

Sai Dinesh Gopu

Data Analyst

Location: Texas, USA | Mail: dineshgopu139@gmail.com | Ph: 2144874277 | [Linkedin](#)

PROFESSIONAL SUMMARY:

- Data Analyst with 3+ years of experience leveraging data to drive impactful business decisions.
- Expertise in data analysis, visualization and predictive modeling utilizing a diverse range of tools and technologies, including Python (Pandas, Matplotlib, Seaborn, Scikit-learn), SQL (MySQL, PostgreSQL, Snowflake, Teradata, BigQuery), Tableau, Power BI, Excel (VBA), AWS (Redshift, Glue), Azure Synapse Analytics, Talend, Apache Airflow, SSIS, machine learning, statistical analysis and data mining techniques.
- Demonstrated ability to collaborate effectively with cross-functional teams, communicate complex findings to stakeholders and deliver high-quality, data-driven solutions that meet business objectives.
- Proven experience in adhering to industry best practices, including data governance, compliance regulations (HIPAA, Basel III, KYC, AML) and Agile methodologies.

TECHNICAL SKILLS:

Data Analysis & Visualization:	Python (Pandas, Matplotlib, Seaborn, Scikit-learn), Power BI, Tableau, Google Optimize, Excel (VBA Macros, Advanced Functions)
ETL & Data Processing:	Talend, Apache Airflow, SSIS, AWS Glue, Dataflow, Data Fusion, Google BigQuery, Snowflake, Teradata, Azure Synapse Analytics
Machine Learning & AI:	Scikit-learn, TensorFlow, Keras, XGBoost, Regression Modeling, Time-Series Forecasting, Predictive Analytics, Model Deployment, Anomaly Detection, Supervised & Unsupervised Learning, A/B Testing, Hyperparameter Tuning, Natural Language Processing (NLP)
Statistical Analysis:	Hypothesis Testing (T-tests, Chi-square, ANOVA), Regression Analysis, Scenario Simulations, Root Cause Analysis, Probability Distributions, Statistical Modeling
Database Management & Warehousing:	MySQL, PostgreSQL, Snowflake, Teradata, Amazon Redshift, Azure Synapse, SQL Server, BigQuery, SQL (Complex Queries, Optimization), OLAP, OLTP
Data Governance & Healthcare Standards :	HIPAA, HL7, FHIR, ICD, KYC, AML, Basel III, RBI Guidelines, Data Interoperability, Data Privacy Regulations, Data Governance Protocols
Project Management & Collaboration:	Agile, Scrum, Jira, Trello, Confluence, Git, GitHub, SVN, Project Documentation, Task Management
Data Integration & Engineering Tools :	Apache Kafka, Databricks, DBT, Dataflow, Spark, Data Pipelines, Data Profiling, Data Architecture, Database Building, Data Transformation
Cloud Platforms:	AWS (Redshift, Glue, S3), Azure (Synapse, Data Factory), GCP (BigQuery, Cloud Storage, Pub/Sub), Databricks
Data Mining & Reporting :	Advanced Analytics, Forecasting & Modeling, Data Cleaning, Data Wrangling, Data Reporting, Reporting Automation, Business Insights, Customer Segmentation, Credit Risk Scoring
Operating System:	Mac OS, Windows, Linux

EDUCATION:

Master of Business Analytics - University of Texas at Dallas, TX, USA

Bachelor of Business Administration - K L University, Vijayawada Andhra Pradesh, India

PROFESSIONAL EXPERIENCE:

UnitedHealth Group – TX | Jan 2024 – Present

Data Analyst

- Conducted comprehensive exploratory data analysis (EDA) using Python libraries like Pandas, Matplotlib and Seaborn to identify actionable trends, anomalies and patterns, resulting in improved patient care strategies.
- Designed and maintained interactive dashboards in Tableau, visualizing key operational KPIs such as patient wait times, admission/discharge trends and readmission rates, enabling stakeholders to make data-driven decisions.
- Developed advanced machine learning models for disease risk prediction and patient clustering, achieving a 20% improvement in early diagnosis accuracy for chronic conditions.
- Automated and optimized ETL workflows using Talend and Apache Airflow, reducing data processing time by 30% and ensuring reliable data ingestion from multiple healthcare systems.

- Performed rigorous statistical analysis including hypothesis testing (T-tests, Chi-square, and ANOVA) to validate the effectiveness of healthcare interventions and policy changes.
- Ensured strict compliance with HIPAA regulations, ICD coding standards, and HL7 protocols, maintaining data integrity and confidentiality across all reporting activities.
- Collaborated cross-functionally with clinicians, IT teams, and business stakeholders through Agile methodologies using Jira and Confluence, delivering project milestones on schedule.
- Designed predictive analytics models for patient admission volume forecasting, leading to a 15% reduction in resource bottlenecks and enhanced workforce planning.
- Utilized Snowflake and Teradata for large-scale data warehousing and executed complex SQL queries to streamline data extraction, transformation, and analysis.
- Developed dynamic Excel VBA macros and leveraged advanced Excel functions to generate tailored reports for executive-level ad-hoc analysis, reducing report turnaround time by 40%.
- Maintained and optimized ETL pipelines using SSIS and integrated them with Azure Synapse Analytics, enabling scalable and efficient data storage solutions.
- Implemented a root-cause analysis (RCA) framework to identify and resolve data quality issues, improving the accuracy of reports and ensuring informed decision-making.

Cognizant – India | January 2021 - December 2022

Data Analyst

- Engineered a robust ETL pipeline utilizing Python and Talend, achieving a 30% reduction in data processing time, which facilitated timely access to critical financial data for strategic decision-making.
- Developed advanced predictive models using Scikit-learn to analyze customer datasets, enhancing credit risk identification accuracy by 15% and thereby improving loan approval processes.
- Created dynamic dashboards in Power BI that visualized key financial metrics such as revenue growth and cost savings, resulting in a 25% increase in stakeholder engagement during quarterly presentations.
- Employed Google BigQuery for comprehensive analysis of financial transactions, leading to a 40% decrease in query execution time and enabling real-time insights crucial for risk management and compliance monitoring.
- Collaborated with cross-functional teams to implement stringent data quality checks ensuring compliance with Basel III regulations, which enhanced data accuracy by 20%, thus mitigating regulatory risks.
- Conducted sophisticated statistical analyses, including regression modeling and time-series forecasting to provide actionable insights that informed investment strategies and improved portfolio performance.
- Established comprehensive data governance practices to ensure adherence to KYC (Know Your Customer) and AML (Anti-Money Laundering) regulations, enhancing the integrity of customer data management.
- Designed and executed A/B tests to evaluate the performance of new financial products, providing data-driven recommendations that improved product offerings based on customer feedback.
- Leveraged advanced Excel functionalities such as pivot tables and macros to perform in-depth financial analyses, streamlining reporting processes and enhancing data interpretation capabilities.
- Oversaw MySQL and PostgreSQL database systems to ensure optimal performance, security, and reliability of financial data storage solutions, facilitating seamless access for analytical tasks.
- Conducted thorough risk assessments on investment portfolios using scenario simulations to identify vulnerabilities and recommend strategic adjustments.
- Actively engaged in project management activities using tools like Jira and Trello for task tracking and team collaboration, ensuring timely delivery of analytical projects aligned with business objectives.
