

## SUMMARY

- Business Analyst with over 3+ years of experience in requirement gathering, business process modeling, and project management.
- Demonstrated ability to optimize processes through gap analysis, risk analysis, and ERP systems implementation.
- Proven leader in cross-functional collaboration, effectively bridging gaps between business and technical teams to deliver high-quality solutions that meet both user and stakeholder needs.
- Proficient in using tools such as JIRA, HP ALM, and Asana to streamline workflows, while leveraging Power BI and Tableau for actionable insights.
- Proven track record of collaborating with QA and development teams to enhance project deliverables, improving productivity by up to 20% in previous roles.

## EXPERIENCE

|                                   |                           |
|-----------------------------------|---------------------------|
| <b>PNC Financial Services, CO</b> | <b>Jan 2024 – Current</b> |
| Business Analyst                  |                           |

- Increased team productivity by 10% using Kanban boards to visualize workflow and identify bottlenecks.
- Reduced project delays by 15% by implementing a risk analysis framework, identifying potential bottlenecks early, and ensuring proactive communication with stakeholders.
- Facilitated effective sprint planning meetings, achieving a 95% completion rate of sprint goals.
- Optimized business process workflows, saving 12+ hours of manual work per week by automating repetitive tasks and integrating real-time data feeds with Power BI dashboards.
- Established wireframes for the customer onboarding process, reducing clarification questions from stakeholders by 20%.
- Utilized JIRA workflows to track and manage user stories/requirements, successfully delivering the e-commerce platform redesign 2 weeks ahead of schedule.
- Created and maintained user flows and wireframes in Balsamiq to communicate user journeys for the mobile app redesign.
- Implemented Power BI gateways for secure real-time data visualization by connecting to on-premises data sources.
- Improved data retrieval efficiency by 30% through SQL query optimization and analysis of large datasets from MySQL.

|                                   |                            |
|-----------------------------------|----------------------------|
| <b>Zensar Technologies, India</b> | <b>Jan 2020 – Jul 2022</b> |
| Junior Business Analyst           |                            |

- Created BPMN diagrams to document and analyze business processes, identifying inefficiencies and improving communication.
- Enhanced user satisfaction scores by 25% through continuous feedback loops and improved requirement documentation, ensuring a seamless transition during the CRM system upgrade.
- Led JAD sessions with 20+ stakeholders, achieving 80% agreement on user requirements within a single session.
- Facilitated cross-functional collaboration between development, QA, and product teams, improving overall team efficiency by 18% and reducing project turnaround time.
- Conducted multiple user interviews to gather requirements for shopping cart functionality, and created detailed user stories.
- Migrated legacy reports to Tableau, improving data accessibility and enabling data-driven decision-making for 5 departments.
- Used JIRA reporting to identify and resolve potential roadblocks, ensuring timely delivery for the CRM system upgrade project.
- Streamlined project communication by creating interactive flowcharts and diagrams in Lucidchart to visualize complex workflows.
