PROFESSIONAL SUMMARY

Data engineer with 4+ years of experience modernizing data and analytics platforms for F500 companies like JPMorgan Chase and Infosys. expertise in **Python, AWS, Snowflake, Kafka, and Airflow**, building high-throughput ETL pipelines that process **multi-terabyte datasets** with precision and efficiency. **data-driven platforms** that accelerate business insights, enable predictive analytics, and support enterprise decision-making at scale.

EXPERIENCE

JPMorgan Chase & Co. – Columbus, OH, Data Engineer

Jul 2024 – Aug 2025

- Led modernization of legacy financial data ecosystems using **AWS Glue and Snowflake**, improving processing throughput by **40%** and eliminating recurring data quality issues.
- Engineered **real-time streaming pipelines** leveraging **Kafka, Spark, and AWS Lambda**, processing **5+ TB of daily transactions** for fraud detection and risk analysis.
- Robotized **data validation and reconciliation frameworks**, reducing manual QA and increasing data audit traceability across **12 enterprise systems**.
- Implemented **CI/CD pipelines** with **Jenkins, Docker, and Kubernetes**, standardizing release processes and reducing deployment time by **25%**.
- Optimized **SQL queries and indexing strategies**, cutting average query latency by **60%**, and developed **Grafana dashboards** to monitor cost and performance metrics in real time.

Vanguard – Charlotte, NC, Data Engineer

Jan 2019 – Dec 2019

- Designed and delivered a centralized **AWS-based data lake** (S3, Redshift, Lambda) consolidating **50+ disparate data sources**, reducing data retrieval latency from **2 hours to 15 minutes**.
- Built automated **ETL ingestion pipelines** using **Airflow and Python**, enabling DAG scheduling and achieving a **35% reduction** in data load failures.
- Authored **Flask REST APIs** to streamline financial data transfers across internal systems, cutting reconciliation effort by **50%**.
- Optimized **Snowflake and Redshift transformation workflows** via partitioning and compression, improving compute utilization by **20%**.
- Partnered with governance teams to define **data lineage and encryption policies**, ensuring full **HIPAA compliance** and secure data access controls.

Rocktop Tech – Dallas, TX, Junior Data Engineer

May 2017 – Dec 2018

- Built and maintained **data migration workflows** from on-premises Oracle databases to **AWS RDS and S3**, ensuring **99.9% accuracy** through checksum-based validation scripts in Python.
- Developed **microservices based APIs** using **Spring Boot and Docker**, enabling modular analytics integration across multiple business units.
- Created **Power BI dashboards** connected to **Kafka Streams telemetry**, reducing manual performance tracking by **60%** through automated visualization.
- Automated **infrastructure provisioning** using **Terraform and Ansible**, cutting environment setup time from **3 days to 4 hours** and standardizing deployment pipelines.

TECHNICAL SKILLS

Programming & Scripting: Python (Advanced), SQL, Java, Shell Scripting, JavaScript

Data Engineering & Orchestration: ETL Pipelines, Apache Airflow, Apache Kafka, Spark, AWS Glue, Pandas, NumPy

Cloud Platforms: AWS (S3, Redshift, Lambda, RDS, EC2, IAM), Oracle Cloud, Snowflake, Azure (Basic)

DevOps & CI/CD: Jenkins, GitLab CI, Docker, Kubernetes, Terraform, Ansible, Maven, Nexus

Databases & Storage: Oracle, MySQL, PostgreSQL, MongoDB, AWS RDS, DynamoDB, Data Lakes

Infrastructure & Monitoring: Infrastructure as Code (IaC), Terraform, CloudFormation, Grafana, Prometheus

Data Visualization & Analytics: Power BI, Tableau, Grafana, Kibana

Software Development & Architecture: REST API Development, Microservices, Event-Driven Systems, Performance Optimization

Security & Governance: IAM Policies, Data Encryption, Lineage Tracking, HIPAA Compliance, Audit Logging

Methodologies: Agile/Scrum, Test-Driven Development (TDD), Continuous Delivery, Git Version Control

EDUCATION

East Central University – Oklahoma,

Bachelor of Science in Computer Science,

Jan 2020 – May 2023
