## EDUCATION

### Pace University - Seidenberg School of CSIS

Master of Science in Computer Science, Specialization: AI

New York, NY

Jan. 2023 – Dec. 2024

### JNTUH College of Engineering

Bachelor of Technology in Electrical and Electronics Engineering

Hyderabad, India

Jul. 2016 – May 2019

## EXPERIENCE

### Data Engineer

Jan. 2024 – Present

Delta Dental

Remote

- Designed and implemented robust data ingestion and transformation workflows processing 1.5M+ daily transactions from 15+ source systems using Python and SQL-based ETL frameworks
- Developed scalable architectures for real-time and batch data processing, integrating databases, APIs, and flat files while maintaining 99.7% data quality and ensuring data governance compliance
- Optimized data pipeline performance through load balancing strategies and automated monitoring, reducing processing time by 65% and improving system reliability
- Collaborated with data engineers, developers, and business stakeholders to define integration requirements, translating business needs into technical solutions for healthcare analytics
- Ensured compliance with data security, encryption, and regulatory standards including HIPAA across all data flows while maintaining comprehensive documentation

### Data Engineer I

Aug. 2020 – Jun. 2022

Amazon

Remote

- Architected scalable data pipelines using Python and Apache Spark processing 5M+ daily records, implementing clustering and failover strategies that maintained 99.5%+ system uptime
- Developed custom Python scripts for data processing and transformation workflows, integrating data from multiple sources including databases, APIs, and streaming platforms
- Optimized pipeline performance through load balancing and query tuning in AWS cloud environment, reducing processing time from 6+ hours to under 20 minutes across distributed systems
- Implemented data security measures and encryption protocols for sensitive data flows, ensuring compliance with security frameworks while processing 100TB+ annually

### Machine Learning Data Associate II, AVOC

Aug. 2019 – Jul. 2020

Amazon Robotics

Hyderabad, India

- Labeled 100,000+ images with 98%+ accuracy for computer vision object detection models supporting warehouse robotics automation
- Developed Python automation scripts reducing manual annotation processing time by 30% and improving team productivity

## PROJECTS

### Enterprise Data Integration Platform | Python, Kafka, Spark, AWS

2024

- Designed scalable data integration workflows processing real-time streaming data from 10+ sources using Kafka and Spark, implementing failover strategies and load balancing for high availability

### Cloud-Native Data Pipeline Architecture | AWS, Docker, Python, Kubernetes

2024

- Architected containerized data pipelines on AWS using Docker and Kubernetes, implementing encryption and security compliance that reduced deployment time by 60%

## TECHNICAL SKILLS

**Languages:** Python, Java, SQL, Scala, R, Shell Scripting

**Data Integration:** Apache Spark, Apache Kafka, ETL/ELT Workflows, Real-time & Batch Processing

**Cloud Platforms:** AWS (S3, Glue, Lambda, Kinesis, Redshift), Azure, GCP

**Containerization:** Docker, Kubernetes, Container Orchestration

**Data Engineering:** Data Architecture, Pipeline Design, Load Balancing, Clustering, Failover

**Security & Compliance:** Data Encryption, Data Governance, Security Frameworks, Regulatory Standards

## CERTIFICATIONS

AWS Certified Data Engineer - Associate | AWS Certified Solutions Architect - Associate | AWS Certified AI Practitioner
