PROFESSIONAL SUMMARY

- Around **5+** years of experience in analysis, design, development, testing of Web, Client/Server based large Scale Distributed applications across the entire **SDLC** using **Java** and **J2EE** technologies.
- Engaged in development of Restful Web Services, using Spring Boot, Spring Cloud, Spring MVC, JPA, HQL, Spring Security, AOP and AWS.
- Expertise in developing **Micro services** using **Spring Boot** and **Node JS** to build more physically separated modular applications which will improve scalability, Availability, Agility of application.
- Designed and deployed scalable **microservices** architectures using cloud-native technologies. Containerized applications with Docker and orchestrated services using Kubernetes for efficient deployment and scalability. Leveraged cloud platforms (**AWS, GCP, or Azure**) to deploy and manage enterprise-level applications.
- Experience with Pulumi and Terraform to provision and manage cloud infrastructure efficiently. Cloud Automation: Automated cloud deployments using Pulumi (Python/TypeScript) and Terraform.
- Designed and developed scalable, resilient **microservices** using Spring Boot and **Golang**. RESTful API Development: Built and maintained REST **APIs** with efficient request handling, authentication, and security best practices..
- Utilized **spring framework** for **dependency injection**, **Spring Web MVC** for the controllers and created annotation-based mapping using **Hibernate ORM tool**.
- Built and maintained scalable web applications using **Ruby** on Rails. Designed and implemented secure and efficient REST APIs with Rails. Active Record & Database Management: Optimized database queries and schema design using Active Record and PostgreSQL/MySQL.
- Built dynamic, interactive web applications using modern JavaScript (ES6+), Worked with **SASS/SCSS** to maintain scalable and maintainable styles. Animation & Transitions: Enhanced UI/UX with **CSS** animations and transitions for a smooth user experience.
- Experience in using various **JavaScript** Web application related libraries such as **Node Js, Angular, React js** and **jQuery UI**.
- Experience in using various **Amazon Web Services (AWS)** like **EC2** for virtual servers, **S3** for storing objects, **Elastic Beanstalk**, **ElastiCache** and **DynamoDB** for Elastic load balancing, storing data.
- Proficient in using Amazon Web Services (**AWS**). Extensive experience focusing on services like **EC2, Elastic Beanstalk, CloudWatch, CloudFront, CloudFormation, IAM, S3, RDS, Elastic Cache, SNS, SQS**.
- Strong experience in developing **Single Page Application (SPA)** using **Angular** and Node frameworks.
- Experienced in Microsoft **Azure** Development, Enhanced on **Azure** web application, App services, Azure Storage, **Azure SQL, Azure AD, Azure search, and notification hub**.
- Experienced in developing messaging modules by using **Apache Kafka, Active MQ and RabbitMQ**.
- Developed and maintained scalable backend services using Ruby on Rails and **Golang**. Built **RESTful APIs** and microservices in **Go** and **Ruby**, ensuring high performance and maintainability.
- Expertise in **DevOps** and **CI/CD** tools like **Jenkins, Chef, Maven, and Cloud Formation**.
- Experience in working with the **NoSQL** Database like **MongoDB, Cassandra** to manage extremely large data sets.
- Enhanced with build tools like **ANT, Maven, Gradle** and logging tools like **Log4J** to capture the log that includes runtime exceptions.
- Expertise in unit-testing with tools like **JUnit, Mockito** and **TestNg** and perform unit and system testing.
- Designed efficient, normalized relational database schemas for scalable applications, Experienced with PostgreSQL, MySQL, Redis, and MongoDB for structured and unstructured data. Created ER diagrams and relational models to define data relationships.

TECHNICAL SKILLS

Programming Languages	C++,Java/J2EE, Python, SQL, PL/SQL.
Frameworks	Angular, Bootstrap, React.JS,Regex, Node.JS, Vue.JS, Struts, Spring, Hibernate, JPA,kafka.
Java Enterprise API	Servlets, JSP, EJB, JMS, JDBC, Java Multithreading, Web services
Cloud Technologies	AWS, Azure
Databases & Programming	MySQL, SQL, PL/SQL, Oracle, MongoDB, SQL Server, PostgreSQL, DynamoDB,Cosmos DB.
Software Engineering	UML, Design Patterns, Object Oriented Methodologies, Service Oriented Architecture, Test Driven Development, Scrum and Agile methodologies
XML Technologies	XSS,XML,XLST, DTD, SAX, DOM, SOAP, WSDL, XPath
Application Servers	Apache Tomcat, Apache Camel, JBoss, WebLogic, IBM WebSphere
Operating Systems	Windows, Linux, UNIX.
IDEs & Tools	GIT, JIRA, Maven, STS, IntelliJ Eclipse, NetBeans, JUnit, Mockito, Log4j, Soap UI, Bitbucket, CVS, MS Visio, Putty, SVN, jasmine, karma, kafka,Kettle,Talend.
DevOps Tools	Jenkins, Docker, Azure DevOps, Kubernetes, SonarQube, CI/CD

