

Shradha Prodduturi

Software Developer

shradhareddy1002@gmail.com | 3412275536 | Newark,CA

PROFILE

Full Stack Java Developer with 3+ years of experience building cloud-native applications using Java, Spring Boot, Angular, and microservices. Strong in designing scalable APIs, event-driven backend workflows, and AWS-based deployments using EKS, Lambda, Docker, and Jenkins CI/CD. Skilled in performance optimization, debugging distributed systems, and integrating Snowflake-driven data workflows to deliver reliable, high quality features in fast paced Agile teams.

PROFESSIONAL EXPERIENCE

Full Stack Java Developer, Fifth Third Bank

06/2024 – Present | Kentwood,MI

- Designed and delivered end to end onboarding and account-preferences flows by building Angular modules, validation workflows, and reusable UI components integrated with Spring Boot microservices.
- Implemented and enhanced REST APIs for transaction history, KYC verification, and fraud checks, optimizing queries and caching to improve API latency by 30%.
- Built reusable Angular service layers for API communication, error handling, interceptors, and token lifecycle management, reducing UI integration issues across sprints.
- Troubleshot complex UI and backend issues including payload mismatches, CORS failures, routing errors, state desynchronization, and token expiration problems, enabling smoother release cycles.
- Owned Jenkins CI/CD pipelines for full stack deployments to AWS EKS, improving release speed and reliability across environments.
- Developed event-driven AWS Lambda utilities to push fraud flags, notifications, and nightly validation results to UI dashboards asynchronously.
- Integrated backend services with Snowflake using optimized batch queries and exposed curated data to support operational dashboards.
- Utilized CloudWatch logging, API Gateway tracing, and UI telemetry to diagnose system failures and improve application stability.

Java Developer, Divis Labs

06/2021 – 08/2023 | Hyderabad,India

- Built Angular dashboards for manufacturing workflows, developing reusable components, data tables, custom filters, and validation logic integrated with backend services.
- Developed Spring Boot microservices and REST APIs supporting inventory tracking, production planning, material requests, and QA operations across multiple plants.
- Created shared Angular services, interceptors, and authentication layers to standardize communication and reduce redundancy across modules.
- Designed end-to-end workflows connecting Angular UI, Java microservices, and Snowflake with consistent data models, error handling, and optimized database access patterns.
- Engineered Jenkins CI/CD pipelines for Angular and Spring Boot applications with automated tests, security scans, artifact storage, and multi-environment deployments.
- Containerized applications using Docker and deployed them to AWS EKS and Azure AKS, contributing to modernization of legacy systems into cloud-native architecture.
- Developed optimized SQL and ETL pipelines in Snowflake to provide curated datasets for reporting dashboards on production delays, material usage, and QA deviations.
- Automated frontend validation and backend reconciliation processes using Python scripts, reducing manual work by 40%.
- Implemented Prometheus and Grafana dashboards to monitor API performance, UI latency, pod crashes, and JVM memory usage.
- Built Linux-based automation for log rotation, cron jobs, and environment setup to support reliable deployments and stable release cycles

SKILLS

- **Languages & Frameworks:** Java, Spring Boot, Microservices, JavaScript (ES6+), React.js, Angular, Python
- **Cloud Platforms:** AWS (EKS, Lambda, EC2, S3, RDS, API Gateway, IAM, CloudWatch), Azure (AKS, App Services)
- **DevOps & CI/CD:** Jenkins (Pipeline Automation), GitHub Actions, GitLab CI/CD, Maven, Deployment Automation
- **Containers & Orchestration:** Docker, Kubernetes (EKS/AKS), Helm, Autoscaling, Rolling Updates
- **Databases & Data Platforms:** Snowflake, PostgreSQL, MySQL, MongoDB, SQL Optimization
- **Monitoring & Logging:** CloudWatch, Prometheus, Grafana, Splunk
- **Frontend Technologies:** React.js, Angular, HTML5, CSS3, Bootstrap
- **Scripting & Operating Systems:** Bash, Unix/Linux (Troubleshooting, Log Analysis, Automation)
- **Version Control & Collaboration:** Git, GitHub, GitLab, Bitbucket, JIRA, Confluence
- **Methodologies:** Agile/Scrum, SDLC, Cloud-Native Architecture, Microservices Design

EDUCATION

Master's in Computer Science, Purdue University

United states
