using **AWS Lambda**. These functions can be triggered by various event like updates in a DynamoDB table. wrote Python code to handle these events and perform specific tasks or execute business logic.
- Used **Glue's** built-in Apache Spark support to perform complex data transformations and write Python code using Spark's Data Frame API to apply transformations, filtering, aggregations, joins, and other operations on large datasets, and Glue handled the underlying infrastructure and automatically scaled **Spark clusters** as needed.
- With **CloudFormation** updated existing stacks to incorporate changes to their infrastructure and modified resource configurations, and then initiated a stack update. updated encounters an issue, CloudFormation supports automatic rollback, reverting the stack to its previous state.

- Stored data in **S3** directly from their Python code and read data from S3 into their Python applications or scripts, performed data transformations, analytics and generated reports, when dealing with large datasets that are more efficiently processed in a distributed computing environment in **AWS Glue**.
- Used **Git** to track and managed changes to their codebase.

TECHNICAL SKILLS:

Operating Systems	Windows, MAC OS, Unix/Linux
Languages	Python, C++, Java, J2EE, React
Python Libraries	Numpy, Matplotlib, NLTK, Statsmodels, Scikit-learn/sklearn, SOAP, Scipy
Python Frameworks	Pandas, Flask, Django, Docker
Python IDE	Sublime Text 3, Eclipse, Jupyter Notebook, VIM, Pycharm
NLP used for Python	NLTK, Open NLP, Stanford NLP (NER, POSTag, Tokenization)
Databases	RDBMS (Oracle, SQL Server, MySQL), No SQL (Mongo Db), HDFS (Hadoop)
Web Technologies	CSS, JavaScript, XML, AJAX, JQuery, Bootstrap, AWS- CloudFormation, Glue, Lambda, S3, Lambda, GIT, RESTful Web Services.
Other Tools	Putty, Tableau, SQL developer, Toad, JIRA, Matlab

PROFESSIONAL EXPERIENCE

Cardinal Health, Dublin, OH

Jun 22 - Present

Sr. Python Developer

Responsibilities:

- Automate different workflows, which are initiated manually with **Python scripts** and **Unix shell scripting**.
- Create, activate and program in **Anaconda environment**.
- Use **Python** unit and functional testing modules such as **unit test**, **unittest2**, **mock**, and **custom frameworks** in-line with **Agile Software Development** methodologies.
- Develop Sqoop scripts to handle change data capture for processing incremental records between new arrived and existing data in **RDBMS** tables.
- Installed **Hadoop**, **Map Reduce**, **HDFS**, **AWS** and developed multiple **MapReduce** jobs in **PIG** and **Hive** for data cleaning and pre-processing.
- Manage datasets using **Panda data frames** and **MySQL**, queried **MYSQL database queries** from **python** using **Python-MySQL** connector and **MySQL dB** package to retrieve information.
- Involved in the **Web/Application development** using **Python 3.5**, **HTML5**, **CSS3**, **AJAX**, **JSON** and **JQuery**.
- Develop and tested many features for dashboard using **Python**, **Java**, **Bootstrap**, **CSS**, **JavaScript** and **JQuery**.
- Generated **Python Django** forms to record data of online users and used **Pytest** for **writing test cases**.
- Implemented and modified various **SQL queries** and **Functions**, **Cursors** and **Triggers** as per the client requirements.
- Clean data and processed third party spending data into maneuverable deliverables within specific format with Excel macros and python libraries such as **NumPy**, **SQLAlchemy** and **matplotlib**.

