

Teesha Ahuja

Boston, MA; 857-919-2540; tisha07@bu.edu

EDUCATION

Boston University, Boston, MA

Masters in Applied Data Analytics

May 2025

- Relevant Coursework: Information Systems with Python, Advance Machine learning, Data Mining, Data Warehousing, web mining

Delhi University, India

Bachelor's in commerce (BCOM), Finance

May 2023

- Relevant Coursework: Monte Carlo Simulation, Derivatives, Black-Scholes Model, Fundamental Analysis, Prescriptive Analysis

EXPERIENCE

Ernst and Young, New Delhi, India

Business Analyst Intern

Oct 2021 - Dec 2021

- Extracted actionable insights from a dataset exceeding 10,000 data points, addressing key customer pain points and delivering tailored solutions that drove a 15% surge in customer satisfaction and engagement.
- Authored and delivered strategic reports on India's policy landscape for Electronic System Design and Manufacturing (ESDM) and IT-enabled services, influencing high-level decision-making and contributing to a 10% growth in industry partnerships and policy alignment.
- Engineered predictive models in R, deploying advanced regression and time series techniques that enhanced forecast accuracy by 20%, empowering stakeholders with robust, data-driven insights to streamline operations. Spearheaded machine learning initiatives in pricing optimization, achieving an 85% accuracy rate in demand forecasting. This resulted in a 12% uplift in revenue by pinpointing optimal price points, maximizing profitability in real-time market conditions.

88 Academics, New Delhi, India

Jul 2020 - Dec 2020

Financial Risk Analyst Intern

- Synthesized and evaluated financial data across budgets exceeding \$20 million and income statement forecasts, aligning insights with corporate objectives. This resulted in a 10% increase in forecast accuracy, driving more informed financial decisions.
- Led the review of liquidity risks for new lending structures valued at over \$50 million, collaborating with cross-functional teams to mitigate risks. Executed a funding strategy that raised \$15 million in capital through strategic partnerships with the Securities Division, ensuring business growth and liquidity.

PROJECTS

NLP and SVM to enhance efficacy of predictions on Twitter US Airline Sentiment dataset

Highlight: project addressed significant issue of finding value in important social media data- Twitter data Compilation of Twitter US Airline Sentiment dataset. Achievement: project aimed at figuring out sentiments of tweets by a logical application of (NLP) and (SVM) Models.

Clickbait in Social Media: Detection and Analysis of the Bait

Highlight: Developed a novel visual clickbait detection model for Twitter and Instagram using a stacking classifier framework and analyzed characteristics of clickbait images. Achievement: Improved accuracy by 2% for Instagram and 2.5% for Twitter over existing models; research paper on project under publication for inclusion into IEEE Xplore.

Movie Review Sentiment Analysis Using Extractive Summaries

Highlight: Architected a model for sentiment analysis of lengthy movie reviews - Performed extractive summarization using TF-IDF algorithm and trained SVM classifier to predict sentiment of summarized reviews Achievement: Reduced training time by 46% while achieving comparable accuracy of 92% as compared to 96% of current state-of-the-art.
