

Snehith Goud Nyalapatla
Java Full Stack Developer
Princeton, TX | +1 4699885104
snehithn20@gmail.com | <https://www.linkedin.com/in/snehith-n-965443351/>

Professional Summary:

- **Full-Stack Java Developer with 4 years of experience** building scalable enterprise applications using **Java 15, Spring Boot, and Angular (8–13)**.
- Delivered **end-to-end solutions** for healthcare (**Prescription Management System**) and **ERP systems (HR, Finance, Procurement)**, improving compliance and operational efficiency.
- Strong backend expertise in **Spring Boot, Hibernate, and Spring Data JPA**, developing **microservices architecture and RESTful APIs** for secure, business-critical applications.
- Proficient in building **interactive user interfaces using Angular and React.js**, leveraging **RxJS, Reactive Forms**, and modern frontend practices to deliver dynamic, real-time user experiences.
- Experience working with **MySQL, PostgreSQL, MongoDB**, and implementing **Redis-based caching and session management** to improve API response times and reduce database load in high-traffic microservices applications.
- Integrated **RabbitMQ and WebSocket** for real-time communication and implemented secure authentication using **Spring Security, OAuth 2.0, JWT, and RBAC**, aligned with **HIPAA and audit requirements**.
- Hands-on experience with **Docker, Kubernetes, Jenkins, GitHub Actions, and CI/CD pipelines**, deploying applications on **AWS (EC2, S3, Fargate, API Gateway, Elastic Load Balancer)**.
- Configured **Azure Traffic Manager and Azure Application Gateway** along with **AWS traffic management solutions** to enable secure routing, global load distribution, and high availability across cloud environments while collaborating in **Agile/Scrum teams using JIRA and Confluence**.

Technical Skills

Languages	: Java (8, 11, 15), TypeScript, JavaScript, SQL.
Backend / Frameworks	: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Microservices, REST APIs, Swagger/OpenAPI.
Frontend	: Angular (8–13), React.js, RxJS, HTML5, CSS3, SCSS, Bootstrap.
Databases	: MySQL, PostgreSQL, MongoDB, Redis.
Messaging	: RabbitMQ, Apache Kafka, WebSocket.
DevOps / CI-CD	: Docker, Kubernetes, Jenkins, Git, GitHub Actions.
Cloud Platforms	: AWS (EC2, S3, RDS, API Gateway, Fargate, Elastic Load Balancer, Cloud Watch) Microsoft Azure (App Services, Traffic Manager, Application Gateway).
Security	: Spring Security, OAuth2, JWT, RBAC.
Testing	: JUnit, Mockito, Jasmine, Karma, Postman, Unit Testing.
Methodologies	: Agile, Scrum, JIRA, Confluence.

Work Experience:

CVS Health | Full Stack Java Developer | Phoenix, AZ
Project: Prescription Management System

Jan 2025-Present

Responsibilities:

- Architected a microservices-based prescription management platform using **Java 15 and Spring Boot**, enabling secure processing of **10K+ daily prescription transactions** across pharmacies and healthcare providers.
- Designed and deployed 20+ **RESTful APIs** for prescription workflows including issuance, refill processing, and cancellations, improving interoperability between physician and pharmacy systems.
- Orchestrated asynchronous communication between insurance providers, pharmacies, and physicians using **RabbitMQ messaging queues**, improving system responsiveness by **30%**.

- Engineered dynamic healthcare dashboards using **Angular 13, RxJS, and Reactive Forms**, enabling real-time notifications and improved patient workflow management.
- Optimized data persistence by designing hybrid storage solutions using **PostgreSQL for structured prescription data** and **MongoDB for patient interaction logs**.
- Strengthened application security using **Spring Security, OAuth2, JWT authentication, and RBAC**, ensuring compliance with **HIPAA healthcare regulations**.
- Containerized microservices using **Docker** and deployed them on **AWS Fargate and Kubernetes**, enabling auto-scaling and high availability.
- Automated deployment pipelines with **GitHub Actions CI/CD**, reducing deployment time by **35%** and improving release reliability.
- Enhanced system observability by integrating **AWS CloudWatch logging and monitoring**, reducing incident troubleshooting time by **25%**.
- Collaborated with product managers, QA engineers, and DevOps teams in **Agile Scrum environments**, delivering production features through **bi-weekly sprint cycles**.

Environment: Java 15, Spring Boot, Spring Data JPA, Hibernate, Microservices, REST APIs, Angular 13, RxJS, RabbitMQ, PostgreSQL, MongoDB, Spring Security, OAuth2, JWT, Docker, Kubernetes, AWS (EC2, S3, API Gateway, Fargate, ELB, CloudWatch), GitHub Actions, JUnit, Mockito, Postman, Git, Agile, JIRA.

Vision Technologies | Software Developer | Hyderabad, Telangana
Project: Enterprise Resource Planning (ERP) System

June 2020-June 2023

Responsibilities:

- Built scalable ERP modules for **HR, Finance, and Inventory management** using **Java 11, Spring MVC, and Hibernate**, supporting **500+ enterprise users**.
- Developed interactive web interfaces with **React.js, functional components, hooks, and Bootstrap**, improving enterprise workflow usability and system adoption.
- Enabled real-time enterprise notifications using **WebSocket-based communication**, delivering **10K+ monthly alerts** for payroll, task updates, and approval workflows.
- Improved financial reporting performance by designing optimized **MySQL schemas and stored procedures** for large-scale transactional data.
- Implemented secure authentication and authorization using **Spring Security and role-based access control (RBAC)**.
- Deployed ERP services on **Microsoft Azure App Services** and configured **Azure Application Gateway** for secure routing and load balancing.
- Configured **Azure Traffic Manager** to distribute global traffic and improve application availability across production environments.
- Streamlined build and deployment processes by introducing **Jenkins CI/CD pipelines and Git version control**, reducing manual deployment efforts by **40%**.
- Improved frontend reliability by implementing **automated UI testing using Jest and React Testing Library**.
- Partnered with product owners, QA teams, and developers in **Agile Scrum workflows** to deliver enterprise features through iterative development cycles.

Environment: Java 11, Spring MVC, Hibernate, REST APIs, React.js, JavaScript (ES6), HTML5, CSS3, Bootstrap, WebSocket, MySQL, Spring Security, RBAC, Jenkins CI/CD, Git, Microsoft Azure (App Services, Application Gateway, Traffic Manager), Jest, Agile, Scrum, JIRA.

Education:

Master's Degree In Computer Science
 University of Central Missouri

Aug 2023-Dec 2024
