

COMPUTER SCIENTIST | TROUBLESHOOTING OPERATIONS | TECHNICAL SUPPORT

IT Professional and Military Veteran with 3+ years of experience in technical support, troubleshooting, and system optimization. CompTIA Security+ Certified and holding an inactive Secret Clearance, with proven expertise in cybersecurity, computer networking, and IT operations. Skilled in windows 10 administration, networking concepts, remote troubleshooting, and IT infrastructure. Proven ability to deliver scalable, secure, and reliable systems in high-pressure environments, meeting service level agreements while maintaining a strong focus on compliance with business standards. Team player with excellent user support service, problem-solving, and analytical skills, eager to contribute to innovative information technology solutions and support service excellence. Experienced in technical assistance, asset management, and custodian duties related to technical solutions and software, including file server management, scheduling and overseeing management systems to enhance operational efficiency with Enterprise Software and software products. Time management and competent mobile device support have been key to my role in ensuring client satisfaction, incorporating automation where applicable.

- Malware Analysis & Virtual Machines
- Account Maintenance
- Client Relationship Management
- Technical Support
- Network Infrastructure TCP/IP, Routing
- Teamwork
- Equipment Performance
- Hardware & Software Diagnostics
- Risk Mitigation
- Project Management
- Help Desk
- Digital principles & Scientific Methods

PROFESSIONAL EXPERIENCE

Computer Lab Attendant | University of Nebraska Lincoln, Nebraska

09/2023 – 01/2025

Assisted an average of 20 students and staff per weekend shift with navigating IT Services labs, improving user experience, and ensuring smooth operations during off-hours, which contributed to a more productive learning environment. Implemented process improvements that align with the Business Requirement for educational support services.

- Delivered comprehensive hardware and software support, resolving technical issues for faculty, staff, and students across multiple departments, enhancing overall productivity and system functionality while maintaining records of issues addressed.
- Troubleshoot and repaired software and hardware issues promptly, maintaining an efficient and fully operational lab environment, reducing downtime, and improving overall lab performance through problem management.
- Utilized a ticketing system to track and manage requests via e-mail, including platforms such as ServiceNow with asset management capabilities, facilitating efficient responses and resolutions. Conducted regular progress reporting on issue resolution times to ensure compliance with departmental standards.
- Proactive support provided by monitoring lab systems and anticipating potential issues, contributing to smoother operations and improved user satisfaction during peak hours, in line with departmental standard operating procedures.
- Focused on change management projects to enhance lab efficiency and user satisfaction metrics, employing active learning and training of new hires in best practices, including password reset and software installation, setting clear goals and tracking performance indicators, showcasing my technical aptitude and commitment to delivering high-quality support through initiatives in accessibility.

Python Programmer | Outlier AI Remote

07/2024 – 05/2025

Evaluated and optimized Python code generated by AI models, ensuring correctness, efficiency, and adherence to best practices while contributing to the improvement of advanced AI systems. Engaged in software development activities, aligning with software development life cycle principles.

- Assessed AI-generated code by identifying errors, ranking outputs, and providing detailed feedback to enhance functionality and readability, applying organizational skills in documentation and evaluation.
- Designed and developed structured Python coding challenges to train AI models for specific scenarios, improving their performance in code generation, showcasing my creative approach to problem solving.
- Compared multiple code variations and ranked them based on quality, scalability, and adherence to industry standards, maintaining clarity and consistency in coding practices, which reflects a passion for technical excellence and a commitment to continuous process improvement.

Technician | U.S. Army

Fort Bliss

06/2020 – 06/2023

Inspected and maintained 50 air conditioning units and a generator weekly, ensuring operational readiness and reducing equipment failures by improving preventative maintenance practices, particularly with respect to storage and technology policy compliance.

- Led a team of 5 technicians for critical repairs and technical training, increasing equipment uptime through efficient task delegation and troubleshooting, demonstrating strong leadership and responsibility in supervising team efforts.
- Procured essential parts and submitted expense reporting detailed weekly reports to the chain of command, providing data-driven insights for informed decision-making on equipment and resource needs, reinforcing integrity and independence.
- Diagnosed complex technical problems using diagrams to connect wiring, enhancing system reliability and ensuring continuous operation, leveraging control mechanisms to align with policy and compliance measures. Maintained strong verbal communication and written reporting standards in documentation.
- Provided internal customer experience support effectively, focusing on connection with the employee base.

EDUCATION

- **Bachelor of Science** | Computer Science | Bellevue University | Expected August 2025

GPA, 3.9 | Dean's List 5 Times | Presidents List

- Google IT Support Professional Certificate | Completed

TECHNICAL COMPETENCIES

- Database Management: Proficient in SQL
- Operating Systems: Experienced with Windows and Linux
- Programming Languages: Skilled in Python, Java, and JavaScript
- Software & Applications: Proficient in AutoCAD, Microsoft Office 365, and Eclipse
- Technical Support: Extensive experience in installation, configuration, software and hardware repair, system performance optimization, desktop support, and IT resource management, including the use of Servicenow for efficient service management.
- Professional Skills: Strong customer interaction and communication abilities; committed to confidentiality, coordination, discipline, independence, initiative, verbal communication, written communication, assessment, entry, schedule, and innovative problem-solving, sound judgment, and objectivity in technical support, including telephone support and telecommunication.
- Additional Expertise: Proficient in using mail systems and cloud applications to improve communication and customer service. Promoted best practices in configuration management and testing. Skilled at collecting user feedback, mapping user interfaces, and improving workflows to solve performance issues related to desktop deployment. Developed proposals to enhance services and operations using performance data and focusing on market trend analysis, which adds value in areas such as litigation support.
