Worcester Polytechnic Institute | Bachelor of Science, Major in Computer Science, Minor in Business

Expected Graduation: May 2025, 3.5 GPA

SKILLS

Agile Methodology, Jira, Task Allocation, Sprint Planning, Team Coordination, Progress Tracking, Microsoft Excel, Google Sheets, Microsoft Word, Google Slides, Figma, Git, Python, C, C++, Java, Matlab, Unity, Cross-functional Team Leadership, Client Training, Stakeholder Management, Research & Data Analysis

EXPERIENCE

AR Monocle Application (HCI) + Tool (PL) Designer

Worcester Polytechnic Institute | Worcester, MA | August 2024 - Present

- Developed example applications for an open-sourced AR monocle that offloads computation via Bluetooth, empowering professors with tools to enhance time management, active recall, and presentations.
- Abstracted design tools from these projects into a potential framework/DSL for AR application development, leveraging programming language design principles to streamline instructional workflows and boost student engagement.
- Led UI/UX design and iterative user studies, including paper and high-fidelity prototyping, to validate our hypothesis that these tools improve teaching efficiency while maintaining robust student engagement.

Shuttle Optimization Project Consultant

Worcester Polytechnic Institute | Worcester, MA | September 2024 - December 2024

- Conducted a comprehensive analysis of shuttle operations, identifying inefficiencies such as long wait times, underutilized stops, and resource overuse.
- Developed a data-driven proposal to implement a fixed-route nightly shuttle schedule, reducing unnecessary stops and improving service reliability.
- Collaborated with stakeholders to standardize shuttle operations, ensuring consistent implementation of new protocols and improved rider satisfaction.

SBDSI Digitization Consultant

Worcester Polytechnic Institute | Worcester, MA | October 2022 - October 2023

- Developed and optimized WordPress websites for clients, enhancing functionality through custom plugins and SEO improvements.
- Improved web traffic through strategic SEO optimizations, resulting in higher search engine rankings for clients.
- Managed end-to-end digitization projects, ensuring the successful integration of technical features aligned with business goals.

Start-up Project Manager

Shiro Dessert | Stamford, CT | May 2020 - May 2022

- Led a team of five to optimize store operations using data-driven decision-making for inventory management and sales forecasting.
- Collaborated with the business owner to develop and execute opening strategies, including menu planning and marketing initiatives.
- Designed and launched an advertising campaign based on demographic analysis, leading to increased customer engagement and sales.
- Streamlined operational processes through iterative design changes, improving business efficiency and product turnover.
