Education

Saint peter's university

Master of Science in Data Science (GPA: 3.6 / 4.00)

Aug 2022- May 2024

Jersey city, New Jersey

Matrusri Engineering College

Bachelor of science in Electrical Engineering (GPA: 8.5 / 4.00)

Jun 2015- May 2019

Hyderabad,Telangana

Professional Summary

- Proficient Python developer with 3+ years of experience in designing, developing, and maintaining backend systems and web applications..
- Extensive expertise in Python programming language, including strong knowledge of Python frameworks such as Django and Flask for building scalable and robust applications.
- Skilled in database management, with experience working with relational databases like PostgreSQL and MySQL, as well as NoSQL databases such as MongoDB.
- Experienced in developing RESTful APIs using Django REST Framework and Flask-RESTful, enabling seamless communication between frontend and backend systems.
- Proficient in frontend technologies like HTML, CSS, and JavaScript, allowing for full-stack development and integration with modern web frameworks and libraries.
- Strong understanding of software development best practices, including version control with Git, testing methodologies, and continuous integration and deployment (CI/CD) pipelines.
- Demonstrated ability to collaborate effectively with cross-functional teams, including software engineers, product managers, and designers, to deliver high-quality software solutions on time and within budget.
- Proven track record of analyzing complex problems, devising innovative solutions, and implementing efficient algorithms and data structures to optimize application performance.
- Passionate about learning and staying updated with the latest trends and advancements in Python and related technologies, with a commitment to continuous improvement and professional development.
- Excellent communication and interpersonal skills, with the ability to communicate technical concepts effectively to both technical and non-technical stakeholders, fostering a collaborative and productive work environment.
- Familiarity with cloud computing platforms such as AWS, Google Cloud Platform, or Microsoft Azure, and experience deploying and managing applications in cloud environments.
- Strong problem-solving skills, with the ability to troubleshoot issues, debug code, and implement effective solutions to resolve technical challenges.
- Knowledge of software engineering principles and methodologies, including Agile, Scrum, or Kanban, and experience working in agile development teams.

Experience

OMUNI(SHIPROCKET)

DEC 2019 – JUL 2022

Python Developer

Banglore

- Developed and maintained backend systems using Python and Django framework.
- Designed and implemented RESTful APIs for seamless integration with frontend applications..
- Participated in all phases of the System Development Life Cycle Analysis (SDLC) and responsible for gathering requirements, system analysis, design, development, testing and deployment.
- Used Amazon Web Services (AWS) for enhanced productivity of capacity and quick access.
- Involved in building database Model, APIs and Views using Python, so as to manufacture an intuitive electronic arrangement.
- Used automation Jenkins for continuous integration on Amazon EC2.
- Used Amazon Web Services (AWS) for enhanced productivity of capacity and quick access.
- Participated in Agile development methodologies, including daily stand-up meetings, sprint planning, and retrospectives.

Projects

Scalable Web Application | *Java,selenium*

- Deployed highly scalable microservices architecture using Kubernetes to achieve a 99% uptime for a mock e-commerce website, capable of handling up to 100,000 users and processing up to 2 million requests per second. Using Redis as a caching mechanism and MongoDB sharding for load distribution to reduce the average response time to 200 milliseconds .

IDENTITY ACCESS MANAGEMENT | *Manual testing,java,SQL,MONGO DB,Kafka*

- IAM was the User Interface to Create and Manage all the omuni Business owners in a single place.
- Developed entire system with more than 60 API'S and improved efficiency.

INSURANCE FRAUD DETECTION | *Python,SQL ,Pandas,Numpy,scikit-learn*

- Analyzed large datasets to identify patterns and anomalies indicative of insurance fraud using Python and machine learning techniques.
- Developed and implemented predictive models to assess the likelihood of fraudulent claims, resulting in a 15% reduction in fraudulent payouts.
- Enhanced precision and recall, ensuring a robust defense against both false positives and false negatives.

Technical Skills

Languages: Python,SQL,Java

Technologies::Django,HTML,CSS,Javascript, SpringBoot, Hibernate, Git/Github, snowflake,Tableau,Azure, MongoDB, RestAPIs, Kafka,RabbitMQ ,selenium.

Concepts:Data structures and algorithms,Agile Methodologies, Test-driven development, CI/CD, Virtualization, Networking, and Storage,Data Base Management.
