SUMMARY

Data Analyst with expertise of 4+ years in AWS, ETL processes, and data cleaning techniques. Proficient in conducting thorough data analysis to extract valuable insights for informed decision-making. Skilled in leveraging Power BI and other visualization tools to present complex data in a clear and actionable manner. Experienced in optimizing data workflows and ensuring data quality.

SKILLS

Methodologies: Agile, Waterfall

Language: Python, R, SQL

ML Algorithm: Linear Regression, Logistic Regression, Supervised Learning, Unsupervised Learning, Classification, SVM, Random Forests, Naive Bayes, KNN

Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow

Databases: Oracle SQL, MySQL, PostgreSQL, MongoDB

Tools: Visual Studio, Power Bi, Tableau, Git, Ansible, Chef, AWS CDK, MATLAB, Eclipse, Jupyter Notebook, Cloud endure, Android Studio, Kafka, Jira

Big Data technologies: Hadoop, Apache Airflow

Cloud Technologies/Services: AWS, Microsoft Azure, Azure Data Bricks, Azure SQL Database, Akamai, Microservices, Snowflake, SAAS, GCP, BigQuery

Operating System: Windows, Linux

EXPERIENCE

Data Engineer | United Healthcare Group, USA

May 2023-Present

- Established a data platform from scratch, an activity that Influenced the project's requirement gathering and analysis phase and documenting the business requirements.
- Executed data mining using R and SAS to perform statistical tests, including hypothesis, which upgraded data accuracy by 15%.
- Conducted machine learning experiments and settled predictive models, uncovering insights that increased business forecasting accuracy by 25%.
- Leveraged Google Cloud Platform tools like BigQuery to process and analyze large-scale datasets, optimizing data workflows and reducing processing time by 30% through efficient resource allocation and parallel processing.
- Delivered technical guidance and support to cross-functional teams on AWS architecture and best practices, resulting in a 15% improvement in team efficiency.
- Improved decision-making processes with the help of Power BI dashboards associated with Azure services that provide real-time data insights.
- Employed Hadoop-based solutions for processing and storing large datasets, enhancing data scalability by 40% and reducing data processing time by 30%.

Data Engineer | Metlife, USA

March 2019-April 2022

- Implemented data pipelines using AWS services, ensuring efficient data ingestion, processing, and storage.
- Optimized ETL processes to extract, transform, and load data from sources into centralized data warehouses using Python and SQL.
- Conceptualized Power BI's DAX (Data Analysis Expressions) language to perform complex calculations and create custom measures and KPIs.
- Analyzed services offered by Azure like Flash Storage, Information Factory, and Synapse Analytics, deliberate scalable data pipelines that enhanced data accessibility and reliability by 35%.
- Developed MapReduce algorithms to process large-scale datasets, increasing data processing efficiency by 40% and reducing computation time by 30%.
- Formulated complex SQL queries to retrieve data from relational databases, accelerating query performance by 50%.
- Revamped data workflows with PySpark, reducing execution time by 35% and ensuring scalable processing for datasets up to 1.5TB, thereby enhancing the data team's productivity by 25%.
- Managed Apache Airflow DAGs for orchestrating complex ETL workflows, increasing job scheduling efficiency by 25% and reducing workflow errors by 20%.
- Executed data processing and analysis using Pyspark, optimizing performance and scalability of data workflows.
- Wrote Terraform scripts in the deployment manager to spin up resources in AWS, optimizing resource provisioning efficiency by 40%.
- Incorporated Alteryx for data blending and advanced analytics, streamlining complex data workflows and reducing data preparation time by 35%.

EDUCATION

Master of Science, Data Science & Engineering | The City College of New York

May 2024

Bachelor of Science, Physics | Eden Mohila College of The University of Dhaka

February 2019
