

OBJECTIVE

My technical skills proficiency will allow me to leverage my enthusiasm and passion for a challenging IT career path. A talented and knowledgeable student who is able to learn quickly and contribute to any team. A successful track record of leading projects, communicating effectively, and working collaboratively with others to achieve goals. Demonstrated commitment and integrity in addition to strong academic achievement. Passionate about continuous learning and collaborative teamwork, seeking a role where I can contribute to real-world projects.

EDUCATION**Master of Science in Information Technology***Aug 2023- May 2025**Northern Arizona University, Flagstaff, Arizona, USA*

CGPA: 3.45/4.0

Bachelor of Technology in Information Technology*June 2018- June 2022,**University College of Engineering Kakatiya University, Kothagudem, India.*

CGPA: 3.3/4.0

EXPERIENCE**Teaching Assistant - Web Programming**

Northern Arizona University, Flagstaff, Arizona, United States

Jan 2025 – May 2025

- Facilitate student learning in web programming by conducting interactive lab sessions, providing one-on-one mentorship, and evaluating coursework.
- Simplify complex web development concepts, assist students with debugging, and foster a collaborative learning environment.
- Develop leadership, communication, and problem-solving skills while deepening expertise in front-end and backend technologies.

Teaching Assistant - Web Technology

Northern Arizona University, Flagstaff, Arizona, United States

Aug 2024 - Dec 2024

- Assisted in delivering web development courses by guiding students through fundamental and advanced concepts of HTML, CSS, JavaScript, and backend technologies.
- Conducted lab sessions, resolved coding challenges, graded assignments, and provided academic support to enhance student understanding.
- Collaborated with instructors to develop course materials and foster an engaging learning environment.
- Improved technical expertise and mentoring skills while staying updated with the latest web technologies.

Teaching Assistant – Network in System Administrations (Networking)

Northern Arizona University, Flagstaff, Arizona, United States

- Assisted in delivering coursework on system administration and networking concepts, including configuration, troubleshooting, and security. Supported faculty in lab sessions by guiding students through practical exercises and resolving technical issues. Graded assignments, maintained learning resources, and provided academic support to enhance student understanding.

INTERNSHIP**Full Stack Web Developer Yougetplaced, Null class***Dec 2022 - Apr 2023*

- As a Full Stack Web Developer with expertise from YouGetPlaced and NullClass, I specialize in building real-time applications using the MERN stack. Leveraging advanced front-end skills, I create dynamic, responsive, and interactive user interfaces. My recent focus has been on developing platforms like Stack Overflow, integrating real-time features such as live Q&A and user collaboration. Proficient in JavaScript frameworks, I ensure seamless communication between the client and server. My goal is to deliver scalable, efficient, and user-friendly web solutions.

PROJECTS

Online job portals*Nov 2020 – Jan 2021*

- Developed an online job portal as a mini project for UCE KU, utilizing technologies like XAMPP server, HTML5, CSS3, PHP, jQuery, AJAX, and MySQL.
- The portal streamlines job postings and applications, ensuring a user-friendly experience. It incorporates dynamic features for real-time data updates and efficient database management. This project demonstrates my ability to integrate front-end and back-end technologies effectively.

Deep surveillance with Deep learning- intelligence:

- developed a deep surveillance system as a major project, focusing on intelligent video monitoring using Python. The project integrates deep learning and machine learning as its core technologies, enabling accurate detection and real-time analysis. It enhances security through advanced surveillance capabilities and predictive insights. This project highlights my expertise in AI-driven solutions for modern challenges.

Phishing website detection by Machine Learning Designed:

- Designed a phishing website detection system as a major project, utilizing Python, machine learning, Django, HTML, and CSS.
- The system employs machine learning algorithms to identify phishing websites with high accuracy, ensuring improved cybersecurity. Python and machine learning play a pivotal role in the project, enabling robust analysis and detection. This project highlights my ability to integrate cutting-edge technologies for practical solutions.

CERTIFICATIONS

- Online computer programming lessons (GUVI, AICTE, NEAT, BUDDI.AI) (02/2021) participated in Guinness world record event.
- Builds a face recognition application using python (GUVI) (04/2021) Certificate of achievement for successful completion
- Became an Ethical hacker (MIMO CERTIFIED) an understanding of the skills required for Whitehat hacking, such as Cryptography, SQL and identifying password weakness.

TECHNICAL SKILLS AND INTRESTS

- **Programming Languages:** C, Java, Python, JavaScript, HTML, CSS, C++
- **Web Technologies:** React.js, Node.js, Express.js, Django, Bootstrap, Spring Boot, RESTful APIs
- **Databases:** MySQL, MongoDB, SQL, NoSQL
- **Cloud & DevOps:** AWS, Azure, Docker, Kubernetes.
- **Frameworks & Libraries:** Django, jQuery, Bootstrap, Spring Boot
- **Version Control & CI/CD:** Git, GitHub, GitLab, XAMPP, Docker, CI/CD Pipelines, Maven, Jenkins's
- **Messaging:** JMS (Java Message Services), Apache Kafka
- **Operating System:** Windows, Linux, Unix.
- **Network Protocols:** TCP/IP, DNS, DHCP, routing protocols (e.g., BGP, OSPF), VPNs.
- **Scripting & Automation:** Python, PowerShell, Bash, Automation & Orchestration Tools, Secure Coding Practices
- **Development Practices:** Agile, Code Reviews, Automated Testing
- **Security & IAM:** SIEM (Splunk, Elastic), Log Analysis, Vulnerability Management, Endpoint Protection, Ping Identity, Okta, Identity & Access Management (IAM), Access Controls, Zero Trust Security, Operational Technology (OT) Security
- **Cybersecurity & Cloud Security:** Threat Detection, Incident Response, Cloud Security (AWS, Azure), Data Collection & Analysis, Security Frameworks (NIST, ISO 27001)
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Cybersecurity, Cryptography, Network in system Administrations, Databases, Information Security, Web Technology
- **Soft Skills:** Multi-tasking, Adaptability, Communication, Problem-Solving

PROFESSIONAL ATTRIBUTES

- **Adaptability:** Ability to adjust to new situations, changes, and challenges, staying productive in dynamic environments.
- **Reliability:** Consistently meeting deadlines, following through on commitments, and producing quality work that others can depend on.
- **Problem-Solving:** Analyzing situations, identifying issues, and coming up with practical, efficient solutions to overcome challenges.
- **Effective Communication:** Demonstrated proficiency in both written and verbal communication, fostering clear collaboration among cross functional teams to address complex problem-solving scenarios. Clearly conveying ideas, actively listening, and ensuring mutual understanding in both verbal and written interactions.
