SUMMARY

Data Analyst with 4+ years across product analytics, healthcare compliance, and client-facing BI. Skilled in SQL, Power BI (DAX), Python, Excel automation, and Tableau - translating behavioral, claims, and revenue data into decisions that cut reporting effort by 55%, reduced operational backlogs by 22%, and prevented \$1.9M in compliance exposure. Experienced in post-release analytics QA, cohort tracking, and HIPAA-aligned reporting. Partner with cross-functional stakeholders and AI/ML teams to validate production feature signals and data quality before model releases.

WORK EXPERIENCE

INTUIT, Data Analyst

Jul 2024 - Present

- **Owned post-release analytics QA** for tax-filing and payment events; used SQL warehouse checks at row/timestamp level to identify duplicates and late-arriving records, reducing daily KPI volatility by **21%**.
- Defined and implemented **Power BI DAX** measures for refund, acceptance, and error-state KPIs; delivered a daily **performance dashboard** to **cross-functional stakeholders**, reducing incident **triage time by 35%**.
- Ran post-release analytics validation in **Python (Pandas)** on raw event exports to confirm volume counts, ordering, and null handling before KPIs were cleared for leadership reporting.
- Reworked cohort retention and retry-failure tracking by **correcting session stitching logic in the data layer**, which improved repeat-user measurement accuracy by **17%** for quarterly product reviews.
- Worked directly with the **AI/ML team** to sanity-check real-time feature inputs and anomaly flags in **Python**, ensuring training signals matched live user behavior before each model refresh.

HUMANA, Business Data Analyst

Jan 2024 - Jun 2024

- Audited Medicare Advantage claims in **SQL** against CMS reimbursement rules, flagging billing mismatches that prevented **\$1.9M in potential compliance exposure** during internal reviews.
- Built monthly compliance monitoring dashboards in **Power BI (DAX)** using enrollment, provider, and claims tables, helping Ops teams close audit findings **32% faster** across two regional plans.
- Automated prior-authorization and denial tracking using **Excel (VBA + macros)**, replacing manual case logs and reducing repeat denial turnaround time by **14%** within one quarter.
- Validated eligibility and risk-adjustment feeds using **SQL checks and reconciliations under HIPAA-aligned data handling rules**, cutting downstream reporting defects by **41%** before submission to compliance and regulatory teams.

SAGE SOFTTECH, Business Intelligence Analyst

Feb 2020 – Aug 2022

- Built end-to-end sales and revenue dashboards in **Tableau** using cleaned **SQL** warehouse tables, which helped leadership track monthly conversions and cut manual reporting effort by **55%** across three client accounts.
- Pulled raw CRM, billing, and web-traffic data using SQL joins and window functions; **built a funnel drop-off view** that exposed broken lead-to-sale handoffs and **improved qualified lead conversion by 18%** after process fixes.
- Automated weekly business performance reports in **Excel (Power Query + Pivot models)**, replacing static exports and saving nearly **12 hours per week** for ops and account managers.
- Created customer churn and usage tracking models in **Python (Pandas)** using session and transaction logs, helping product teams isolate drop-off behavior and recover **9% lost active users** within two quarters.
- Standardized multi-client reporting **ELT pipelines by transforming** raw feeds into structured **fact and dimension tables in SQL**, which stabilized dashboard refresh failures and improved data trust during client reviews.

TECHNICAL SKILLS

Data Analysis & Statistical Methods: EDA, Root Cause Analysis, Variance Analysis, Cohort Analysis, Funnel Analysis, Statistical Analysis, Hypothesis Testing, A/B Testing, Regression Analysis, Clustering, Time Series Analysis, Predictive Modeling, KPI Definition, Data Storytelling, Trend Analysis, Business Insights

Business Intelligence & Data Visualization: Power BI (DAX), Tableau, Looker, Power Query, Churn Analysis, Customer Segmentation, Retention Strategies, Marketing Campaign Analysis, Anomaly detection

Data Engineering & Cloud Platforms: Data Pipelines, ETL, Data Modeling, Data Warehousing, Data Transformation, Apache Airflow, Informatica, Databricks, Cloud Data Warehousing, Snowflake, Amazon Redshift, Google BigQuery, AWS

Programming & Scripting: Python (NumPy, Pandas, Matplotlib, SciPy, scikit-learn, Seaborn), SQL, Jupyter Notebooks, Reporting automation, data cleaning, aggregation, workflow orchestration, Statistical software, SAS

EDUCATION

San Jose State University, Master of Science in Software Engineering | GPA: 3.7/4.0

Aug 2022 - May 2024

CERTIFICATES

AWS Academy Graduate - Cloud Architecting (Amazon Web Services) | AI For Everyone - Coursera | Structuring Machine Learning Projects - Coursera
