Career Objective:

With a rare eye for Insight, I am a committed Data Analyst with a background in Computer Science, looking for an ambitious company. With over 2 years as a lead Power BI Developer working on advanced Data Analysis with Power BI and a great understanding of cloud technology architecture such as AWS, GCP and Azure. I possess thorough troubleshooting and problem-solving skills.

I am great at communicating insights from data to C-Suite executives with depth of technical experience. Strong problem solving and analytical skills.

Core Skills:

Microsoft Power BI, Web Scraping, Data Cleaning, Survey Monkey, Google Analytics, Microsoft Forms, SQL, Data Analysis, Data Visualization, Reporting, Microsoft Excel, Requirement Gathering, Data Entry, Data Auditing, Creating Data Reports, AWS Administrator, Google Cloud Administration, Azure Q&A chatbot maker, Tableau, Python, DAX, SAP

Work Experience:

Norwex

January 2024 – Current

Consultant Care Representative/ Data Analyst

800 W Bethel Rd, Coppell, Texas 75019

- Analyzed and processed customer interactions and order data from the NEO system, handling 80-100 calls daily to identify trends and optimize service delivery using SQL and Power BI.
- Utilized SQL queries to authenticate customer and consultant accounts, ensuring data security and integrity while facilitating seamless user experiences within the NORI system.
- Leveraged Power BI to assist consultants and customers in navigating their back-office systems, optimizing user experience and efficiency through intuitive data visualization.
- Created revenue reports that included the use of bar graphs to show highest revenues from products and a line graph to show trends in revenue quarterly and yearly with the use of Power BI.
- Recorded and analyzed call interactions with customers and consultants in the SPICE system, extracting actionable insights to improve customer service performance and enhance overall satisfaction.
- Collaborated with IT teams to report and resolve technical issues affecting account accuracy and functionality, providing detailed analysis and recommendations for system enhancements.
- Generated comprehensive reports using Power BI on past, present, and future deals and incentives, empowering consultants, and customers with actionable insights to drive decision-making and improve sales performance.
- Made use of Microsoft Excel to clean large sets of data using specific functions and Macros for visualization.

Amesbury Truth

January 2023 – January 2024

Customer Service Representative/Order Entry Specialist/Analyst

545 John W Carpenter Freeway, Irving, TX 75062

- Processed customer orders via phone calls and emails, ensuring accurate entry and timely fulfillment. Utilized MS Excel for order tracking and management, enhancing efficiency and organization.
- Managed a high volume of customer inquiries, handling 100-120 calls per day to provide updates on order statuses and address any concerns. Recorded and analyzed customer interactions in Excel to identify trends and improve service quality.
- Prepared essential documentation for customers, including packing slips, order confirmations, and commercial invoices, to facilitate smooth order processing. Created and formatted documents using MS Excel, ensuring clarity and professionalism.
- Corresponded with customers via email to communicate updates on their orders, always maintaining clear and professional communication. Utilized Excel for email correspondence tracking and management, ensuring timely responses and follow-ups.
- Updated customer records in the SAP system, including address and name changes, to ensure accurate and up-to-date information. Utilized Excel for data validation and verification, minimizing errors and maintaining data integrity.
- Managed the entry and release of customer EDI orders within the SAP system, adhering to established protocols for data accuracy and security. Used Excel for data analysis and validation, ensuring compliance with EDI standards and requirements.

Genpact LLC

February 2022 – January 2023

Savings Specialist/Data Analyst (Marcus by Goldman Sachs Bank)

3300 E Renner Rd, Richardson, TX 75082

- ❑ Managed a high volume of outbound calls, averaging 130 to 150 per day, addressing diverse inquiries such as product information requests. Utilized SQL queries to analyze call data and identify trends in customer inquiries for optimization.
- ❑ Demonstrated proficiency in telemarketing, effectively engaging customers and promoting products or services. Utilized Power BI for analysis of campaign performance metrics and ROI evaluation.
- ❑ Operated with an auto-dialing system to streamline outbound call processes, increasing efficiency and maximizing call volume while maintaining quality customer interactions.
- ❑ Resolved customer issues related to website functionality and account navigation, utilizing SQL queries to identify and address underlying technical issues. Power BI was used for tracking and analysis of website performance metrics.
- ❑ Recorded and stored detailed customer discussions for future reference and analysis. Utilized SQL databases to manage and retrieve call log data efficiently, contributing to improved customer service and issue resolution.

ITECH Consulting
