SKILLS

Programming: Python, SQL, Java, JavaScript, TypeScript, HTML/CSS

Frameworks/Libraries: React, React Native, Pandas, Numpy, sklearn

Databases: SQL Server, Azure SQL, Firebase (NoSQL)

Data/Backend: ETL pipelines, data modeling, data validation

Cloud/Tools: Microsoft Azure, Git, Jupyter Notebooks, Tableau

Languages: English, Japanese

EDUCATION

University of Washington

2022 — 2025

Bachelor of Science in Informatics (Data Science)

- GPA: 3.8 | Deans List: 6 quarters

Relevant Coursework: Data Structures and Algorithms, Database Design & Management, Client-Side Development, Machine Learning, Data Visualization, Statistical Analysis

EXPERIENCE

Intern, Seattle JACL and Densho

Dec 2022 — April 2023

- Cataloged and structured large archival datasets for long-term digital preservation.
- Ensured data consistency and accuracy through validation and standardized formatting.
- Collaborated with project stakeholders to ensure datasets met research and compliance requirements.

Cashier, Hiroshi's Poke

July 2023 — July 2025

- Worked in a fast-paced environment requiring accuracy, time management, and clear communication.

Team Member/Team Lead, Panera Bread

July 2021 — Aug 2022

- Recognized as Employee of the Month (Oct 2021) for reliability and leadership.

RELEVANT PROJECTS

Analog Club Website/Database

Team Project

Languages/Tools: JavaScript, React, Firebase, Figma

- Built features for a React web application to manage photographs and event data.
- Designed document-based NoSQL schemas optimized for real-time reads and writes.
- Collaborated with designers to translate Figma mockups into functional UI components.

Sub-UW (subletting app)

Team Project

Languages/Tools: JavaScript, TypeScript, React-Native, Expo, Firebase

- Developed a mobile app to create, browse, and manage sublet listings.
- Implemented CRUD operations for listings with Firebase's NoSQL schema and user authentication.
- Designed Firestore schemas to query listings by housing amenities.
- Worked closely with teammates to iterate on features and improve usability.

Drug Overdose by Demographics Analysis

Datathon 2024

Languages/Tools: Python, xgboost, sklearn, Jupyter Notebooks

- Built end-to-end data processing and predictive modeling pipeline under a 48 hour deadline.
- Achieved 0.97 R^2 score and 0.21 RMSE on test set, demonstrating high model accuracy.

Vaccine Scheduler

Database Project

Languages/Tools: Java, JDBC, SQL, Microsoft Azure

- Designed a relational database schema for managing vaccine appointments and users.
- Built a Java backend using JDBC to handle validated CRUD operations and enforce data integrity.
- Deployed and configured an Azure SQL database, gaining experience with cloud-hosted systems.