- Used **Pandas** as **API** to put the data as time series and tabular format for manipulation and retrieval of data.
- Helped with the migration from the old server to **Jira database (Matching Fields)** with **Python scripts** for transferring and verifying the information.
- Analyze Format data using **Machine Learning algorithm** by **Python Scikit-Learn**.
- Experience in **python, Jupyter**, Scientific computing stack (**numpy, scipy, pandas and matplotlib**).
- Perform troubleshooting, fixed and deployed many **Python bug fixes** of the two main applications that were a main source of data for both customers and internal customer service team.
- Write **Python scripts** to parse **JSON** documents and load the data in database.
- Generating various capacity planning reports (graphical) using Python packages like **Numpy, matplotlib**.
- Enhanced the functionality of Tableau workbooks and dashboards by the application of optimal techniques, including data source **optimization, economical computation, and reduction** of load times.
- Analyzing various logs that are been generating and predicting/forecasting next occurrence of event with various **Python libraries**.
- Developed single page application by using **Angular JS** backed by **MongoDB and NodeJS**.
- Design and maintain **databases** using **Python** and developed **Python based API (RESTful Web Service)** using **Flask, SQL Alchemy** and **PostgreSQL**.
- Manage code versioning with **GitHub, Bit Bucket** and deployment to staging and production servers and implement **MVC architecture** in developing the **web application** with the help of **Django framework**.
- Use Celery as task queue and **RabbitMQ, Redis** as messaging broker to execute asynchronous tasks.
- Design and manage **API system deployment** using fast http server and **Amazon AWS architecture**.
- Develop remote integration with third party platforms by using **RESTful web services** and Successful implementation of **Apache Spark and Spark Streaming applications** for large scale data.
- Built various graphs for business decision making using **Python mat plotlib library**.
- Involved in development of **Web Services** using **SOAP** for sending and getting data from the external interface in the **XML** format.
- Developed analytics capabilities within Tableau, such as **predictive analytics, trend analysis, and statistical modeling**, to derive deeper insights from data and support data-driven decision-making processes.
- Integrated with **databases, data warehouses, and business intelligence** programmes in Tableau to provide end-to-end analytics solutions and optimize data processes.
- Export Test Case Scripts and modified the selenium scripts and executed in **Selenium environment**.
- Developed entire frontend and backend modules using **Python on Django Web Framework**.
- Scraping website using **Python Beautiful Soup**, and then parsed it with **XML**.
- Outputting the parsed data as **JSON/BSON** and stored into **MongoDB**
- Used **NLTK** and **StanfordNLP** to process text data and created offline intelligence.
- Querying data from **MongoDB** and use them as input for the machine learning models
- Using **AWS** for application deployment and configuration.
- Wrote **UNIX shell scripting** for automation.
- Developed views and templates with **Django** view controller and template Language to create a user-friendly website interface.
- Used **JavaScript** and **JSON** to update a portion of a webpage.
- Develop consumer based features using **Django, HTML and Test Driven Development (TDD)**.
- Developed **Python web services** for processing **JSON** and interfacing with the Data layer.
- Increased the speed of pre-existing search indexes through **Django ORM optimizations**.

- Developed module to build **Django ORM queries** that can pre-load data to greatly reduce the number of databases queries needed to retrieve the same amount of data.
- Created front-end logic and functionality for web apps and collaborated closely with **designers, back-end developers**, and product managers to **deploy features, connect APIs, manage data flow**, and ensure user interactions are seamless.
- Created reusable **CloudFormation** templates that can be parameterized and customized for different environments or applications.
- Utilized **Athena** to optimize costs associated with data processing and analysis.
- Created reusable components containing specific processes and user interface elements, as well as **built modular and maintainable code** by breaking down huge user interfaces into smaller, reusable components, which increases code **reusability and scalability**.
- Controlled and updated the state of components, handling user input, and synchronized data with back-end services using React' s built-in state management system or additional frameworks like **Redux or MobX**.
- implemented access controls and security measures for data stored in **S3**.
- Developed embrace **Infrastructure as Code (IaC)** concepts to created and managed the infrastructure of their applications utilizing tools like **AWS CloudFormation or AWS CDK (Cloud Development Kit)** and wrote templates or code that reflects the intended infrastructure.
- Worked in DevOps settings, automating deployment and release processes with AWS services such as **AWS CodePipeline, AWS CodeCommit, or AWS CodeDeploy**, and configuring deployment pipelines, monitoring application health, and ensuring continuous integration and deployment of their applications.
- Used **CloudFormation** to define infrastructure resources using **JSON** templates and described the desired state of **AWS** resources such as **EC2** instances, **S3** buckets, **Lambda** functions, **DynamoDB** tables, and mor which allowed for version control, code review, and reproducibility of infrastructure deployments.
- created **GIT** branches to work on different code versions simultaneously.

Environment: Python 3.5, AWS, GIT, Tableau, S3, Glue, CloudFormation, Lambda, Athena, React, Django, HTML5/CSS, PostgreSQL, MS SQL Server, MySQL, JavaScript, Jupyter Notebook, VIM, Pycharm, Shell Scripting, Angular.JS, JIRA.

