BIOGRAPHY

A hardworking and energetic software aspirant who believes that hard work never goes in vain. I have extensive experience developing web applications, showcasing a solid proficiency in front-end and back-end technologies. I look forward to exciting challenges that allow me to use my interest in and experience with growing sustainability efforts.

EDUCATION

University at Buffalo, New York

Aug 2022 – Jan 2024

Master of Science in Computer Science and Engineering , CGPA: 3.2 / 4.0

Koneru Lakshmaiah Education Foundation - Vijayawada, India

June 2017 – May 2021

Bachelor of Technology in Computer Science and Engineering, CGPA: 9.3 / 10.0

SKILLS

Programming Languages : JavaScript, Python, Java, SQL, C,C++, Solidity, Socket Programming

Web Technologies : React, HTML, HTML5, XML, CSS, CSS3, Angular,Node.js

Tools : VSCode, GIT, Jupyter Notebook, RPA, ServiceNow, Hadoop, Eclipse, AutoCAD, Adobe, Matlab.

Cloud Platforms : Google Cloud Platform (GCP), Amazon Web Services (AWS), SAP Cloud Platform

WORK EXPERIENCE AND INTERNSHIPS

Software Intern

Sep 2020 - Aug 2021

Agile Solutions

Bangalore, India

- Integrated one of the company's projects with Microsoft platforms and Amazon Web Services, and also developed a leave tracker application using Microsoft services.

Software Engineer

Sep 2021 – Aug 2022

Agile Solutions

Bangalore, India

- I worked as a full-stack developer and led a team for one year. I also contributed in developing a component which helps to migrate data from one service to another, Data Collection, and generating reports based on data within the Tax Intelligence and Management Platform (TIMP) using JavaScript, SAP UI5, and SAP XSJS.

Student Peer Mentor

Dec 2018 - May 2019

Koneru Lakshmaiah Education Foundation

Vijayawada, India

- Studied and analyzed different types of algorithms by executing on real-world problems. Helping peers perform lab Experiments on the Design and Analysis of Algorithms course and by Building Course background, L-T-P structure.

Machine Learning With Python - Intern

May 2021 - June 2021

Goeduhub Technologies

Jaipur, India

- It is a 45-day online program that offers training in the fundamentals and libraries of Python, and includes building machine learning models for classification, regression, and clustering tasks.

RESEARCH AND PROJECTS

TIMP (Tax Intelligence and Management Platform) application using SAP ABAP

Nov 2021 - Aug 2022

Agile Solutions

- Worked on Enhancements of TIMP application and migrating TIMP application from Classic version to Advance XS version using Advanced Migration tool from SAP platform. Also contributed to the development of Implementing SAP CAP Model.

Retrieval Augmented Generation (RAG) on Novels (Chat Application using React and Node.js) Aug 2023 - Dec 2023

University at Buffalo

- Developed a Q/A bot to interact with users about a collection of novels. This interactive bot, developed using OpenAI's advanced models, enables users to engage in casual conversations or inquire about specific novels. Upon receiving a user's query, the bot intelligently responds with relevant information, enhancing the user experience by providing detailed insights.

Adaptive Compaction Generational Collector - Jikes RVM

Aug 2023 - Dec 2023

University at Buffalo

- Developed Adaptive Compaction-Generational Collector in Jikes RVM to address memory fragmentation issues within generational garbage collection. This involves integrating adaptive compaction strategies based on heap fragmentation and allocation patterns. The primary goals are to optimize memory management, minimize fragmentation, and reduce pause times during garbage collection cycles.

Terminal-based Chat Application using Socket Programming in C

Aug 2022 - Dec 2022

University at Buffalo

- Created a command-line chat application using C language and Socket Programming. Utilized a range of servers to support live user interactions. Demonstrated comprehensive expertise in network programming and basic system functionalities.

A Mini Project on Ethereum Smart Contract using Solidity

Aug 2019 - Nov 2019

Koneru Lakshmaiah Education Foundation

- Ethereum is a platform that is built specifically for creating smart contracts. Smart contracts can store information about an application, such as domain registration information or membership records.

Comparative Study on Blowfish and Twofish algorithms for Image Encryption and Decryption Feb 2020 - July 2020

Koneru Lakshmaiah Education Foundation

- Research done on Comparison of two encryption algorithms Blowfish and Twofish by encrypting and decrypting different types of image files. Also published a journal in International Research Journal of Engineering and Technology (IRJET), Nov 2020.

ACHIEVEMENTS

SAP Certified Development Associate - SAP BTP Extensions with SAP Cloud Application Programming Model

- I have gained substantial expertise in the SAP Extension Suite, significantly enhancing my capabilities in SAP Cloud Application development, and expanding my technical proficiency in enterprise application solutions.

Certified System Administrator - ServiceNow

- The Certification tests the skills and essential knowledge necessary to manage the configuration, implementation, and maintenance of the ServiceNow platform.

Certified RPA Developer - UIPATH

- The Certification has been tested on UIPATH best practices and demonstrated their application to develop a software robot.

Silver Medal - Hackerrank

- Awarded silver medal for good performance in Week of code 36 December 2017 contest on Hackerrank.

Certifications Completed

- Oracle Certified Associate in Java, Uipath Diploma Certified, Oracle Certified Associate in SQL.

EXTRA-CURRICULAR ACTIVITIES

Event Management Memeber - Samyak

- Organized one of the Technical Events in Samyak. Experienced in Planning, Budgeting and Arranging events.

Volunteer @ National Service Scheme (NSS)

- Created Awareness on Education among rural women. Also Organised various cleanliness drives and Demonstrated a couple of technologies to rural school kids
