

Arvind Ravi Kumar

📍 Austin, Texas 📧 arvind.nrk@gmail.com ☎ 682-374-3479 🔗 [LinkedIn](#)

As an experienced Business Analyst at Amazon, I bring a passion for data, consistently delivering impactful results across operations, product, and compliance projects. My success relies on a customer-centric strategy, utilizing data for innovative solutions that bring significant stakeholder value. Seeking roles in **Data Analyst**, **Data Engineering**, or **BA** to contribute strategic insights.

TECHNICAL SKILLS

Programming Languages: C, Java, HTML, SQL, Python, R, MATLAB, PySpark

Database/ BI tools: Microsoft SQL server, MySQL, PostgreSQL, Redshift, Microsoft Access, Microsoft Excel, Tableau, ETL/ELT, Power BI, SAP Cloud, JIRA, Salesforce

Core Competencies: Data Structures, Data Warehousing, Data Cleaning, Data Mining, Data Analysis, Data Visualization, Machine learning (Supervised, Unsupervised), Deep Learning, NLP, Docker,

Cloud Computing & Deployment: Azure (Data Factory, Databricks, Synapse Analytics, DevOps), CI/CD pipelines, Apache Spark, Apache Kafka, Apache Airflow, Big data (Hadoop)

EDUCATION

Texas State University, San Marcos, TX

August 2022 - May 2024

MS in Data Analytics

GPA: 4.0

Leadership positions: Data Analytics Club, Phi Kappa Phi (Honor society), Beta Gamma Sigma (Honor society)

Visvesvaraya Technological University, Bengaluru, IN

August 2016 - May 2020

Bachelor's in Information Science and Engineering

GPA: 3.76

PROFESSIONAL EXPERIENCE

Texas State University – San Marcos, TX

August 2022 - Present

Graduate Teaching Assistant

- Employed advanced data analysis techniques to evaluate student performance data, resulting in the creation of intuitive dashboards, leading to a significant 20% improvement in overall class performance and impressive attainment of top-tier grades.
- Instructed and mentored 250+ students in advanced MS Office Suite, SQL, and Python, achieving 95% pass rate and 98% satisfaction.

Amazon – Bengaluru, IN

June 2020 - July 2022

Internal Business Analyst

- Collaborated with the Legal, Operations, and Product teams to analyze data using Amazon RedShift and numerical computation libraries (NumPy, SciPy, Pandas), resulting in a 27% increase in refined data inflow.
- Analyzed ASINs data, clustered information, and optimized the review process for 200,000+ ASINs within a week, slashing review time by over two months.
- Worked cross-functionally to evangelize data insights and proposed new features to improve the KPIs.
- Utilized the ADDIE approach to develop and execute training and onboarding programs, achieving a 99.2% accuracy rate, and reducing training duration from 3 months to 1 month through streamlined SOP implementation.

IoT center of Excellence-Atria IT– Bengaluru, IN

July 2019 - December 2019

Application Development Intern

- Led the development of the Campus Management System, enhancing progress tracking by 30% and reducing administrative workload by 25%.
- Engineered SQL-based back-end databases and developed dynamic front-end interfaces using HTML, CSS, JavaScript, Bootstrap, and XML, driving a 25% enhancement in user experience and a 15% increase in customer engagement.

PROJECTS and PUBLICATIONS

Predicting Taxi Demand (Data science & Machine learning)

[*International Research Journal of Engineering and Technology \(IRJET\) \(e-ISSN2395-0056\)*](#)

- Improved prediction accuracy by 20% using advanced machine learning techniques, optimizing taxi services, and significantly enhancing customer satisfaction.
- Reduced processing time by 25% through algorithm optimization, ensuring real-time predictions and improving operational efficiency.

Azure Cloud Shift (End to End Azure Data Engineering Project)

- Performed detailed assessment of on-premise systems, identifying migration dependencies, risks, and optimization opportunities, leading to a 12% reduction in operational expenses.
- Orchestrated seamless integration of on-premise SQL Server data into Data Lake Gen2 through ADF, leveraging Databricks for efficient data transformation, and fine-tuning loading processes into Azure Synapse.
- Designed and engineered Power BI dashboards, fortified by Azure AD and Azure Key Vault for robust monitoring, governance, and secure data access.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals
- Microsoft Power BI Data Analyst (PL-300)

- Microsoft Certified: Data Engineering (DP-203)
