SUMMARY:

Data Engineer with 5 years of experience across consulting and financial services, building scalable Azure data pipelines and analytics-ready datasets for enterprise reporting and decision support. Strong in SQL and Python with ETL/ELT, orchestration, data modeling, data quality, and GenAI automation using LangChain and OpenAI.

SKILLS:

- **Programming & Querying:** Python, SQL, R
- **Data Pipelines & Orchestration:** ETL/ELT, Data Ingestion, Data Transformation, Incremental Loads, Workflow Scheduling, Apache Airflow, Azure Data Factory, Alteryx
- **Cloud & Storage:** Microsoft Azure, Azure Data Lake, AWS S3
- **Data Platforms & Warehousing:** Snowflake, Azure Synapse, Big Query, Amazon Redshift
- **Data Processing:** Spark, Distributed Data Processing
- **Databases:** PostgreSQL, MySQL
- **Data Modeling:** Dimensional Modeling, Star Schema, Fact & Dimension Tables, Data Marts
- **Data Quality & Governance:** Data Validation, Reconciliation, Schema Checks, Data Integrity, Access Controls
- **BI & Reporting:** Power BI (DAX, Power Query), Tableau, Excel (Pivot Tables)
- **Dev & Delivery:** Git, CI/CD, Documentation, Runbooks, Monitoring & Alerting, SLA Tracking
- **GenAI Tools:** Lang Chain, OpenAI API, Prompt Engineering

EXPERIENCE:

Data Engineer – Northern Trust, USA

Jun 2023 - Present

- Built and maintained end-to-end data pipelines in **Azure** for **financial data** from **10+ upstream sources**, improving pipeline **success rate to 99%** and reducing data availability time by **30%**.
- Developed scalable **Spark** and **SQL** transformations for **finance reporting datasets**, cutting batch runtimes by **40%** and lowering compute cost by **20%** through partitioning, optimized joins, and incremental processing.
- Orchestrated **SLA-driven workflows** for critical finance reporting using scheduling, alerts, and automated retries, reducing production incidents by **30%** and improving **MTTR by 25%**.
- Implemented reconciliation and data quality controls for financial feeds, reducing downstream defects by **40%** and improving **stakeholder acceptance to 95%** for key datasets.
- Delivered curated, warehouse-ready **finance data models** powering **Power BI** reporting, improving query performance by **25%** and supporting **50+ business users** with consistent definitions and trusted metrics.
- Built a **GenAI** assistant using **LangChain** and **OpenAI** to streamline internal finance data discovery and **Q&A**, reducing analyst lookup time by **40%** and supporting **100+ queries per week** with **90%** positive feedback.

Data Analyst – Tata Consultancy Services, India

APR 2021 – AUG 2022

- Owned **end-to-end KPI** reporting and analysis by querying relational datasets in **SQL** and creating reusable data pulls, improving reporting accuracy by **20%** and reducing monthly close reporting cycle time by **35%**.
- Built and enhanced executive-ready **Power BI** and **Tableau** dashboards that **consolidated 8 recurring reports** into a single source of truth, **cutting manual effort by 28%** and supporting **60+ active users**.
- Automated recurring data preparation and validation workflows **SQL** and scripting to eliminate manual steps, **saving 10 hours** and improving on-time delivery from **85% to 97%**.
- Partnered with **Operations, Finance, and Product** to define requirements and **standardize KPI** definitions into actionable analytics deliverables; supported **15 ad-hoc requests/month** and reduced rework by **25%** through tighter scope alignment.
- Improved data quality and integrity by implementing checks for duplicates, nulls, and outliers and driving root-cause analysis with upstream teams, reducing data defects by **22%** and lowering incident volume by **20%**.
- Delivered insight-driven recommendations through deep-dives (segmentation, funnel/variance analysis, cohort tracking) that informed 2 product changes, contributing to **10% improvement in key operational KPIs** such as **SLA adherence**.

Junior Data Analyst – Tata Consultancy Services, India

AUG 2020 – MAR 2021

- Supported monthly KPI reporting by extracting and validating data in **SQL/Excel** and delivering standardized summaries for business **stakeholders**, reducing reporting turnaround time by **22%** and improving on-time delivery from **75% to 80%**.
- Assisted in building and maintaining **BI dashboards** for product metrics, helping stakeholders **cut manual analysis by 33%** and increasing dashboard adoption to **50+ active users**.
- Helped improve data quality by performing routine checks and documenting data definitions; **reduced data errors by 18%** and decreased escalations by **15%**.
- Supported **ad-hoc analysis** requests by **preparing datasets, running cohort segmentation** and basic statistical summaries, and presenting insights in concise slides, contributing to **3 process improvements** that saved **6 hours/week** for the team.
- Assisted **ETL/data** refresh activities by coordinating with engineering team, monitoring scheduled loads, and maintaining runbooks, helping improve refresh reliability to **91% successful runs** and reducing incident resolution time by **20%**.

EDUCATION:

University of Massachusetts, Boston

Aug 2022 - May 2024

Master of Science in Business Analytics – Big Data Analytics
