

SIVA KUMAR SANKULA

Address: 270 W Jericho Tpke, Huntington Station, NY, 11746

Sivakumarsankula.319@gmail.com/347-867-9333, LinkedIn: www.linkedin.com/in/siva-kumar-sankula-b59484150/

SKILLS SUMMARY

- **Languages:** JavaScript (ES5/ES6), Python, C, R, **Typescript**, C++, CSS, HTML, **JSON**
- **Frameworks:** **Node.js**, Express.js, MongoDB, **React.js**, Flutter, Next.js, **Firebase**, MySQL
- **Tools:** **Git**, GitLab, Postman, **AWS**, REST APIs, Linux, **Docker**, Jira, Kubernetes, Azure, Tableau.
- **Skills:** Front-end, **Agile**, Back-end, Unit testing, Micro-services, **CI/CD**, SCRUM, **DevOps**

Professional EXPERIENCE

Associate Software Engineer – CGI

Bangalore, India

Full-time

August 2021 – August 2022

- **Developed:** and collaborated with a team of **9 people** and enriched existing system metrics by **17%**. Increased projected annual revenue by **\$1.3 million** by implementing optimized business logic through code.
- **Built:** and led design, development, and maintenance of scalable and high-performance products **E2E** from identifying system requirements to software implementation, **testing**, and configuring metrics, alarms, monitors, and dashboards.
- **Collaboratively:** implemented scalable software solutions, contributing to an increase in system efficiency for key client projects within the **first** year at CGI.
- **Spearheaded:** the integration of a new **automated testing** framework, reducing software errors by **a lot** and accelerating the product release cycle.
- **Participated:** in **cross-functional** development teams, promoting an **Agile** workflow that led to a **significant** improvement in project **delivery** times while maintaining customer **satisfaction** scores.
- **Mentored:** and provided onboarding to **5 new junior** engineers, enhancing team **productivity** by **10%** and fostering a supportive **learning** environment within the company.
- **Integrated:** a multi-staged CI/CD pipeline with version locking and roll-back capabilities, performed **codereview**, curated **documentation**, Restructured load/stress testing, and **unit/integration/e2e** testing.
- **Designed:** scalable, distributed, low latency, and high throughput fleet management systems with continuous integration and deployment capabilities. Harnessed K3s, Docker, OAuth, **Terraform**, and Node.js.
- **Produced:** a total of **133** vision solutions across the factory, reduced cycle-time by **23%**. Installed platform and service architecture employing enterprise integration patterns. Adopted **AWS**, TensorFlow, PyTorch, and Firebase.
- **Optimized:** legacy code implementations - accelerated software performance by **20%**. Scaled products leveraging Typescript, **React.js**, Vite, Mongoose, Docker, **Redux**, K8s for horizontal scaling, and BitBucket for version control.
- **Resolved:** **7+** distinct performance **bottlenecks** in a distributed software architecture for large-scale deployments. Extended build system to integrate with cloud for higher cost efficiency, cutting **cost** burden to company by **17%**.
- **Engineered:** the UI/UX of software products using user-centric design methodologies. Integrated **A/B testing** to validate design changes which led to a **19%** increase in user retention and a **14%** increase in user engagement.

Academic/Professional PROJECTS

- **News App - CGI (User base of 2000+)** Achieved significant improvement in test coverage by identifying and automating **critical** test scenarios across various functionalities of the news app. Completed detailed and **actionable** test reporting mechanisms, providing stakeholders with clear insights into the test results and overall application health. (October 2023).
- **Good-morning Girlfriend (Automation):** Programmed a platform automating the delivery of daily greetings, enhancing UX and reducing user's cognitive load. Tech: **Redis**, SQL, **AWS lambda**, JavaScript, and NPM (March 2023).
- **Study Buddy (Back-end, Python):** Automated creation of chat groups to enhance communication and collaboration between students and teachers, benefiting over **8000+** students throughout the academic semester. Employed technologies such as Django, GCP, **Angular.js**, Jenkins, SQL, **Restful APIs**, and Software Development Life Cycle (**SDLC**). (August 2022).

EDUCATION

- **Trine University, Detroit**
Master's - Business Analytics - Data Visualization, DBMS (CGPA 3.75)
- **Jawaharlal Nehru Technological University, Kakinada**
Bachelor's in Mechanical Engineering (CGPA 3.71)

Michigan, U.S.A
October 2022 – May 2024

Andhra Pradesh, India
August 2018 - June 2022