PROFESSIONAL EXPERIENCE

BMO Harris Bank Chicago,IL

Sep 2023- Present

Java Developer

Responsibilities:

- Developed full-stack enterprise applications using **Java**, **Spring Boot**, **MySQL**, and **Angular 8**, ensuring efficient, scalable, and secure web solutions.
- Developed scalable and high-performance enterprise applications using Java (Spring Boot) and **ReactJS**.**Microservices** Architecture: Designed and implemented **RESTful** APIs and **microservices** using Java and integrated them seamlessly with React-based front-end.
- State Management: Utilized React hooks, Context API, and Redux for efficient state management in complex applications.
- Implemented real-time monitoring and alerting using **DataDog** to ensure application reliability and performance.Configured custom dashboards and metrics in **DataDog** for effective system observability.Utilized DataDog APM (Application Performance Monitoring) to identify and optimize performance bottlenecks.
- **Algorithm** Optimization Designed and implemented efficient algorithms to improve application performance and reduce time complexity.Data Structures Expertise Proficient in using arrays, linked lists, stacks, queues, trees, graphs, and hash tables for **optimal problem-solving**.
- Utilized **Java 8** features such as streams, **lambda expressions**, and functional interfaces to enhance code readability and performance.
- Designed and developed microservices-based applications using **Spring Core**, **Spring MVC**, **Spring Data JPA**, **Spring Security**, **Spring Batch**, and **Spring Boot**, ensuring seamless system integration.
- Experience with Compute Engine, App Engine, Cloud Run, and **Kubernetes** Engine (**GKE**) for deploying and managing **scalable** applications.
- Managed code repositories using Git and GitHub, ensuring seamless collaboration through pull requests, branching strategies, and code reviews.frameworks
- CI/CD Integration Implemented and maintained **GitHub** Actions for automated testing, deployment, and workflow optimization.Deployed static sites using **GitHub** Pages and automated workflows using GitHub
- Developed user-friendly, mobile-responsive websites using **HTML5**, **CSS3**, and **JavaScript**.
- Modern JavaScript (ES6+): Utilized **ES6+** features such as arrow functions, async/await, and modules for clean, efficient code. DOM Manipulation: Created dynamic and interactive web pages by efficiently handling the DOM using vanilla JavaScript.API Integration: Fetched and displayed data from RESTful APIs using fetch() and Axios.
- Infrastructure automation using Terraform, Deployment Manager, or **CloudFormation**

- Developed and optimized high-performance microservices using **Golang**, improving API response times by 30%. Built **RESTful** and gRPC services in **Golang**, integrating with cloud-native solutions ,Implemented concurrent processing and efficient memory management techniques in Golang applications. •
- Engineered event-driven architectures by integrating message queues like **Apache Kafka and RabbitMQ**, enabling asynchronous data processing and communication.
- Leveraged AWS services such as **EC2, S3, RDS, Lambda, DynamoDB, and SQS** to build cloud-native, scalable, and resilient applications.
- Strong knowledge of **Kafka Connect** for integrating with various data sources.Hands-on experience in Schema Registry and Avro for data serialization,Knowledge of **Kafka Security (SSL, SASL, ACLs)** for secure data streaming.
- Documented technical designs, knowledge bases, and project details in Confluence for streamlined team collaboration.Used **Bitbucket** for version control and **CI/CD** automation, ensuring seamless code integration and deployment.
- Spring Core & Annotations Proficient in Spring Core, @Autowired, @Component, @Service, @Repository, and Java-based configuration to manage dependencies efficiently
- Conducted comprehensive unit and integration testing using **JUnit, Mockito, and TestNG**, ensuring high code coverage and system reliability.
- Developed dynamic and interactive web applications using **JavaScript**, enhancing user experience and performance.Optimized front-end performance by implementing efficient JavaScript coding practices, reducing load times and improving responsiveness
- Integrated **RESTful APIs and GraphQL** with **JavaScript** enable seamless data fetching and manipulation.Utilized ES6+ features to write clean, modular, and maintainable JavaScript code.
- Developed distributed data processing pipelines using Apache Spark for large-scale data analytics.Optimized Spark jobs by leveraging **RDDs, DataFrames, and Spark SQL**, improving processing efficiency.Implemented real-time and batch processing using Spark Streaming for handling large data volumes.Applied
- Agile methodologies, participating in sprint planning, daily stand-ups, and retrospectives, enabling adaptive project delivery.
- Developed **RESTful APIs** and implemented API security using **OAuth2 and JWT** for secure communication
- Designed and implemented data pipelines for processing large-scale JSON and CSV files.Developed **APIs** that efficiently handle **JSON**-based requests and responses.
- Integrated Spark with cloud platforms (AWS, GCP, Azure) and data lakes for scalable big data processing.

