# MARK SANDERS

## Full Stack Software Engineer

Phone: +1 714-458-1282 | Email: [sandersmark7777777@gmail.com](mailto:sandersmark7777777@gmail.com)

LinkedIn: [linkedin.com/in/markanthonysanders](https://www.linkedin.com/in/markanthonysanders)

GitHub: [github.com/marksanders25](https://github.com/marksanders25)

## PROFESSIONAL SUMMARY

Full Stack Software Engineer with experience building scalable, responsive web applications and internal tools using React, Next.js, Node.js, NestJS, TypeScript, JavaScript, Python, and SQL. Proven track record designing REST APIs, microservices, and AI-powered automation solutions that improve operational efficiency, user engagement, and system performance. Experienced in server-side rendering (SSR), API integration, database optimization, CI/CD pipelines, and Agile software development.

## TECHNICAL SKILLS

- **Languages:** Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
- **Frontend Technologies:** React.js, Next.js, Tailwind CSS, Redux
- **Backend Technologies:** Node.js, NestJS, Express.js, RESTful APIs
- **AI & Data:** AI Integration, OpenAI API, Prompt Engineering, LLMs, RAG (Retrieval-Augmented Generation), Pandas
- **Tools & Cloud:** Git, GitHub, Docker, CI/CD, ServiceNow, Splunk, Visual Studio Code, Agile/Scrum

## EXPERIENCE

### Wynn Enterprises - Full Stack Software Engineer / IT Ops

Aug 2023 – Present

- **Architected AI-Driven Solutions:** Engineered an automated incident management application utilizing Python and the OpenAI API, reducing average ticket resolution time by 35% through intelligent categorization and routing.
- **Modern Web Development:** Developed and deployed high-performance internal enterprise portals using Next.js and React, providing robust functionality across both desktop and mobile environments.
- **Backend Engineering:** Built scalable microservices and RESTful APIs using Node.js and NestJS to streamline employee productivity workflows and system integrations.
- **System Optimization:** Collaborated with cross-functional engineering teams to resolve complex technical issues, optimizing SQL databases and maintaining network infrastructure to ensure 99.9% system uptime.

---

## Kommu Project - *Full Stack Developer*

Jun 2022 – Aug 2023

- **Full Stack Architecture:** Spearheaded the development of a web-based application connecting homeowners for planned vacations, utilizing Next.js for Server-Side Rendering (SSR) and SEO optimization.
- **Backend & API Design:** Designed secure and efficient backend architectures using Node.js and NestJS, managing complex data flows for user profiles, venues, and booking systems.
- **AI Feature Integration:** Implemented a Python-based recommendation engine to intelligently match homeowners with ideal vacation properties, increasing user engagement by 25%.
- **Agile Development:** Actively participated in Agile/Scrum sprints, performing rigorous code reviews, resolving bugs, and utilizing Git for version control to ensure seamless CI/CD pipelines prior to launch.

## EDUCATION

- Bachelor of Science, Information Technology | Purdue University | 2025
- Full Stack Software Development Certification | SABIO | 2022
- Associate of Applied Science, Information Technology | Kaplan University | 2013
