PROFILE

Results-driven Data Analyst with 5 years of experience in harnessing the power of data to deliver actionable insights, drive predictive models, and elevate data visualization strategies. Expertise in delivering optimized ETL workflows that enhance operational efficiency and scalability. Spearheaded initiatives that reduced manual processes by 40%, improved data accuracy, and increased team productivity. Skilled in big data technologies and statistical analysis, consistently empowering organizations to make data-driven decisions that fuel business growth. Known for leveraging a combination of strategic problem-solving, attention to detail, and strong communication skills to drive collaborative success and deliver impactful, measurable outcomes.

SKILLS

- Programming Languages:** Python, R, Java, C#, TypeScript, Groovy
- Data Tools & Technologies:** Excel (Pivot tables, XLOOKUP, VLOOKUP, Macros & VBA), Tableau, Power BI(DAX), Looker
- Statistical Analysis & Machine Learning:** Hypothesis testing, Regression analysis, Predictive modeling, Clustering, A/B testing
- Databases:** MySQL, PostgreSQL, Snowflake, Google BigQuery, Oracle, SQL Server, MongoDB, Amazon Redshift, NOSQL
- Big Data & ETL Tools:** Apache Spark, Hadoop, Databricks, Informatica, Apache Airflow, Kafka
- Testing & QA Tools:** Selenium, Postman, SoapUI, Protractor, Tosca, Cucumber, API Testing,
- Cloud Platforms:** AWS, Azure, Google Cloud Platform
- Visualization & Reporting:** Dashboards and KPIs, Interactive visuals, Storytelling with data, Google Data Studio, Qlik Sense, Looker, D3.js, Plotly, Matplotlib, Seaborn, Pandas, Numpy, Microsoft Excel, Apache Superset, Kibana
- Additional Technical Proficiencies:** Rest API'S, Webservices, Power Automate, Power Apps, SDLC, Agile & Waterfall methodologies, Gap analysis, Root Cause Analysis, GA4, Attribution Modeling, Google Tag Manager, Legacy API's, GitHub, Gitlab, Jira, Advanced modeling (Star, Snowflake Schema), Data Governance, Visio, Draw.io, MS Word, Confluence, MS Powerpoint, BRD/FRD creation

PROFESSIONAL EXPERIENCE

Data Analyst | Fidelity Investments May 2024 – Present

- Proficient in data wrangling using Python (Pandas, NumPy) and SQL for data cleaning, transformation, and preprocessing
- Designed and automated end-to-end ETL workflows using Python, SQL, and Apache Airflow, streamlining data ingestion from multiple sources and reducing manual effort by 40%.
- Developed and optimized complex SQL queries, stored procedures, and database views in Snowflake and PostgreSQL, significantly improving query performance and reducing execution time by 30%.
- Built and maintained interactive dashboards in Power BI, enabling stakeholders to track KPIs in real time, identify trends, and make data-driven decisions. This led to a 15% revenue boost through proactive marketing strategies.
- Conducted statistical analysis and predictive modeling, including hypothesis testing, regression analysis, and clustering, to uncover actionable insights. These insights played a key role in improving operational efficiency and forecasting accuracy.
- Partnered with business and technical teams to establish data governance standards, ensuring data accuracy, integrity, and security while maintaining compliance with regulatory requirements.

Business Data Analyst | Connectial Infosolutions Pvt LTD, India Jul 2019 – Dec 2022

- Led the development of data-driven solutions to optimize business intelligence and reporting. Designed dashboards and reports using SQL, Python, and Power BI, providing executives with real-time insights to drive operational improvements.
- Spearheaded the design and implementation of data warehouse architectures in Snowflake, Redshift, and PostgreSQL, ensuring efficient data storage, retrieval, and analytics performance.
- Automated and optimized ETL pipelines using Apache Airflow and Informatica, eliminating manual data handling and reducing reporting time by 30%, leading to higher productivity across teams.
- Designed and deployed predictive analytics models for sales forecasting, customer segmentation, and demand planning, enabling proactive decision-making and increasing revenue by 15%.
- Conducted A/B testing and in-depth statistical analysis to measure the impact of various marketing and pricing strategies, ensuring that business decisions were supported by robust data insights.
- Established and enforced data validation, governance, and security measures, ensuring data accuracy above 99% and maintaining compliance with industry best practices.

Data Modeler/Analyst | Connectial Infosolutions Pvt LTD, India Sept 2018 – Jun 2019

- Designed scalable data models using dimensional modeling techniques, ensuring efficient data organization and retrieval. This improved query performance by 30%, reducing wait times for business reports.
- Developed and maintained fact and dimension tables to support data warehousing solutions, allowing for seamless integration with business intelligence tools and real-time analytics.
- Created entity-relationship (ER) diagrams, logical and physical data models, and standardized data structures to enable faster decision-making and more efficient database management.
- Implemented data validation, normalization, and integrity checks, maintaining high data quality and ensuring consistency across all analytics reports.
- Worked closely with engineering and business teams to align data models with evolving business needs, ensuring that the company's data infrastructure supported scalability and long-term growth.

EDUCATION

Master's in Applied Computer Science Jan 2023 – Apr 2024
Grand Valley State University, Allendale, USA

Bachelors in Electronics and Communications Engineering Jun 2014 – Apr 2018
Sathyabama University

CERTIFCATIONS

- [Google Data Analytics Professional Certificate](#)
- [Power BI](#) - Master Power BI desktop for data prep, data analysis, data visualization & dashboard design.
- Database management badge
- AWS Certified Cloud Practitioner