Ivanti Inc, Austin, Texas
Sr. Python Developer

Nov 21 – May 22

Responsibilities:

- Worked in comprehending and examining the client's business requirements.
- Used **Django frameworks** and **Python** to build **dynamic webpages**.
- Developed tools for monitoring and notification using **Python**.
- Enhanced the application by using **HTML** and **Java script** for design and development.
- Used data structures like directories, tuples, object oriented class based inheritance features for making complex algorithms of networks.
- Created **PHP/MySQL** back-end for data entry from Flash and worked in tandem with the Flash developer to obtain the correct data through query string.
- Involved in designing database **Model, API's, Views** using python to build an interactive **web based solution**.

- Generated **Python Django** Forms to record data of online users.
- Implemented Data tables to **add, delete, update** and **display** patient records and policy information using PyQt.
- Implemented a module to connect and view the status of an **Apache Cassandra instance** using **python**.
- Created extensive dashboards using Tableau that offer practical insights and use a variety of filters, **interactive elements, and visualizations to make data discovery** and analysis easier.
- Developed **MVC** prototype replacement of current product with **Django**.
- Improved the **Data Security** and generated report efficiently by caching and reusing data.
- Created **UI** using **JavaScript** and **HTML5/CSS3**.
- Managed datasets using **Panda data frames** and **MYSQL**. Queried the database queries using **Python-MySQL** connector and retrieved information using **MySQLdb**.
- Recorded the online users' data using **Python Django** forms and implemented test case using **Pytest**.
- Developed the application using the **TestDriven methodology** and designed the unit tests using **Python Unit test framework**.
- Created **web application** prototype using **jQuery** and **Angular JS**.
- Deployed the project into **Heroku** using **GIT version** control system,
- Maintained and updated the application in accordance to the clientele's requirement.
- Optimized the performance of React applications by implementing techniques such as **code splitting, lazy loading, and memorization**, as well as identifying performance bottlenecks, optimizing rendering processes, and ensuring efficient data fetching and rendering to improve the application's speed and responsiveness.
- I frequently worked as a member of a development team, collaborating with **designers, back-end developers, and other stakeholders** to understand **project objectives, contribute technical insights**, and guarantee efficient communication and coordination throughout the development process.

Environment: Python 3, AWS, React, Django 1.6, Tableau 8.2, Beautiful soup, HTML5, CSS/CSS3, Bootstrap, XML, JSON, JavaScript, JQuery, Angular JS, Backbone JS, Restful Web services, Apache spark, Linux, Git, Amazon s3, Jenkins, MySQL, Mongo DB, T-SQL, Eclipse.

Alshaya Pvt Ltd, India
Python Developer

Oct 19 - July 21

Responsibilities:

- Used standard **Python** modules e.g. **CSV, Robot parser, Iter tools, Pickle, Jinja2, Xml** for development.
- Managed, developed, and designed a dashboard control panel for customers and Administrators using **Django, HTML, CSS, JavaScript, Bootstrap, JQuery** and **RESTAPI** calls.
- Query and set up employee registration and login using **Python PostgreSQL**
- We use a multiple row data storage strategy called **MVCC** to make effective **PostgreSQL** responsive in Querying and storing in database.
- Experience for handling documented database and video file for online management system during creating online learning management solutions.
- Automated **RabbitMQ** cluster installations and configuration using **Python/Bash**.
- Used **Pandas API** to put the data as time series and tabular format for fast timestamp data manipulation and retrieval.

- Fetched twitter feeds for certain important keyword using **Python-twitter library**.
- Used Python Library BeautifulSoup for web scrapping to extract data for building graphs.
- Performed troubleshooting, fixed and deployed many **Python bug fixes** for **Learning Management System**
- Used Python Flask framework to build modular & maintainable applications.
- Automated data movements using **Python scripts**.
- Involved in splitting, validating and processing of files.
- Created core **Python API** which will be using among multiple modules.
- Uploaded statistics to **MySQL** for analysis and logging.
- Developed complex **SQL queries** for testing the **database functionality**.
- Used **UNIX server** for application deployment and configuration.
- Written shell scripting for automation.
- Provided technical assistance for **maintenance, integration and testing** of software solutions during development and release processes.
- Created **unit test/regression test framework** for working/new code.

Environment: Python, Django, GIT, Athena, AWS CloudFormation, Linux, HTML, CSS, Shell Scripting, PostgreSQL, MySQL, Python-Twitter Library, Flask, Web services, SVN, Pandas, FileZilla etc.
