+1 (857) 313-4869 | sindhusk225@gmail.com | [linkedin.com/in/sindhusundararajan](https://www.linkedin.com/in/sindhusundararajan)

Data Analyst with 5+ years of experience in SaaS, marketing, and finance, specializing in SQL, Python, Tableau, and Snowflake. Skilled in building ETL pipelines, optimizing funnels, enabling self-serve analytics, and driving data governance. Experienced in cross-functional collaboration to align data infrastructure with business goals.

EDUCATION

Northeastern University Master of Professional Studies - Analytics (Specialization: Applied Machine Intelligence)	Sep 2022 – Jul 2024 Boston, USA
Anna University B.E. in Computer Science	Jul 2014 – May 2017 Tiruchirappalli, India

WORK EXPERIENCE

Data Analyst Community Dream Foundation	Sep 2024 – Present Remote, USA
--	--

- Diagnosed funnel friction through **drop-off and cohort analysis**, improved conversion rates by 10% .
- Built **scalable Tableau dashboards** to monitor cross-functional KPIs across Sales, CX, and Marketing.
- Partnered with Engineering to align **Segment tracking** with business requirements, improving downstream data quality.

Business Analyst New York State Office-ITS	Jul 2023 – Dec 2023 Albany, USA
---	---

- Built interactive **Tableau dashboards** for compliance and regulatory reporting, enhancing visibility of **state-wide KPIs** and improving decision-making across agencies.
- Authored **BRDs, FRDs**, translating stakeholder requirements into scalable tracking specifications & reporting frameworks.

Data Analyst Cognizant Technology Solutions	Apr 2019 – Sep 2022 Chennai, India
--	--

- Managed **GTM analytics** and built **SQL-Tableau dashboards** to track campaign ROI, segmentation, & spend efficiency.
- Conducted **A/B & multivariate testing**, increasing conversion by **12%** and re-engagement by **9%**.
- Built real-time **KPI dashboards in Tableau**, reducing sales reporting latency and increasing adoption.
- Created **automated pipelines in Snowflake + Segment**, unifying metrics across Sales, Marketing, and CX.
- Built & optimized modular **dbt models** to transform raw data into reusable datasets, reducing dashboard loadtime by **40%**.
- Managed **batch and incremental ETL** logic within **Airflow DAGs**, streamlining ingestion from CRM & third-party APIs.
- Streamlined **data schema** and standardization processes, resolving **90%** of reporting discrepancies.
- Developed **QA processes** for dashboards, reducing GTM reporting errors by **25%**.
- Conducted **cross-functional data audits**, identifying **25+ sources of redundancy** and reducing storage usage by **15%**.
- Implemented **alerting logic in Airflow & Slack**, notifying stakeholders of **data freshness** issues.
- Partnered with engineers to enforce **Snowflake RBAC**, strengthening **data security**.
- Designed and documented **schema maps** and **data lineage**, streamlining traceability and analyst onboarding.
- Translated **business logic** into scalable **SQL solutions** in collaboration with backend teams.
- Version-controlled **dbt** and **Airflow pipelines** with **Git workflows**, supporting **CI/CD**.
- Mentored **5+ junior analysts** on **data storytelling** and **ETL pipeline best practices**.

SKILLS & CERTIFICATIONS

- **Languages:** SQL, Python, R
- **Visualization:** Tableau, Power BI, Looker, Excel, Grafana, Sigma(Upskilling)
- **Data Engineering:** ETL/ELT (Airflow, dbt), Spark, Snowflake, Redshift, Databricks, DynamoDB, Segment
- **Tools & Platforms:** AWS, Azure, Git, Docker, Terraform, Jupyter Notebooks, Visio, Salesforce
- **Certifications:** Salesforce certified Tableau Desktop Foundation Google Analytics GA4 Certification, HubSpot Inbound Marketing Certification, Microsoft Azure Fundamentals (AZ-900), AWS Certified Solutions Architect – Associate, PMP UC-Irvine

ACADEMIC PROJECTS

Project: Predict Product Buying Patterns

- **Tech Used:** AWS, S3, DynamoDB, Python, SQL
- Applied K-Means Clustering and Market Basket Analysis to segment customers and identify product bundling opportunities.
- Created a reusable segmentation pipeline in Python to support yearly updates using new sales data.
- Delivered insights to inform loyalty campaigns, digital offers, and retention strategies.

Project: AI-Powered Investment Portfolio Optimization

- **Tech Used:** Python, SQL, PostgreSQL, Snowflake, Power BI, Pandas, Matplotlib, Streamlit, Docker
- Developed end-to-end data pipeline integrating PostgreSQL, Snowflake & Power BI to automate stock trend analysis.
- Implemented risk-return analytics & visualizations, improving investment decision insights by 35%.
