Professional Summary

- Highly analytical and data-driven Yield Data Analyst with 3+ years of experience identifying, analyzing, and interpreting trends in complex data sets to maximize performance and optimize monetization strategies
- Proactive, self-motivated problem solver with intellectual curiosity and entrepreneurial mindset, thriving in fast-paced dynamic environments while managing multiple priorities and stakeholders
- Advanced skills in SQL, Excel, and Google Sheets for working with large complex data sets; experienced in data visualization and presentation tools to tell compelling stories with data
- Detail-oriented and organized professional with strong written and verbal communication skills to explain complex analytical insights and strategies to both technical and non-technical audiences
- Hands-on experience with machine learning tools, AB testing frameworks, root cause analysis, and data integrity projects to drive data-driven best practices and innovative solutions
- Adept at collaborating cross-functionally with Business Intelligence, Product, Engineering, Customer Success, and Business Development teams to implement initiatives and monitor KPIs

Technical Skills

- **Languages:** SQL (advanced queries), Python, R, Java
- **Data Analysis & Visualization:** Tableau, Power BI, Excel (pivot tables, VLOOKUP, advanced functions), Google Sheets, Matplotlib, Seaborn
- **Machine Learning & AI:** Scikit-learn, TensorFlow, Keras, Pandas, NumPy, LLMs, Machine learning tools for data analysis
- **Databases:** MySQL, SQL Server, PostgreSQL
- **Statistical Methods:** Regression analysis, AB testing, Hypothesis testing, Cluster analysis, Time-series analysis, Root cause analysis
- **Data Science & Analytics:** Data extraction, Data cleaning, Complex data sets analysis, Trend identification, Anomaly detection, Predictive modeling
- **Tools & Technologies:** Jupyter Notebook, Git, SAS, ETL tools, Monitoring and alerting systems, QA tools
- **Core Competencies:** Performance monitoring, KPI tracking (fill rate, eCPM, revenue, latency, viewability), Issue identification and diagnosis, Best practices implementation, Data-driven insights, Customer success support, Cross-functional collaboration, Business intelligence, Communication (written and verbal), Detail-oriented analysis, Self-motivated problem solving, Industry trends analysis, User experience optimization, Project management, Fast-paced execution, Innovation and growth initiatives

Professional Experience

Data Analyst

Gordon Food Services, Kentwood, MI

May 2024 – Present

- Identified, analyzed, and interpreted trends in complex data sets to maximize performance and optimize supply chain operations, producing actionable insights and data-driven strategies for growth initiatives

- Developed and maintained analytic monitoring and alerting systems to ensure rapid identification and diagnosis of revenue-affecting issues and performance drops across business units
- Built AB testing frameworks for campaign optimization, including reporting and result interpretation, ensuring technical QA for new initiatives and product launches
- Performed root cause analysis for data and operational problems, investigating and responding to issues to maximize yield without compromising user experience or service quality
- Collaborated cross-functionally with procurement, logistics, finance, Customer Success, Business Development, and Engineering teams to implement data-driven best practices and monetization strategies
- Monitored macro and micro trends, providing proactive alerting on network-level issues and tracking key KPIs including fill rate, revenue, latency, and performance metrics
- Produced data-driven summaries and actionable insights for internal teams and executives, ensuring technical accuracy and clear communication for both technical and non-technical stakeholders
- Demonstrated strong written and verbal communication skills by presenting complex analytical findings to external and internal stakeholders, influencing strategic decision-making
- Acted as subject matter expert for data capabilities, supporting data integrity projects and serving as a self-motivated problem solver in fast-paced environment
- Project managed yield and data initiatives from planning through successful implementation, ensuring clarity, accountability, and effective communication while wearing many hats
- Utilized advanced Excel and Google Sheets skills to work with large complex data sets, extracting insights that supported innovative solutions and industry best practices
- Stayed up-to-date on industry trends and emerging opportunities, recommending and piloting innovative optimization solutions with entrepreneurial founder mindset

Environment: Python, SQL, Tableau, Power BI, Excel, Google Sheets, AWS, Jupyter Notebook, Git, Machine Learning Tools

Data Analyst

Infinite Computer Solutions, Hyderabad, India

June 2021 – July 2023

- Extracted and analyzed data from complex data sets to surface trends, anomalies, and optimization opportunities, providing recommended changes to enhance performance outcomes
- Developed monitoring systems and dashboards using Tableau and Power BI, enabling rapid identification of issues and performance monitoring for client operations
- Supported cross-functional teams in implementing data-driven best practices, collaborating with Business Intelligence, Engineering, and Customer Success teams to drive growth
- Conducted AB testing analysis and built testing frameworks, performing technical QA and result interpretation to validate model improvements and product initiatives
- Performed root cause analysis using statistical methods and machine learning techniques, investigating technical and operational issues to maximize efficiency and user experience
- Monitored key KPIs and provided proactive alerting on site-level issues, tracking performance metrics including latency, accuracy, and operational efficiency
- Demonstrated detail-oriented approach to data analysis, working independently and as part of broader team to manage multiple priorities in fast-paced environment
- Produced compelling data visualization and presentations using Tableau, deriving analytic insights and presenting findings to internal and external stakeholders with strong written and verbal communication skills

- Applied self-motivated problem-solving skills and intellectual curiosity to independently explore and solve complex analytical challenges, reducing unplanned downtime by 20%
- Collaborated cross-functionally with engineering and business development teams to engineer automated data ingestion processes, implementing innovative solutions for data integrity
- Utilized advanced Excel and Google Sheets functions to work with large complex data sets, supporting customer success initiatives and business optimization
- Stayed adaptable and resourceful in rapidly changing environment, applying industry trends knowledge and best practices to deliver actionable insights for client growth

Environment: Python, SQL, Tableau, Excel, Google Sheets, Power BI, Jupyter Notebook, Pandas, NumPy, Machine Learning

Education

Master of Science in Computer Science

University at Albany, State University of New York, NY, USA August 2023 – May 2025 *Emphasis on Data Science, Statistics, and quantitative analysis*

Bachelor of Technology in Computer Science

Vignan Foundation for Science Technology and Research (VFSTR University), India 2019 – 2023
Strong foundation in Mathematics, Business Analytics, and data analysis

Certification

Oracle MySQL Implementation Associate (1Z0-922) – Oracle.
