

Pushpanka Naidu

Business Analyst | Business Intelligence | Data Analytics

Springfield, IL | +1 (602) 471-9632 | pushpanka.data@gmail.com | [LinkedIn](#)

SUMMARY

Business Analyst with 3+ years of experience delivering data-driven solutions across banking and consulting environments. Expertise in **requirements engineering, SQL, Python, Power BI, Tableau, KPI strategy, and business process optimization**. Proven track record of translating business requirements into scalable solutions that improve operational efficiency, executive decision-making, and enterprise business outcomes.

SKILLS

Data Analytics & Decision Intelligence: SQL, Python, Power BI, Tableau, Predictive Analytics, Product Analytics, KPI Strategy, Executive Reporting, Data Storytelling

Business Analysis & Process Engineering: Requirements Engineering, User Story Mapping, BPMN 2.0, Functional Specifications, Process Modeling, Gap Analysis, Change Impact Analysis, Stakeholder Management, User Acceptance Testing (UAT)

Business Intelligence: Executive Dashboarding, DAX, Power Query, Interactive Reporting, Self-Service BI, Performance Scorecards

Agile Delivery: Agile, Scrum, Jira, Confluence, Sprint Planning, Backlog Refinement, Release Planning, Cross-Functional Collaboration

Data Management: PostgreSQL, Data Modeling, Data Governance, Data Quality Management, Master Data Management (MDM), Data Validation

Operational Excellence: Lean Six Sigma, Workflow Automation, Business Process Optimization, Value Stream Mapping, Root Cause Analysis, Continuous Improvement

AI-Enabled Productivity: Microsoft Copilot, Generative AI, AI-Assisted Business Analysis, Prompt Engineering, Intelligent Documentation

EXPERIENCE

JPMorgan Chase, USA | Business Analyst

Oct 2025 - Present

- **Led business analysis** for **10+ enterprise banking initiatives**, translating strategic objectives into scalable business solutions that accelerated delivery by **30%**.
- **Established executive KPI frameworks and interactive Power BI dashboards** providing real-time visibility into financial performance, customer operations, and operational risk metrics.
- **Partnered with Product Managers, Risk, Compliance, and Technology teams** to prioritize business initiatives, align product roadmaps, and improve cross-functional execution.
- **Developed business cases, impact assessments, and cost-benefit analyses** supporting enterprise transformation initiatives and strategic investment decisions.
- **Facilitated executive stakeholder workshops** to prioritize business capabilities, align solution roadmaps, and drive consensus across business and technology teams.
- **Defined business acceptance criteria and validation strategies** ensuring regulatory compliance and successful delivery of enterprise solutions.
- **Optimized enterprise KPI reporting frameworks** using SQL and Power BI, improving reporting accuracy by **35%** and enabling faster executive insights.
- **Leveraged Microsoft Copilot and Generative AI** to accelerate requirements analysis, business documentation, and stakeholder communication, improving delivery efficiency by **40%**.

Accenture, India | Business Analyst

May 2022 - Aug 2024

- **Delivered business analysis** across **10+ enterprise transformation projects**, translating client requirements into functional solutions that improved process efficiency by **25%**.
- **Gathered and documented business requirements** by developing **BRDs, FRDs, BPMN process models, user stories, and functional specifications** supporting Agile solution delivery.
- **Analyzed enterprise datasets using SQL and Python** to identify operational trends, improve reporting accuracy, and support strategic business decisions.
- **Designed Power BI and Tableau dashboards** delivering executive visibility into operational performance, KPI trends, and business metrics.
- **Conducted process mapping, gap analysis, and workflow optimization**, identifying improvement opportunities that enhanced operational efficiency by **25%**.
- **Coordinated User Acceptance Testing (UAT)** by preparing business test scenarios, validating functional requirements, and supporting successful production deployments.
- **Collaborated with Agile teams** through sprint planning and backlog refinement to ensure timely solution delivery.
- **Established data governance and validation standards** to improve reporting consistency and business insights.
