

EDUCATION

The University of Texas at Arlington

May 2024

Master of Science in Computer Science Engineering (Current GPA: 3.33/4.0)

K. J. Somaiya Institute of Engineering and Information Technology, Mumbai, India

May 2022

Bachelor of Engineering in Computer Engineering with a GPA of 9.28/10.0

WORK EXPERIENCE

Web and Mobile Application Developer

August 2024 – Present

Social Media Ministries, Minnesota, USA

- Spearheading the development of a cross-platform mobile application using Flutter, enabling seamless user engagement across Android and iOS.
- Implementing Firebase authentication and database services for secure login and user data storage, improving app accessibility..
- Collaborating with stakeholders to integrate gamification features, such as customizable avatars and rewards, enhancing user interaction by 70%.
- Designed and optimized multiple mini-games and quizzes, aligned with educational and spiritual content, boosting app usability and engagement.

Web and Mobile Application Developer

April 2021 – October 2021

Somnium Labs, Mumbai, India

- Engineered high-performing e-commerce platforms using Flutter, elevating user experience and boosting conversion rates by 55% through advanced architecture and design optimizations.
- Improved UI/UX, resulting in a 40% increase in user engagement and a 15% reduction in bounce rates through effective design strategies.
- Strengthened security measures by implementing encryption and secure protocols, safeguarding user data and reducing vulnerabilities by 50%.
- Revamped backend infrastructure with Firebase and Cloud Firestore, achieving a 65% increase in efficiency through refined database management and architecture.

Front-end Web Developer

June 2020 – August 2020

Poonam Enterprises Pvt. Ltd., Mumbai

- Developed and deployed a website with an admin interface, streamlining user account management by 30% and reducing administrative workload by 25% through efficient feature implementation.
- Conducted performance tuning and code optimization, achieving a 60% improvement in website loading speed and overall user experience.
- Applied advanced front-end technologies using HTML5, CSS3, JavaScript, and jQuery to enhance website functionality and responsiveness.
- Implemented modern design techniques to reduce response time, resulting in a significant 70% boost in site performance and user satisfaction.

ACADEMIC PROJECTS

Blood Bank Management System

- Engineered a Java-based Blood Bank Management System for 100+ donors, reducing data retrieval times by 25% and improving query efficiency by 30% with MySQL integration.
- Designed an intuitive GUI using Java libraries, increasing user satisfaction by 55% through effective communication and user-centric UI.
- Revamped system performance and reliability, cutting processing times by 30% through advanced data handling practices and process optimization, improving overall system uptime by 25%.

Emergency Mobile Application

- Crafted a responsive front end with Flutter, supporting seamless interactions for over 1,000 users with optimized design elements.
- Implemented Firebase for backend services and offline notifications, boosting performance by 35% to ensure reliable communication.
- Integrated real-time location updates every 5 seconds for accurate emergency response, enhancing safety using Fast2SMS.
- Optimized system performance and scalability, accommodating a 50% increase in the student database while maintaining a 20% improvement in data retrieval speed and system responsiveness.

Student Management System

- Built a student management system with ReactJS, NodeJS, and MongoDB, efficiently managing data for 1,200+ students.
- Streamlined information management, boosting administrative efficiency by 70% through effective system design and collaboration.
- Designed APIs using NodeJS for rapid data access, ensuring effective backend integration and seamless application performance.
- Enabled emergency contact requests, increasing user response speed by 40% and enhancing safety during critical situations by ensuring 100% of emergency alerts were promptly addressed.

SOFTWARE SKILLS

- Programming Languages: C, Java, Python, and Dart
- Open Source: Anaconda (Python), OpenJDK (Java), NodeJS (ES6)
- Database Software: MySQL, MongoDB (NoSQL), H2 (In-memory for Spring Boot)
- IDE: Eclipse, VSCode, PyCharm, IntelliJ, Android Studio, Jupyter Notebook, GitHub
- Website-based Languages: HTML, CSS, JavaScript, and jQuery
- Frameworks: ExpressJS, Flutter, Spring Boot (Java), JPA (Java Persistence API), Lombok (Java), Angular (TypeScript)
