Profile

Results-driven Data Analyst with 4+ years of experience transforming raw data into strategic insights that improve decision-making, operational efficiency, and business performance. Proficient in SQL, Python, and R, with deep expertise in building automated ETL pipelines, designing enterprise dashboards, and performing advanced statistical and business analysis. Hands-on experience working with large-scale databases (MS SQL, Oracle, PostgreSQL, Snowflake, BigQuery), BI tools (Power BI, Tableau), and cloud platforms (AWS, GCP, Azure). Adept at KPI development, A/B testing, risk analysis, and data governance, with strong communication skills and experience supporting Agile/Scrum delivery.

Skills

Programming & Scripting — Python, R, Java, SQL (T-SQL, PL/SQL), Bash scripting

Visualization & Reporting Tools — Power BI, Tableau, Looker Studio, Excel (Advanced), SSRS

Databases & Data Engineering — MS SQL Server, Oracle, MySQL, PostgreSQL, IBM DB2, Snowflake, Google BigQuery, MongoDB, Data Warehousing, Data Modeling, Data Migration, Data Quality, Data Profiling

Cloud Platforms — AWS (EC2, S3, RDS, Glue, Lambda), Google Cloud Platform (GCP), Microsoft Azure

Analytics & Statistical Techniques — EDA, Descriptive & Diagnostic Analytics, Time Series Analysis, Regression Analysis, A/B Testing, Risk Analysis, GAP Analysis, Cost/Benefit Analysis, Impact Analysis, KPI Development, UAT

Data Tools — Apache Airflow, dbt (Data Build Tool), Snowflake SQL, Power Query, Alteryx, Git, Jupyter Notebooks

ERP/CRM Systems — Workday, PeopleSoft, Salesforce

Methodologies & Collaboration — Agile/Scrum, SDLC, Waterfall, UML, Stakeholder Communication, Jira

Professional Experience

Business Analyst, IT Pros 03/2024 – Present

- Developed, automated, and maintained large-scale ETL pipelines using Python and SQL, reducing manual reporting time by 40% and improving data refresh reliability across departments.
- Designed highly interactive Power BI and Tableau dashboards that transformed executive reporting workflows, improving insight delivery and decision-making efficiency by 30%.
- Conducted statistical analysis to derive insights and create clear specifications and documentation that guide software development, test case design, and SDLC activities.
- Collaborate with cross-functional teams to support project management efforts and drive continuous process improvement across business and technical workflows.
- Conducted A/B testing and detailed impact analysis on marketing campaigns, uncovering performance gaps and improving campaign conversions with data-driven recommendations.
- Performed extensive data profiling, anomaly detection, and risk analysis to improve overall data integrity, ensuring consistent compliance with internal governance standards.
- Optimized enterprise databases (PostgreSQL, Snowflake, BigQuery) by restructuring queries, indexing, and refining data models—resulting in significantly faster analytical queries.
- Worked cross-functionally with business leaders to define KPIs, build automated reporting frameworks, and streamline decision cycles, reducing turnaround time by 20%.
- Supported UAT planning and execution for analytics releases, validating outputs, documenting issues, and ensuring seamless adoption by business users.

Business Analyst, Smartfox 01/2021 – 07/2022

- Developed complete BI reporting solutions using Tableau and Power BI, creating multi-layer dashboards that improved visibility of operational and sales KPIs by 35%.
- Automated recurring reporting workflows using Python, SQL, and R—reducing reporting cycle times by 45% and increasing accuracy with repeatable, documented processes.
- Conducted exploratory and diagnostic analytics on sales, customer, and operational datasets, identifying performance patterns that contributed to a 12% revenue uplift.
- Collaborated closely with Agile/Scrum teams to define sprint goals, break down analytical requirements, and deliver reliable data-driven insights within project timelines.
- Strengthened data governance by implementing validation frameworks and profiling checks, raising data accuracy by 20% and reducing discrepancies across reports.
- Designed KPI dashboards to track efficiency, customer retention, and cost trends—helping leadership reduce operational costs by 15%.
- Delivered presentations to senior management summarizing insights, trends, risks, and recommendations, directly influencing \$2M+ in strategic business decisions.

Education

Masters in Information Technology, Atlantis University 08/2022 – 08/2024

Bachelors in Civil Engineering, JNTUK 07/2015 – 07/2021
