EDUCATION

MS in Data Science and Analytics

Florida Atlantic University

January 2024- December 2025

SKILLS

- Programming & Data Analysis:
 - Python (Pandas, NumPy, Matplotlib, Seaborn)
 - SQL
 - Excel
- Data Visualization
 - Power BI
- Git
- Gen AI

ACHIEVEMENTS

- Award for Academic Excellence
 - Spring 2024 and Spring 2025
- McGraw-Hill: Excel Yellow Belt Certificate
- CodePath interview prep completion Certificate
- CodePath Peer Mentor completion Certificate

About Me

Motivated and detail-oriented Graduated in Data Science and Analytics from Florida Atlantic University, seeking a Data Analyst role to apply strong skills in data cleaning, statistical analysis, and visualization using tools like SQL, Python, and Power BI. Eager to contribute to data-driven decision-making by transforming complex datasets into actionable insights that support business goals.

RELEVANT EXPERIENCE

December 2025

Customer Shopping Behavior Analysis

- Cleaned and transformed customer shopping data using Python (Pandas); stored and analyzed data in PostgreSQL using advanced SQL (CTEs, window functions, segmentation).
- Built an interactive Power BI dashboard to analyze customer behavior, subscriptions, revenue trends, age groups, and category performance.
- Delivered business insights and recommendations identifying high-value customers, subscription revenue uplift, and growth opportunities across product categories.

September 2025- Present

COVID-19 Global Impact Analysis

- Conducted comparative analysis of COVID-19 cases, deaths, hospitalizations, and vaccination coverage across multiple countries and continents
- Tracked key performance indicators (KPIs), including ICU occupancy rates, mortality trends, and vaccine rollout timelines
- Applied time-series analysis to evaluate pre- and post-vaccination mortality shifts, highlighting policy-relevant insights
- Built interactive dashboards to visualize global trends and support data-driven decision-making for public health stakeholders

January 2025 - February 2025

E-commerce SQL Data Analysis Project

- Performed customer segmentation using clustering techniques to enable targeted marketing campaigns, resulting in a 15% increase in engagement.
- Conducted market basket analysis to identify product pairing opportunities, leading to a 12% boost in cross-selling and upselling strategies.
