

Purvash Kalpesh Desai

Data Analyst

Location: Morrisville, NC

Phone: +1 (551) 229-6006

Email: purvashdesai97@gmail.com

LinkedIn: <https://www.linkedin.com/in/purvash->

Summary

- Experienced IT professional with around 4+ years of expertise in data analysis, market research, analytics, and data modeling.
- Proficient in a wide range of data-related tasks such as business and data analysis, data warehousing, data migration, data cleaning, statistical modeling, and SQL.
- Skilled in Python for data analysis, utilizing popular libraries such as NumPy, Pandas, and Matplotlib for effective data visualization.
- Proficient in executing 'Gap Analysis' to analyze and document existing process workflows and evaluate the benefits of new/proposed process workflows
- Excellent requirements elicitation skills and extensive experience in interacting with the stakeholders to gather requirements for various financial instruments including Fixed Income, Equities and Capital Markets
- Strong experience in collaborating with the QA Analysts for Test planning, Test execution, Issue resolution and Report generation.
- Collaborated with cross-functional Agile teams to gather business requirements and translate them into user stories, ensuring alignment between technical solutions and business needs.
- Executed medium-to-complex SQL queries for data analysis and data validation.
- Administered Change management procedures and conducted Impact Analysis therein to evaluate the level of effort required to mitigate the impacted processes.

Skills

Languages	Python, Javascript, R
AI & Gen AI:	LangChain, RAG (Retrieval-Augmented Generation), Azure Synapse AI, Azure Fabric AI Agents
Data Engineering	ETL Pipelines, Data Modeling (Star Schema, Dimensional Modeling), Data Warehousing, Alteryx
Framework	Flask, AJAX, JSON
Databases	MySQL, Oracle 11g Express, Firebase, Mongo DB, Dynamo DB
Tools	Jira, Adobe Creative Cloud, Power BI, Tableau DAX, LOD Calculations, Matplotlib, Seaborn
Other	RESTful API, OAuth 2.0, ITSM, ITIL, S3, AWS Lambda, D3, VTK; API Gateways, Cloud9, CloudFront Object Oriented Programming, Software Development Lifecycle, Database Systems, Data Processing, Regression and Classification, Data Communication Networks, Cloud Computing, Machine Learning Algorithms, Data Visualization, Multimedia, NLP Azure Fabric, Azure Synapse, GCP BigQuery
Operating System	Windows, Linux, and Mac OS

Education

CUNY – The Graduate Center New York, NY

Master of Science in Data Analysis & Visualization (Business Intelligence)

Aug 2022 – Aug 2024

University of Mumbai, India

Bachelor of Engineering in Information Technology

Aug 2015 – May 2019

Experience

Ecom Consulting: Verizon, NC

Oct 2024 - Present

BI Data Analyst

- Utilized Python and Tableau to develop predictive analytics models and analyze data, incorporating tools such as Pandas, NumPy, and Matplotlib for improved data interpretation.
- Designed physical and logical data models, metadata documentation, and production specifications, and utilized MS Excel to create Crosstabs for further data analysis.
- Applied Agile principles for iterative development of predictive analytics models and data visualizations, while employing Waterfall principles for structured design and milestone-driven progress.
- Conducted data gathering and reconciliation using Excel, resulting in a 20% increase in data accuracy.

- Developed, designed, and maintained functional reports in Tableau based on user requirements, leading to a 30% increase in user satisfaction.
- Optimized and improved several complex SQL queries for better performance and efficiency, resulting in a 25% reduction in query execution time.
- Analyzed business requirements and developed Use Cases, Use Case Diagrams, Sequence Diagrams, Activity Diagrams.
- Developed predictive analytics use-cases with Python, leading to a 25% increase in predictive accuracy.
- Analyzed data and systems to identify the best BI solution for generating reports, dashboards, scorecards, and data cubes using Tableau.
- Led requirements gathering through stakeholder interviews and workshops to define reporting, KPI, and data model requirements for BI solutions.

Research Assistant

Jan 2024 – Sept 2024

CUNY - The Graduate Center | New York, NY

- Skilled in designing and developing effective data visualizations using Power BI, selecting appropriate charts and graphs, and applying interactive features to enhance user experience.
- Generated analytical reports with recommendations for management to enable strategic planning, using ETL processes to gather data from various external sources.
- Designed, developed, and maintained Tableau functional reports based on user requirements, and optimized/tuned several complex SQL queries for better performance and efficiency.

Capgemini, India

Feb 2021 – July 2022

Sr. Data Analyst

- Championed the development of intricate SQL queries for data analysis and extraction, resulting in the identification of critical hiring trends and improved retention rates by 10%.
- Engaged in physical and logical data modeling, metadata documentation, and user documentation, resulting in a 15% increase in data accuracy.
- Have a hands-on experience of working on agile and waterfall methodologies & took part in requirement gathering, backlog grooming, sprint planning etc
- Executed advanced SQL queries to access and analyze data from the relational database for data modeling and reporting.
- Proficient in utilizing Power BI to create visually appealing and interactive dashboards, reports, and data models.
- Created insightful analytical reports with recommendations for management, enabling strategic planning and driving a 15% increase in profitability.

Capgemini, India

Feb 2020 – Feb 2021

Data Analyst

- Collaborated in writing, testing, and implementing triggers, stored procedures, and functions at the database level using PL/SQL, enhancing the functionality and performance of the system.
- Applied Python and Tableau to generate a comprehensive report on predictive analytics, including data visualization, model performance, and prediction results, providing valuable insights for business decisions.
- Imported and analyzed complex claims data using panda's libraries, delivering accurate and timely reports for management review.
- Created and delivered weekly and monthly reports utilizing advanced MS Excel techniques such as charts, graphs, pivot tables, and PowerPoint presentations.
- Designed and executed SQL queries using joins, database links, and bulk collects to fetch complex data from different tables in remote databases, increasing efficiency and accuracy.
- Designed and implemented data profiling and data-quality improvement solutions, including data cleansing, analysis, and consolidation, ensuring high-quality data is loaded into the data warehouse.

Projects

T20 Cricket World Cup 2024, USA & WI | Tableau, Python (Pandas, Matplotlib), Excel

- Constructed an interactive Tableau dashboard using Python Pandas Matplotlib and Excel to analyze 500+ matches from 8 prior T20 World Cups, revealing win rates, player trends and venue patterns for 12 teams.
- Integrated data on 9 venues, 20 teams and 50+ entities with 10000+ data points to drive event strategy and fan engagement.

Generative AI-Powered Analytics Platform | GCP BigQuery, Python, SQL, Tableau, RAG, LangChain

- Forged retrieval-augmented generation (RAG) pipelines with long-context reasoning to process 2M+ healthcare records, enabling autonomous AI-driven insights akin to support agents.
- Catalyzed AI evaluation suites tracking accuracy and cost metrics, optimizing generative models for scalable healthcare analytics
