

Sowmya Devi Selvan

Dallas - Fort Worth, TX | 571-232-2186 | sowmyaselvan6@gmail.com | [Linkedin](#) | [GitHub](#) | [Tableau](#)

Data Analyst with 5+ years of proven experience transforming complex datasets into actionable insights and data-driven business strategies. Proficient in **SQL, Python, Tableau, Power BI** specializing in end-to-end data analysis and ETL pipeline development.

EDUCATION

Master's in Data Science, University of North Texas

Jan 2023 - July 2024 | GPA : 4

Bachelor of Computer Science, Anna University

Aug 2012 - May 2016 | GPA : 3.7

EXPERIENCE

SERC Reliability Corporation

Fort Worth, TX

Business Intelligence Analyst - Energy

Aug 2024 - Present

- Led a major workflow automation project end-to-end, by integrating 100+ data points from multiple sources using Python, SQL, Power Automate, and API's, delivering a 500% faster run time with 100% accuracy.
- Collaborated with Executive Leadership to define 50+ Organizational Performance Metrics - KPOs & KPIs, standardizing cross functional reporting, assigning data owners, and redesigned reporting for improved consistency and storytelling.
- Built and maintained 20+ interactive dashboards and a Risk Assurance dashboard using Power BI analyzing 1,000+ audits over 8 years across SERC footprint, enabling data-driven audit planning and reliability risk prioritization.
- Developed and maintained automated ETL pipelines using Python to ingest and transform web-scraped data, reducing legal team's reporting time from 8 hours to under 2 minutes.
- Implemented python based AI and NLP techniques to analyze and rank free-text survey responses, enabling better strategic insights.
- Drove an Enterprise wide collaborative analytics culture by introducing team office hours and bi-monthly presentations to highlight members' contributions.

Tenet Healthcare

Dallas, Texas

Data Engineer Intern - Healthcare

Jun 2024 - Aug 2024

- Migrated 50+ SQL Server stored procedures to GCP's Big Query procedures, ensuring 100% data accuracy during an enterprise-wide transition to in-house Google Cloud.
- Designed and implemented 10+ Python-based Cloud Functions to automate custom ETL workflows, enhancing file ingestion efficiency and minimizing manual intervention
- Automated report table generation to deliver reliable, analytics-ready data for downstream analysis.

S2 Solutions

Coimbatore, India

Data Analyst - Manufacturing

Aug 2018 - Mar 2020

- Created, automated, and enhanced 25+ report modules using SQL stored procedures, Power BI and MS SQL Server reducing manual reporting efforts by 45%.
- Developed inventory planning solutions, integrating sales and merchandise analytics that resulted in estimated savings of ~\$100K for client management using Power BI.
- Developed Power BI branding guidelines and partnered with the communications team to align reporting with corporate design principles enhancing consistency.

Verizon Data Services

Chennai, India

Data Analyst - Telecom

July 2016 - Mar 2018

- Analyzed router speed test logs to identify key network metrics and developed a Tableau dashboard that improved network troubleshooting efficiency and saved technicians up to 80% of their time.
 - Built an end-to-end data pipeline to process Verizon Fios DTlx network data from MongoDB to MySQL Server using Talend jobs.
 - Created SQL views to simplify complex datasets for analysts, transforming JSON outputs into structured tables.
 - Analyzed Verizon Fios service technicians queries, logs to find patterns, trends and provided ad-hoc reports as and when needed.
-

SKILLS

Languages: Python, PySpark, MS SQL Server, MySQL, Oracle DB, HTML, CSS, JSON, DAX, MQuery, Microsoft suite, Google suite

Tools: GCP, Big Query, AWS Redshift, S3, Power BI, Tableau, Power Platforms, JIRA, Agile, Talend, GitHub, BitBucket

Statistics: Confidence Interval, Hypothesis, A/B Testing, Anova, Bayesian Statistics, Probabilistic Distribution

Packages: Scikit-Learn, Sklearn, dplyr, caret, ggplot2, Pandas, Numpy, Matplotlib, Seaborn, Plotly, ARIMA

ACHIEVEMENTS

Employee Excellence Award - Best Innovation 2025
