

Pallavi Prasanna

Data Analyst

San Diego, CA • pallaviprasanna748@gmail.com • + 1 (619) 343-6944

PROFESSIONAL SUMMARY

Data Analyst with over 4+ years of experience delivering actionable insights in healthcare and financial sectors. Proficient in requirements gathering, documentation (FRD, BRD), SQL, Tableau and Excel. Adept at collaborating with stakeholders to define business needs, automate workflows, and optimize decision-making. Proven expertise in data modeling, KPI tracking, and data visualization, driving results in additional revenue and operational efficiencies across organizations.

SKILLS

- **Methodologies:** Agile, Scrum, Waterfall
- **Programming Languages:** SQL, Python (Pandas, NumPy)
- **Database Management:** MySQL, Snowflake, Microsoft Access
- **Data Visualization Tools:** Tableau, Power BI, Excel
- **IDEs:** Jupyter Notebook, Visual Studio Code, RStudio
- **ETL Tools:** Alteryx, Informatica, Talend, Qlik, QlikView
- **Automation Tools:** Power Automate, Microsoft Teams, SharePoint
- **Collaboration Tools:** JIRA, Confluence, Slack
- **Other Tools:** Cerner EHR, Griffin, Salesforce, SAP BusinessObjects
- **Big Data Analytics:** AWS, Azure Data Factory, Google Cloud Platform
- **Project Management Tools:** MS Project, MS Office (Word, Excel, PowerPoint, Access), SWOT analysis, Critical Thinking, Data Cleaning, Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis
- **Additional Skills:** Data Transformation, Machine Learning, A/B Testing, Google Analytics

PROFESSIONAL EXPERIENCE

Syneos Health, USA || Data Analyst

Feb 2024 - Present

- Designed and developed Power BI visualizations and interactive dashboards based on business requirements.
- Applied clustering and regression analysis techniques in Python, identifying key trends and correlations that improved operational efficiency by 15%. Modified existing Tableau reports and collaborated with business to integrate new data points to streamline workflow and company processes.
- Used various sources to pulled data into Power BI such as SQL Server, Oracle, SQL Azure etc.
- Performed Data cleaning and normalization along with profiling to ensure Data Quality.
- Collaborated with stakeholders to gather requirements and deliver data-driven solutions that aligned with business goals, driving a 20% increase in operational efficiency.
- Utilized Azure Databricks for large-scale data processing and advanced analytics, reducing data pipeline latency by 25%.
- Designed and Developed reports from multiple data sources by blending data on a single worksheet in Tableau Desktop.
- Coordinated Phased Data Migration process to handle large and complex volumes of data and address dashboard reporting capabilities.
- Supervised and collaborated with data coordinators and other team members to provide technical support and end-user training on the developed applications.
- Retrieved and analyzed financial transaction data comprising over 2 million records using MySQL and Snowflake, driving insights that contributed to a \$2M revenue increase.

Mphasis, India || Data Analyst

May 2018 – Dec 2021

- Designed 10+ Tableau dashboards visualizing customer segmentation, retention trends, and loan portfolio performance, improving decision-making speed by 20%.
- Built Excel-based predictive models for credit risk analysis, reducing default rates by 12% and improving collection rates for 5,000+ loans.
- Developed Microsoft Power BI Dashboards to showcase the result of data analysis from the database.
- Led the development of a data-driven marketing strategy, utilizing Python and machine learning models to predict customer behavior, resulting in a 25% increase in customer retention.
- Integrated custom visuals based on business requirements using Tableau desktop for better clarity of information.
- Designed and implemented data integration modules for Extract/Transform/Load (ETL) functions.
- Experience with various ETL, data warehousing tools and concepts.
- Used data analysis techniques to validate business rules and identify low quality missing data in the existing Amgen enterprise data warehouse (EDW).
- Automated reporting processes with Python scripts, reducing manual effort and increasing operational efficiency by 25%.
- Collaborated with cross-functional teams to define business requirements, translating them into actionable data insights that aligned with strategic objectives.
- Gathered requirements and created Use Cases, Use Case Diagrams, Activity Diagrams using MS Visio.

EDUCATION

San Diego State University

Master of Science in Computer Science

San Diego, CA

Jan 2022 – Dec 2023

Visvesvaraya Technological University

Bachelor of Engineering in Computer Science

Bangalore, India

Aug 2014 – Aug 2018

PROJECTS

Machine learning to analyze mobile app downloads using Python.

- Performed data preprocessing on 10k Google Play Store records using various business analytics techniques.
- Designed machine learning models to predict the number of App Downloads and Installs using various machine learning algorithms like Linear Regression, Logistic Regression, K-Nearest, Ensemble Methods (Bagging and Boosting), and Random Forest, obtaining an overall 95.02% accuracy in prediction by the Random Forest Algorithm.
