

OMER SIDDIQI

Chicago, IL | 630-656-7320 | omersidd07@gmail.com | LinkedIn | GitHub | U.S. Citizen

Education

University of Illinois at Urbana-Champaign
B.S. Computer Science

May 2024
3.8 GPA

Skills

- **Languages & Coding:** Python, SQL, R, DAX, Excel, JavaScript
- **Reporting & BI Tools:** Power BI, Tableau, D3.js, Microsoft PowerPoint
- **Data & Cloud Platforms:** Azure SQL, Azure Data Factory, PostgreSQL, Oracle SQL
- **Collaboration:** Power Platform (Power Automate, Power Query), Dynamics 365, Jira, Agile/Scrum, Microsoft Office

Work Experience

Data Analyst | Woodward Inc.

Rockford, IL | Mar 2025 - Present

- Analyzed data across Azure SQL-based test-stand and ERP environments for 1,440+ aerospace components by querying relational datasets with SQL, Python, and Excel, enabling accurate operational and financial reporting used by engineering and leadership teams.
- Validated and documented data pipelines by implementing SQL-based data quality and reconciliation checks across 2 million records, improving ingestion reliability and preventing downstream data issues.
- Managed Azure Data Factory and Dynamics 365 datasets by maintaining source-to-target mappings, schemas, refresh schedules, and access controls across 2.3 million records to ensure data integrity and audit-ready reporting.
- Developed cloud-based reporting artifacts by building Power BI dashboards using DAX and Power Query on Azure Data Factory—curated datasets, increasing executive KPI visibility by 40% and supporting self-service analytics.
- Collaborated with cross-functional stakeholders to standardize business rules and metric definitions, tracking data defects in Jira and coordinating fixes with developers to improve data consistency across Agile delivery cycles.

Data Analyst Intern | Voya Financial

Chicago, IL | May 2024 - Dec 2024

- Performed data validation and requirements analysis using Python, R, and Excel by reconciling Oracle healthcare policy datasets against Epic Payer Platform records, supporting HIPAA-compliant, audit-ready reporting for systems serving 7.9 million members.
- Reduced recurring data defects by 25% by designing SQL- and Python-driven data quality scripts to identify missing, outdated, and inconsistent attributes across governed Oracle datasets.
- Supported cloud data enablement initiatives by migrating validated Oracle datasets into Azure-based analytical workflows, partnering with data engineering teams to ensure accurate ingestion, validation, and transformation, improving accessibility and scalability for downstream reporting use cases.
- Created Tableau dashboards to monitor data quality trends and remediation progress, enabling business and technical teams to prioritize fixes and track improvements over time.

Data Analyst Intern | Exelon Corp.

Oak Brook, IL | May 2022 - Dec 2022

- Developed and tested Python and SQL ETL pipelines processing 4.3 million records, defining source-to-target logic and validation checks to improve data reliability and anomaly detection.
- Delivered Power BI reports consolidating Azure-hosted ERP data, reducing investigation and issue-triage time by 35% for regional operations teams.
- Automated reporting and refresh schedules using Power Query and Power Automate, eliminating manual Excel processes and improving consistency under Agile delivery timelines.

Projects

Narrative Visualization | Tableau, JavaScript (D3.js), TopoJSON

Aug 2025

- Analyzed maternal and child health indicators to identify 15 high-risk country clusters and translated findings into an interactive, stakeholder-friendly Tableau dashboard and narrative visualization.
- Cleaned, validated, and standardized 1,500 API-sourced global health and socioeconomic data points to ensure consistent definitions and comparability across 196 countries, enabling reliable analytical reporting.

Medication Reminder App | PostgreSQL, Python, Power BI

May 2025

- Defined analytical requirements and structured PostgreSQL and Python data pipelines to track simulated medication adherence and engagement across 800+ patient records, ensuring reliable data ingestion and validation.
- Built automated Power BI dashboards to monitor adherence trends and engagement KPIs, reducing manual reporting effort by 65% for clinical and business stakeholders.
