

THANMAYEE KURAM SETTY

DATA ANALYST

□ Manchester, NH • tkuramsetty9@gmail.com • +1 (857) 746-2472 • [LinkedIn](#)

I have a recent Master of Science in Information Technology graduate with a concentration in Business Analytics from Southern New Hampshire University. Skilled in SQL, Excel, Power BI, Python, data cleaning, data validation, dashboard development, and reporting. Experienced in analyzing datasets, identifying trends, developing KPI reports, and transforming data into actionable business insights through academic projects and professional experience. Strong analytical, problem-solving, and communication skills with the ability to collaborate effectively with technical and non-technical stakeholders.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, MySQL

Operations & Systems Support: Troubleshooting, Incident Resolution, System Monitoring, Ticketing Systems, Operational Support

Data Analysis & Visualization: Data Cleaning, Data Validation, Exploratory Data Analysis (EDA), Dashboard Development, KPI Reporting, Trend Analysis, Data Interpretation, Statistical Analysis, Business

Tools & Technologies: Microsoft Excel (Pivot Tables, VLOOKUP/XLOOKUP, Data Analysis, Reporting), Power BI, Microsoft Visio, Visual Studio Code, Confluence.

Methodologies & Documentation: SDLC, Agile Methodology, Technical Documentation, Process Documentation, Cross-Functional Collaboration, Requirements Gathering.

Relevant Coursework: Business Analytics, Database Management, Predictive Analytics, Systems Analysis & Design, Agile Project Management, Data Visualization, Technical Communication.

Visualization Tools: Power BI, Tableau (Basic)

Python Libraries: Pandas, NumPy, Matplotlib

PROFESSIONAL EXPERIENCE

SONS'S India Software Pvt Ltd, Hyderabad, India

June 2023 – July 2024

Business Analyst

- Collaborated with development teams and stakeholders to analyze business requirements, system workflows, and application functionality.
- Created reports and analytical summaries to support business decisions and improve operational visibility.
- Performed SQL queries to extract, validate, and analyze business data, ensuring data accuracy, consistency, and integrity across applications.
- Assisted in troubleshooting application and production-related issues by identifying root causes and supporting resolution efforts.
- Participated in Agile SDLC activities including sprint coordination, requirements tracking, workflow updates, and cross-functional collaboration using Jira.
- Supported operational testing, validation, and implementation activities across multiple project phases to ensure process accuracy, system functionality, and workflow efficiency.
- Created and maintained technical documentation including issue logs, requirement summaries, test reports, and process documentation.
- Worked closely with cross-functional teams to improve reporting accuracy, operational workflows, and overall system performance.
- Communicated technical findings and issue resolutions effectively to both technical and non-technical stakeholders.
- Assisted with process improvement initiatives and provided support for system-related user issues and operational activities.

PROJECTS

Package Delivery Tracking & Optimization System:

- Analyzed delivery and operational data to identify workflow inefficiencies and improve package tracking processes.
- Designed and managed PostgreSQL database structures to support shipment tracking and reporting.
- Utilized SQL queries to extract, organize, and analyze operational data for business insights.
- Developed reporting concepts and dashboard requirements to monitor delivery performance and operational KPIs.
- Created data models, ERDs, and process flow diagrams using Microsoft Visio.
- Collaborated within Agile teams to gather requirements, document workflows, and support data-driven decision-making.
- Supported data validation and reporting activities to improve tracking accuracy and operational visibility.

Business Process & System Analysis Project

Academic Project

- Collected, cleaned, and analyzed life expectancy datasets using Python (Pandas, NumPy) and machine learning techniques.
- Developed a predictive model achieving 89% accuracy for life expectancy forecasting.
- Performed exploratory data analysis to identify patterns, trends, and relationships within the dataset.
- Created visualizations and analytical summaries to communicate findings effectively.
- Conducted workflow analysis and documented business processes to identify improvement opportunities.
- Collaborated with project teams to translate business requirements into analytical solutions.

CERTIFICATIONS & TRAINING

- Python Training - VedaIT
- IBM Data Analyst Professional Certificate (In Progress)

EDUCATION

SOUTHERN NEW HAMPSHIRE UNIVERSITY
Master of Science in Information Technology

Manchester, NH
Sep 2024 – May 2026