Client: Molina Healthcare, Long beach, California

Jan 2020-Mar 2022

Role: Java Developer

Responsibilities

- Implemented the entire stack using **Java, spring boot, MySQL and Angular6**.
- Used Java 8 stream **APIs** for bulk operations on collections using parallel streams.
- Worked on Spring framework applications like **Spring Core, Spring AOP, Spring MVC, Spring Batch, Spring Security and Spring Boot** and did integration to **Micro services** into existing system architecture.
- Built Components using **Angular.JS** and worked on **Angular** directives. Implemented lazy loading and Dynamic loading in the **Angular routers**. Worked on Typescript for building the code.
- Implemented data structures for message queues or event-driven architectures to facilitate seamless communication and integration between **front-end** and **back-end** components.
- Proficient in utilizing **AWS services** such as **EC2, S3, Lambda, RDS, DynamoDB, and SQS** for building scalable and reliable applications.
- Developed scalable and high-performance backend services using **Node.js**, handling real-time data processing and API interactions.Built RESTful and GraphQL APIs using Express.js and Apollo Server for efficient data communication.
- Implemented microservices architecture with Node.js to improve system modularity and scalability.Integrated **Node.js** applications with PostgreSQL, Redis, and BigTable for optimized data storage and retrieval.
- Designed and implemented robust data storage solutions using **AWS S3** for object storage and **DynamoDB for NoSQL databases**.

- Proficient in working with relational database management systems (**RDBMS**) such as **MySQL, PostgreSQL, or Oracle**.
- Implemented continuous integration and continuous delivery (**CI/CD**) pipeline using **Jenkins and GitLab**, enabling rapid deployment and faster time to market.
- Leveraged **Docker** containers to streamline development and deployment, fostering platform portability and scalability.
- **Junit/TestNG** were used to perform unit and integration testing.
- Labeled and tackled cross-functional technical challenges, requiring expertise in both **front-end and back-end technologies**.
- Adapted quickly to changing requirements and embraced **Agile methodologies** to deliver projects on time and within budget.
- Demonstrated strong analytical and Logical thinking skills while debugging complex issues across the full stack.

Client: **Gen Digital Tempe, Arizona**

Jan 2018 -Jan 2020

Role: Java Developer

Responsibilities:

- Designed the front-end applications, user interactive (**UI**)web pages using web technologies like **HTML, XHTML,CSS**.
- **Web designing & development using HTML5, CSS3, JavaScript, React Js and Ajax**.
- **Developed React Js pages, Web services calls, and AJAX** calls for the application.
- Used in development of the web application to bind the data/model that is being retrieved from a database through services provided in a controller to the view using scope.
- Used **React Js** in components like **JSX**, creating React components, Virtual.
- Participated with end users and business analyst to understand the business requirements.
- **CSS** styles were developed to preserve the uniformity of all the screens throughout the application and positioning of screen objects.
- Good knowledge and hands on experience with **Angular** and **Typescript**.
- Responsible for design and development of web pages from mock-ups (PSD).
- Worked on Front end by using **JavaScript**.
- Developed user interface by using the **ReactJs**, Flux for SPA development.
- Implemented client-side Interface using **ReactJs**.
- Worked in using **ReactJs** components, Forms, Events, Keys, Router, Animations and Flux concept.
- Build React components and stand-alone functions to be added to any future pages.
- Responsible for developing a front-end application using React Js and FLUX architecture for internal team's productivity use.
- Implement the **JavaScript/jquery** frameworks such as **React JS, Node JS for MVW/MVC** framework
- Experience in building isomorphic applications using React. **Js** and Reduce with Graph on server side.
- Experienced in **React Js** and working with **React Flux** architecture.
- Working with React Router for developing Single Page Applications **SPAs**.
- Implemented the Drag and Drop functionality using React - Draggable thoroughly performed unit testing and integration testing.
- Extensively used **SASS** (Syntactically awesome style sheets) while styling with **CSS3**.
- Used Firebug for debugging and for element styling.
- Wrote services to store and retrieve user data from the **MongoDB** for the application on devices.
- Involved in daily **SCRUM** meetings to keep track of the project status.
- Used web-based **GIT repository** manager with issue tracking features.
- Made the application responsive using **Bootstrap** and **CSS Media Queries**.
- Responsible for checking cross browser compatibility issues and hence worked on different browsers like Google chrome, Internet explorer, **Firefox**, and **safari**.
- Experienced in implementing **CRUD** database operationon such as **MongoDB**.
- Used **Jasmine** and **Karma** as end-to-end testing tools for debugging and software quality insurance.
- Worked with Business Analysts for requirement gathering and requirement analysis.
- Created Use cases, **ER diagrams** and user flow control.

EDUCATION

- Masters'sin **Information Sciences** from **Trine university** Detroit Michigan

August 2023
