

Sai Surya M

Data Analyst

saisuryamadhiraju@gmail.com | [LinkedIn](#) | (469) 268 1933 | Richardson, TX

Data Analyst with 4+ years of experience delivering end-to-end data solutions across healthcare, finance, and banking domains. Focuses on building efficient ETL pipelines, optimizing SQL workflows, and developing predictive models using Python, Tableau, Power BI, and AWS. Translates complex datasets into actionable insights to support strategic decision-making and scalable analytics.

PROFESSIONAL EXPERIENCE

Data Analyst | Optum

Jan 2024 – Current

- Designed and maintained database structures using stored procedures, views, and triggers, improving SQL query performance by 40% while ensuring secure and consistent data workflows.
- Validated ETL pipelines with test cases, maintaining data accuracy and ensuring seamless integration across structured data sources.
- Streamlined data ingestion from disparate sources into a centralized Redshift-based data warehouse, increasing data pipeline efficiency and reducing latency by 40%.
- Automated data pre-processing using Python (pandas, NumPy, SciPy), improving data consistency and validation turnaround time by 45%.
- Developed interactive dashboards in Tableau and Power BI, translating raw healthcare data into actionable insights and boosting operational decision-making by 30%.
- Launched predictive analytics models with scikit-learn, enabling business forecasting with 85% accuracy and supporting data-driven strategies across departments.
- Leveraged AWS (S3, Redshift, Lambda) for scalable cloud-based data solutions, enhancing analytics infrastructure and workflow automation.

Data Analyst | Brane Enterprises

Nov 2021 – Oct 2022

- Built and validated risk calculation functions using Pytest, ensuring high accuracy and reliability in core financial risk models.
- Designed and deployed automated ETL pipelines with SSIS, processing 1TB of financial data daily for comprehensive and scalable risk analysis.
- Developed interactive Tableau dashboards, reducing report generation time by 60% and enabling real-time insights for key risk stakeholders.
- Applied machine learning algorithms to forecast market volatility with 85% accuracy, enhancing proactive risk mitigation strategies.
- Implemented Value at Risk (VaR) models using Python and NumPy, providing precise risk exposure estimates under various market conditions.
- Leveraged SQL and Oracle databases to efficiently query and manage historical financial data, accelerating backtesting and risk scenario analysis.
- Utilized AWS EC2 instances to perform large-scale risk simulations, improving processing efficiency for high-volume datasets.

Data Analyst | Bank South Pacific

Sep 2019 – Nov 2021

- Enhanced data retrieval efficiency by redesigning query logic and indexing, reducing report generation time by 60% for high-volume datasets.
- Conducted complex data transformation workflows, leveraging CTEs, temporary tables, and stored procedures, improving data processing speed by 35%.
- Upgraded ETL solutions in SSIS, automating data validation for 500,000+ records weekly while optimizing query performance, resulting in 50% faster data retrieval and improved report generation.
- Built SQL-based data validation workflows, improving data integrity by 99.9% and reducing manual data quality efforts by 50%.

PROJECTS

Health Analytics Project

Analysed healthcare data from 500K+ patient records, identifying trends that improved patient outcomes by 20% and optimized resource allocation using SQL, Python, and data visualization tools.

EDUCATION

MS in Business Analytics - Texas A&M University

Jan 2023 – May 2024

BS in Computer Science & Engineering – SV College of Engineering

Jul 2015 – May 2019

TECHNICAL SKILLS

- Programming & Scripting:** Python (pandas, NumPy, SciPy, scikit-learn), SQL, R, Bash
- Database Management:** SQL Server, MySQL, PostgreSQL, Oracle, NoSQL (MongoDB)
- ETL & Data Processing:** SSIS, Apache Spark, Airflow, Alteryx, Data Warehousing
- Data Analysis & Visualization:** Tableau, Power BI, Matplotlib, Seaborn, Excel (Pivot Tables, VLOOKUP)
- Big Data & Cloud:** AWS (S3, RDS, Redshift, Lambda), Google BigQuery, Azure Data Factory
- Query Optimization & Performance Tuning:** Indexing, Execution Plans, CTEs, Stored Procedures
- Machine Learning & Predictive Analytics:** Scikit-learn, TensorFlow, Regression Models, Time Series Forecasting
- Version Control & CI/CD:** Git, GitHub, Jenkins, Docker
