

# SNEHA JAGANNATHA KUNTOJI

Analytical Engineer | Data Engineering | ETL · dbt · Snowflake · Azure Databricks · Python SQL

NJ, USA | +1 (862) 412-2895 | snehakjagannath07@gmail.com | LinkedIn | GitHub

Analytical Engineer with 3+ years of experience developing and optimizing enterprise-grade ELT pipelines across dbt, Snowflake, and Azure Databricks ecosystems. Improved pipeline efficiency by up to 70% and reduced compute costs by 25% through performance tuning and automation. Delivered analytics solutions supporting finance and supply-chain data for 10,000+ transactions daily, transforming manual Excel workflows into automated, near-real-time dashboards.

## KEY SKILLS

- Programming:** Python, SQL, PySpark
- Data Engineering:** dbt (models, macros, tests), Snowflake, Delta Lake, PostgreSQL, MySQL
- Cloud & ETL Tools:** Azure Data Factory, Databricks, AWS, Airflow, CI/CD (Git, Docker)
- Visualization:** Power BI, Tableau
- Generative AI:** Azure OpenAI, Prompt Engineering
- Methods:** Agile/Scrum, Data Quality Validation, KPI Design

## PROFESSIONAL EXPERIENCE

Fractal Analytics | Data Engineer Intern

Jun 2025 – Sep 2025

- Engineered a GenAI migration framework using Azure OpenAI and PySpark, converting 200+ legacy DevOps scripts into optimized PySpark pipelines, boosting migration accuracy by 60%.
- Operationalized Databricks workloads by integrating distributed compute and caching layers, reducing runtime by 70% and enabling concurrent multi-project execution.
- Automated cross-team code conversions, establishing a single PySpark framework template that cut manual rework by 80%.
- Validated end-to-end workflows alongside senior engineers, ensuring all LLM-generated pipelines met performance and governance standards.

Deloitte | Analytical Engineer

Oct 2021 – Jul 2024

- Architected and scaled ELT pipelines on dbt and Snowflake, enabling real-time analytics and cutting data refresh cycles from 12 hours to under 7 hours.
- Developed and deployed data marts and SCD2 models using Python and Spark, improving forecast accuracy by 15% across finance and supply-chain domains.
- Standardized dbt packages and macros, establishing modular code libraries that cut pipeline development time by 30% across teams.
- Deployed Airflow DAGs and CI/CD deployments, streamlining testing and reducing production release cycles by 40%.
- Optimized Snowflake warehouse performance, lowering compute costs by 25% on multi-terabyte datasets through clustering and query tuning.
- Instituted data-quality and lineage frameworks using YAML tests and documentation, ensuring traceability and audit readiness.
- Partnered with business and analytics stakeholders to design KPI-based models that increased executive reporting accuracy by 25%.
- Mentored analysts on SQL optimization, dbt modeling, and version control, enhancing team productivity and data consistency.

## PROJECTS

Netflix Analytics | Snowflake · dbt · SQL · Power BI

Sep 2025

- Built an end-to-end ETL pipeline from raw CSV to Snowflake star schema using dbt; cut query latency by 35 %.
- Automated testing and lineage with dbt tests, ensuring data reliability for content performance dashboards.

Paris Olympics ETL | Azure Data Factory · Databricks · PySpark

Jul 2025

- Processed multi-GB datasets with PySpark and Delta Live Tables, reducing processing time by 40 %.
- Integrated CI/CD via Azure DevOps for dbt model deployments aligned with enterprise standards.

## EDUCATION

Rutgers University, NJ Master of Information Technology and Analytics | GPA 3.8/4.0

Dec 2025

Bapuji Institute of Engineering and Technology, India B.E. Information Science and Engineering | GPA 3.6/4.0

Aug 2021

## CERTIFICATIONS (IF AVAILABLE)

DBT Fundamentals
