

PROFESSIONAL SUMMARY:

- 4+ years of experience as Business Analyst with cross-functional expertise in Healthcare, Finance and Operations.
- Excels at translating complex stakeholder needs into actionable technical specifications (BRD, FRD, UML, BPMN) and managing product lifecycles using Jira, Confluence and Visio.
- Highly technical background with proven proficiency in data profiling, ETL pipelines and advanced analytics utilizing SQL, Python, SAS, Snowflake, Azure Synapse, Hadoop, Oracle DB, Excel, VBA and Power Query.
- Demonstrated success in optimizing institutional workflows, leading UAT, managing complex system integrations (FHIR, HL7, X12, CBS, LOS) and delivering high-impact business intelligence dashboards via Tableau, Power BI, MicroStrategy and SSRS.

TECHNICAL SKILLS:

Business Analysis & Requirements: Requirements Elicitation, Business Process Analysis, BRD, FRD, User Stories, Acceptance Criteria, Gap Analysis, Feasibility Analysis, Stakeholder Management

Process Modeling & Documentation: UML, BPMN, Process Mapping, Workflow Modeling, Data Dictionaries, Functional Specifications, Business Process Re-engineering

Data Analysis & Querying: SQL, Complex Joins, Stored Procedures, Data Profiling, Data Validation, Data Reconciliation, Trend Analysis, Forecasting

Programming & Analytics: Python, SAS, Excel Analytics, VBA, Power Query

Data Visualization & BI: Tableau, Power BI, MicroStrategy, SSRS, Dashboard Development, KPI Reporting

Data Platforms & Warehousing: Snowflake, Azure Synapse Analytics, Hadoop, Oracle Database, Data Warehousing

Data Engineering & Integration: ETL Pipelines, Data Modeling, Data Governance, Data Quality Management

Healthcare Data Standards: FHIR APIs, HL7 Clinical Data Feeds, X12 837/835 Claims Transactions, HEDIS Quality Measures, CMS STAR Ratings and Medicaid & Medicare Advantage Data

Agile & Collaboration Tools: Jira, Confluence, Agile Scrum, Sprint Planning, Backlog Management

Testing & Validation: User Acceptance Testing (UAT), Test Case Design, Defect Tracking, Data Validation Testing

PROFESSIONAL EXPERIENCE:**Business Analyst | Centene Corporation - FL, USA | October 2025 - Present**

- Worked on requirements analysis for a Value-Based Care & Population Health analytics platform integrating FHIR APIs, HL7 clinical feeds & X12 837/835 claims transactions, enabling unified analytics across claims, eligibility & provider datasets within Snowflake & Azure Synapse environments.
- Developed complex SQL, Python and SAS analytical queries to profile claims utilization, risk adjustment factors and member care gaps across Medicaid & Medicare Advantage member records, supporting predictive population health initiatives & care management strategies.
- Built interactive Tableau and MicroStrategy dashboards for HEDIS and CMS quality reporting, enabling clinical and payer leadership to track STAR Ratings performance metrics and quality measure gaps across provider networks in near-real time.
- Authored comprehensive BRD, FRD, UML diagrams, BPMN workflows and data dictionaries using Confluence, Jira and Visio, translating complex healthcare regulatory and operational requirements into actionable user stories and acceptance criteria for Agile delivery teams.
- Coordinated User Acceptance Testing (UAT), data validation and defect tracking across payer systems including claims adjudication, member eligibility & utilization management platform, reducing reporting discrepancies by 32% & improving regulatory reporting accuracy.
- Collaborated with data engineers, actuaries and clinical informatics teams to design ETL pipelines and healthcare data models within Hadoop and Snowflake, enabling standardized ingestion of HL7 clinical data, FHIR resources and provider quality metrics, improving analytics readiness and data governance compliance.

Business Analyst | New Malashree English School – Nepal | April 2022 – January 2025

- Conducted end-to-end analysis of core institutional workflows, including student admissions, attendance tracking and fee collection, identified bottlenecks that led to a 15% reduction in administrative processing time through the proposal of automated digital solutions.
- Facilitated cross-functional workshops with teachers, parents and school administration to elicit and document high-level business requirements and functional specifications for a revamped school management information system (MIS).
- Developed comprehensive performance dashboards using Excel and SQL to analyze longitudinal student data and teacher performance metrics, enabling the administration to implement targeted academic intervention programs.
- Performed trend analysis on historical enrollment and financial data to forecast seasonal admissions, delivered actionable insights that informed a 10% increase in student retention and optimized fee structure models.
- Spearheaded feasibility studies and gap analyses for the introduction of new academic programs and digital literacy courses, aligning the school's curriculum with modern educational standards and regional demand.

Business Analyst | HCLTech - India | October 2017 - September 2019

- Authored comprehensive Business Requirement Documents (BRD) and Functional Requirement Documents (FRD) to migrate legacy retail lending processes into a centralized, digital Loan Origination System (LOS) for Personal and MSME loans.
- Designed end-to-end "To-Be" process maps and workflow models using Microsoft Visio and BPMN to streamline credit underwriting, Customer Information File (CIF) creation and multi-tier approval hierarchies.
- Developed complex SQL stored procedures, joins and optimized queries in Oracle Database to extract historical credit data for ETL pipelines and perform data reconciliation across Core Banking Systems (CBS).
- Built automated KPI dashboards using Power BI and SSRS to track real-time loan disbursement volumes, delinquency trends and branch-level performance metrics for senior stakeholder reporting.
- Facilitated Agile Scrum ceremonies managed the product backlog in JIRA and spearheaded User Acceptance Testing (UAT) for the integration of UPI and IMPS payment gateways within the lending platform.
- Reduced loan processing Turnaround Time (TAT) by 40% (from 5 days to 3 days) and achieved 99.8% data accuracy by implementing automated VBA macros and Power Query workflows for financial modeling and gap analysis.

EDUCATION:

Master of Computer Science with Industrial Experience - Queen Mary University of London, Mile End, London, United Kingdom

Bachelor of Science in Computing - Islington College, Kathmandu, Nepal

CERTIFICATION:

1. Google Project Management Certificate – Coursera
2. Agile Certified Professional
3. Self-Paced Certification – (on Process)
