Denton, TX | 940-363-9250 | swethakothamasi672@gmail.com | <https://www.linkedin.com/in/swetha-kothamasi-151575216/>

CAREER PROFILE

Computer Science graduate with hands-on experience in Power BI, Tableau, SQL, and data modeling, skilled in building dashboards, writing optimized queries, and supporting BI solutions using modern analytics tools and cloud platforms.

EDUCATION

University of North Texas, Master of Science | Computer Science

Aug 2023-May 2025

GPA: 3.41

Relevant Coursework: Fundamentals of Database Systems, Fundamentals of Artificial Intelligence, Cybersecurity Essentials, Computer Algorithms, Software Engineering, Computer Networks, Wireless Networks and protocols, Big Data and Data Science, Data Modelling, Data Analytics.

EXPERIENCE

Data Analyst - JETA SOFTWARE (INDIA) PRIVATE LIMITED | Hyderabad, India

Jan 2022- June 2023

- Designed and deployed Power BI and Tableau dashboards, reducing reporting turnaround time by 45%.
- Automated reporting pipelines using Python and SQL, cutting manual effort by 60% and saving 10+ hours weekly.
- Managed ETL processes and data transformations for large datasets, ensuring 99% accuracy and consistency.
- Refined SQL queries and BI reports, improving performance by 35% and enabling faster self-service BI adoption.

Data Analyst Intern - JETA SOFTWARE (INDIA) PRIVATE LIMITED | Hyderabad, India

June 2021- Dec 2021

- Created and maintained Power BI and Tableau dashboards, improving report accessibility by 30% for internal teams.
- Wrote and enhanced SQL queries for data extraction and transformation, reducing execution time by 25%.
- Assisted in data cleaning and validation for 1M+ records, enhancing data accuracy by 40% and supporting scalable reporting.

PROJECTS

Shopsquare

Jan 2025 – Apr 2025

- Developed a secure e-commerce platform with multi-factor authentication, enhancing user security and trust.
- Integrated Stripe and PayPal payment gateways, ensuring seamless transactions and fraud prevention.
- Applied AES encryption and SSL/TLS protocols to strengthen data security and prevent unauthorized access.

TA Management Suite

Feb 2024 – May 2024

- Built scalable backend services using Python (Django) and PostgreSQL to streamline TA scheduling and workload management for 500+ users.
- Formulated RESTful APIs for seamless integration, ensuring 99.9% uptime and consistent performance.
- Resolved backend performance bottlenecks, reducing downtime by 25% and accelerating delivery by 15%.

Online Leave Management System

Feb 2023 – Apr 2023

- Initiated a web-based leave management platform using HTML, CSS, JavaScript, PHP, and MySQL to automate request and approval workflows.
- Implemented real-time notifications and tracking, reducing manual processing time by 50% and enhancing HR efficiency.
- Drafted documentation for seamless onboarding and smooth deployment, reducing setup time by 30%.

EyeBall Cursor Movement Using OpenCV

Sep 2022 – Apr 2023

- Designed a hands-free mouse control system using OpenCV, enabling cursor movement through eye-tracking to improve accessibility for mobility-impaired users.
- Enhanced detection algorithms, reducing latency by 40% and improving model reliability by 30%.
- Delivered a fully functional solution within 2 weeks, resulting in an effective assistive technology tool.

TECHNICAL SKILLS

- Programming & Data Processing:** Java, C, C++, C#, Python, JavaScript, HTML, CSS, SQL, Django, RESTful APIs, Agile, SDLC, Test-Driven Development (TDD), Unit Testing, Integration Testing.
- Data Visualization & BI Tools:** Power BI, Tableau
- Databases & Backend Technologies:** MySQL, PostgreSQL, Oracle
- Tools & Platforms:** Visual Studio, Git, VMware, AWS
- Operating Systems:** Windows, Linux, Android

CERTIFICATIONS

- Programming Essentials in C and Python(cisco)
- Programming Essentials in C++(cisco)
- Programming Essentials in Networking(cisco)
- Database Programming with SQL(Oracle)
- Data Science Math Skills(Coursera)
- NPTEL certificate in C.

EXTRACURRICULAR ACTIVITIES

Participated in 36-hrs tech Hackathon Organized at VJIT
