

SUMMARY

Data Analyst with experience in clinical research, data management, and statistical programming. Experienced in translating business requirements into technical solutions, developing automated reports, and supporting regulatory and operational decision-making. Proficient in SAS, R, and SQL for data processing, visualization, and automation. Currently pursuing a Data Analytics certificate from Wake Tech Community College to enhance the analytics and visualization skills in (MS Excel, Power BI, Tableau).

CORE SKILLS

- **Business & Data Analysis:** Requirements gathering, gap analysis, process improvement, system documentation, and workflow optimization
- **Technical Expertise:** SAS (Base SAS, Macro, SAS/SQL, ODS), R, SQL, JavaScript, Advanced Excel, and data visualization tools (Power BI, Tableau)
- **Clinical Data Standards:** Strong understanding of CDISC (SDTM, ADaM) and clinical data structures
- **Reporting & Insights:** Development of Tables, listings and Figures for clinical reports, creation of dashboards, and automated analytical reporting
- **Data Management:** Data cleaning, transformation, validation, CRF design, edit checks, and database setup to ensure data integrity
- **Automation & Efficiency:** Macro development, automation of recurring processes, and implementation of quality control frameworks
- **Regulatory & Compliance:** Knowledge of ICH-GCP, 21 CFR Part 11, and HIPAA regulations

PROFESSIONAL EXPERIENCE

Statistical Programmer Analyst

Aug 2022 – Aug 2024

Population Health Research Institute, Canada

- Developed and validated SDTM datasets per CDISC standards to support regulatory submissions.
- Generated reports - Tables, Listing and Figures using SAS.
- Performed data cleaning, manipulation, and validation of clinical data in the EDC.
- Supported eCRF annotation (CDASH/SDTM) and CRF design, database setup, and edit check specification.
- Created clinical reports using SQL in a clinical data visualization tool.
- Conducted UAT testing and mid-study change validations with study teams.
- Maintained programming documentation, database standards, and project metadata.
- Managed clinical trial data in TrialMaster and DF Discover; performed query resolution and ensured database lock readiness.
- Prepared data listings, reports, and dashboards to monitor study progress and quality.

Sr. Batch Specialist

Sep 2010 – Nov 2015

Aon Hewitt – Noida, UP, India

- Extracted healthcare data from DB2 and transformed it into SAS datasets, tables, and reports.
- Developed statistical reports using PROC SQL, PROC REPORT, PROC TABULATE, and other SAS procedures.
- Performed ETL processes and ensured data accuracy through validation.
- Supported annual enrollment projects and conducted multiple testing phases, including UAT and regression testing.

EDUCATION & CERTIFICATIONS

- MSc – Bioinformatics, Sikkim Manipal University, India
- Post-Graduate Diploma – Clinical Research, Pharmacovigilance & Regulatory Affairs (CRPRA) Academy of Applied Pharmaceutical Sciences (AAPS), Toronto, Canada
- SAS Certified Specialist: Base Programming Using SAS 9.4 (SAS Institute)
- ITIL Certification (PeopleCert – Certificate No. GR671462910SM)
- MS Excel (Office 2019) – Exam reference #50553514
- Data Analytics (Wake Tech Community College – Expected completion: March 2026)
