EDUCATION

UNIVERSITY OF CENTRAL MISSOURI | M.S. in Computer Science | Aug 2022

EXPERIENCE

Smithfield Foods | ServiceNow Developer | April 2023 – Present | Dallas, TX

- Validated storage devices data by aligning import jobs with existing data sources and establishing IRE rules for identifying stale records..
- Set up SolarWinds and Meraki instances on the Service Graph Connector (SGC), addressing data duplicity and creating location maps to enhance asset management.
- Created and customized Incident forms, SLAs,OLAs and notifications to enhance Smithfield Foods end-user communication.
- Customized the Service Catalog to include **handheld** devices, integrating them with approval workflows and backend fulfillment systems.
- Configured CMDB attributes and relationships to capture TBM-relevant data, enabling accurate cost allocation and financial reporting.
- Implemented data policies to validate data inputs across multiple modules (ITSM, HRSD, CSM) for improving compliance with Smithfield standards.
- Transformed AWS server names from IP-based formats to readable formats by configuring flows to use Application Name tag values, improving data clarity.
- Implemented governance policies based on industry standards, leading to improved compliance and visualization through custom dashboards.
- Successfully set up and configured service accounts for Azure and AWS, discovered subscriptions, and scheduled discoveries to streamline cloud resource management.
- Automated AWS and Azure service account configurations for seamless cloud resource discovery.
- Developed flows and scripts to dynamically update key-value pairs, ensuring data integrity and preventing duplication.
- Developed dynamic notifications triggered by Business Rules to update stakeholders on SLA breaches, task reassignments, and other critical events.
- Developed flows to automatically set location values for discovered configuration items (CIs), particularly for Meraki.
- Set up import jobs with custom regex, and created reports differentiating user roles (Admin, Editor, User) for better role management.
- Addressed limitations of 'Intelligent Search' by implementing conditional saved filters, improving search accuracy within the CMDB workspace.

- Developed dashboards for analyzing discovery schedules and identifying stale CIs, providing actionable insights and improving operational efficiency.
- Utilized Client scripting and UI policies to dynamically adjust form fields based on CI type or category, improving the relevance and precision of feedback collection.

Amazon.com Inc | Software Development Engineer | Aug 2022 – March 2023 | Seattle, WA

- Worked as full-stack developer in Amazon Last Mile team which is responsible for the entire Packages Delivery around the world.
- Implemented a full stack solution built with React JS, Java, and DynamoDB to empower customers to pay cash-on-delivery for amazon orders in egypt.
- Developed responsive and user-friendly web interfaces using HTML, CSS, and JavaScript.
- Developed, tested, deployed, and maintained a web application with a webserver backing a JavaScript Client UI for Delivery Driver to perform packages delivery.
- Increased code coverage up to 90% of services by running Fortify code analyser
- Deployed new features and UX/UI changes with A/B testing using Adobe Target for onboarding new store owners.
- Improved operational excellence by building dashboards in Grafana to monitor metrics for new feature launches.
- Enhanced code quality and security by attaching SonarCloud code analysis to CI/CD pipelines.
- Demonstrated strong problem-solving skills in diagnosing and addressing technical issues, resulting in a 25% reduction in recurring incidents.

Tangensis Inc | ServiceNow Developer | Jan 2022 – June 2022 | Dallas, TX

- Supported the configuration and customization of ServiceNow ITSM modules, including Incident, Problem, and Change Management.
- Created basic UI Policies, Business Rules, and Client Scripts to enforce form behaviors and automate field updates.
- Managed ServiceNow platform administration, including user accounts, groups, and roles to ensure secure access.
- Configured and customized Service Catalog, Incident, Problem, Change Request, Asset, and CMDB modules.
- Created and maintained UI Policies, Business Rules, Data Policies, Client Scripts, and ACLs to enforce ITSM process policies.
- Developed and maintained low-code applications on ServiceNow, improving efficiency by 20%.
- Configured MID Servers to integrate on-premises systems such as SCCM and SAP, optimizing operational workflows.
- Generated reports and dashboards to visualize incident trends, SLA adherence, and ticket volumes for leadership review.

NTT Data Services | ServiceNow Developer | Jan 2019 – Dec 2020 | Hyderabad, India

- Managed the administration of the ServiceNow platform, including user accounts, groups, and roles to ensure secure access.
- Experienced in creating and maintaining UI Policies, Data Policies, Business Rules, Client Scripts, and ACLs.
- Created BRs and Client Scripts to enforce ITSM process policies and automate repetitive tasks.
- Developed and maintained low-code applications on the ServiceNow platform, simplifying processes and reducing task completion times by 20%
- Collaborated with a team to develop and automate incident, problem, and change management processes.
- Configured MID Servers to enable secure integrations with on-premises systems like SCCM and SAP, improving operational efficiency.
- Implemented Inbound SOAP integrations to import data from legacy systems into ServiceNow CMDB, ensuring accurate asset tracking.
- Created data transformation workflows using Transform Maps and Data Sources to populate and maintain the CMDB.
- Automated email notifications and escalations via ServiceNow integrations with Microsoft Outlook and Teams.
- Created a custom HR Service Delivery application that reduced onboarding timeline.
- Optimized workflows utilizing JavaScript, leading to a significant increase in system performance.
- Experience in creating multi-step approvals and dynamic form behaviors based on user roles and input conditions.

SKILLS

Applications:

ITSM (Incident, Problem, Change, Request Management , Release Management)

ITOM (Discovery, CMDB, Service Maps CI class Manager, Discovery horizontal & Cloud based, Cloud based, Service Graph Connector, Configuring IRE rules and payloads, Service Mapping: Top down & Tagbased, Creation and Configuration of Health Reports & Dashboards, Creation and Configuration of Import Schedules, Configuration of Health Inclusion rules, Configuration of Data Manager Policies, CMDB Workspace and Tag Governance)

Programming Languages: TypeScript, Java, JavaScript, SQL.

Frameworks: React.

Databases: MS-SQL, Snowflake(cloud), NOSQL(DynamoDB, MongoDB, CMDB)

Cloud: AWS – EC2, S3, SNS, SQS, Lambda, Cloudwatch, Azure.

Other: Git, Grafana, Jira, Adobe Target.

CERTIFICATION

ServiceNow Certified System Administrator (CSA)

ServiceNow Certified Application Developer (CAD)

AWS Certified Solutions Architect – Associate
