

SUMMARY

Data Analyst with 5+ years of experience spanning financial services, healthcare, and insurance domains. Skilled in leveraging Python, SQL, Power BI, and Tableau to transform complex datasets into actionable insights that improve decision-making and operational efficiency. Demonstrated success in delivering financial analytics solutions such as credit risk assessment, fraud detection, and marketing performance optimization, as well as healthcare-focused projects including clinical quality reporting, patient risk stratification, and claims denial analytics. Proven ability to design predictive models, optimize ETL pipelines, and automate analytics workflows to drive measurable business impact. Recently completed a Master's in Business Analytics from Clark University, strengthening expertise in advanced analytics, data-driven strategy, and business-focused data science solutions.

CERTIFICATIONS

Accenture North America - Data Analytics and Visualization Job Simulation

Google Analytics Certification

Microsoft Certified: Power Bi Data Analyst Associate

Digital Marketing: Hands-on experience SEO Course

BCG - GenAI Job Simulation

TECHNICAL SKILLS

Data Analysis & Statistics: EDA, data cleaning, data transformation, descriptive & inferential stats, A/B testing, regression

(linear, logistic), time series analysis

Programming Languages: Python (pandas, NumPy, matplotlib, seaborn, plotly, scikit-learn), SQL (joins, CTEs, window functions), R (optional)

Data Visualization & Reporting: Power BI, Tableau, Looker, Qlik, matplotlib, seaborn, plotly, dashboard design, data storytelling

Databases & Data Warehousing: PostgreSQL, MySQL, SQL Server, Amazon Redshift, Google BigQuery, Snowflake, ETL/ELT (dbt, Python)

Cloud Platforms: AWS (S3, Athena, Glue, Lambda), GCP (BigQuery, Dataflow), Azure (Synapse, Data Factory)

Big Data Tools: PySpark, Hadoop (basic), distributed data processing

Machine Learning (Applied): scikit-learn, XGBoost, feature engineering, classification, clustering, model evaluation

Workflow Automation: Apache Airflow, Python automation scripts, scheduled reporting

Version Control & Dev Tools: Git, GitHub, Jupyter Notebooks, VS Code, Google Colab

Soft Skills & Collaboration: Stakeholder communication, Agile (Jira, Confluence), cross-functional collaboration, reporting

PROFESSIONAL EXPERIENCE

Mass Mutual, MA USA

Jan 2025 – Current

Data Analyst

- Cleaned and transformed 3M+ rows using Python and SQL, improving credit model data accuracy by 37% and reducing errors in actuarial risk reporting workflows.
- Automated A/B testing pipelines with Airflow and Python, cutting campaign analysis time by 40% and enabling faster decision-making for marketing and product strategy teams.
- Developed an interactive churn risk dashboard in Power BI, enabling proactive customer retention efforts and reducing quarterly lapse rates by 12% across key segments.
- Built and deployed logistic regression and ARIMA models, improving annuity renewal forecast accuracy by 18% and enhancing revenue predictability for the client servicing business unit.
- Refactored dbt models and optimized AWS Glue ETL pipelines, reducing batch processing time by 32% and improving the timeliness of insights available to financial risk teams.

- Authored detailed pipeline and workflow documentation in Confluence and Jupyter, reducing analyst onboarding time by 25% and strengthening cross-team collaboration between engineering and actuarial stakeholders.
- Partnered with cross-functional teams (finance, risk, and engineering) to translate business requirements into scalable data solutions, ensuring high-quality insights aligned with compliance and reporting standards.

DIG IT Digital 360 PVT LTD

Sep 2019 – July 2023

Data Analyst

- Designed and delivered interactive dashboards and reports in Tableau, Power BI, Looker, and Excel, translating complex financial and operational data into clear insights for stakeholders.
- Built and maintained ETL pipelines using Python, SQL, and Apache Spark to extract, transform, and load data from multiple sources into centralized warehouses, ensuring data accuracy, quality, and governance compliance.
- Applied statistical analysis and machine learning models (scikit-learn, TensorFlow, Keras, Statsmodels) to forecast claims trends, identify cost drivers, and strengthen risk assessment and predictive planning.
- Streamlined data workflows and reporting automation using Azure Data Factory, Synapse Analytics, Snowflake, and Hadoop, improving scalability and reducing manual reporting efforts.
- Partnered with finance and operations teams to deliver ad-hoc analysis, scenario modeling, and KPI tracking, enabling better decision-making and financial planning.
- Developed and documented logical and physical data models in SQL Server, Oracle, and cloud environments, supporting consistent reporting and enterprise-wide integration.
- Conducted data validation, cleansing, and reconciliation to improve accuracy across financial reporting and analytics workflows.

Data Analyst, India

IQVIA May 2018 – Aug 2019

- Extracted, cleaned, and standardized over 1M patient records from EHR systems and claims data marts, building HIPAA-compliant data pipelines that enhanced clinical quality reporting for 7+ hospital clients.
- Performed root cause analysis on 2.3K+ readmission cases using logistic regression and clustering techniques, uncovering comorbidity hotspots and driving a 14% reduction in 30-day readmission rates.
- Designed and deployed interactive Tableau and Power BI dashboards to monitor hospital-acquired infections (HAIs), average length of stay (ALOS), and care quality metrics, delivering real-time visibility for clinical leadership.
- Built predictive patient risk stratification models using SVM and Random Forest, flagging high-risk chronic disease patients and improving early intervention outreach by 22% in pilot programs.
- Automated claims denial analytics across multiple payers with Python and SQL, identifying patterns in CPT/ICD mismatches and reducing denial rates by 11% within two quarters.
- Collaborated with clinical researchers on Phase II–IV trial data analysis, strengthening protocol adherence insights and improving recruitment feasibility across oncology, CNS, and cardiology therapeutic areas.

EDUCATION

Master's in Business Analytics

Aug 2023 - May 2025

Clark University, Worcester, Massachusetts.

Bachelor of Technology in Petroleum Engineering

Jul 2015 - May 2019

Jawaharlal Nehru Technological University, Kakinada, India
