Charlotte, NC, USA | jagadeeswarik27@gmail.com | +1 (980) 272-8668

PROFESSIONAL SUMMARY

- Front-End Developer with **3+ years of experience** specializing in Angular, React.js, and JavaScript for building dynamic and scalable web applications.
- Strong expertise in **UI/UX design, responsive layouts, and performance optimization**, achieving 90%+ test coverage and 95%+ Lighthouse performance scores.
- Skilled in developing **scalable workflow execution systems**, intelligent layout algorithms, and **dynamic form builders** for complex business processes.
- Hands-on experience integrating **secure authentication and RBAC** with OAuth2, JWT, and multi-factor authentication (MFA).
- Proficient in **data visualization** using Chart.js and custom reporting engines for financial and workforce analytics.
- Experienced in **RESTful API integration** for real-time synchronization across payroll, recruitment, and administrative modules.
- Delivered **cross-browser compatible** and **mobile-first designs**, ensuring seamless accessibility across devices.
- Proven track record of **mentoring junior developers**, improving code quality, and accelerating team delivery.
- Adept in **CI/CD pipelines, automated testing (JUnit, Selenium), and version control (Git)** for reliable deployments.
- Demonstrated ability to collaborate with cross-functional teams to deliver **enterprise-grade solutions** with 99.9% uptime and measurable business impact.

EDUCATION

Master of Science (MS)

August 2023 - May 2025

Computer Science | **3.6 / 4.0**

Texas A&M University, Corpus Christi (USA)

Bachelor of Technology (B. Tech)

July 2019 - May 2023

Electronics and Communication Engineering | **8.8 / 10.0**

Sri Chandrasekharendra Saraswathi Viswa Mahavidyalaya University, Kanchipuram (India)

SKILLS

Programming Languages: TypeScript | JavaScript (ES6+) | HTML5 | CSS3 | SCSS

Frameworks & Libraries: React.js | Angular | Node.js | Express.js | Next.js | Redux | Bootstrap | Tailwind CSS

APIs & Data: RESTful APIs | GraphQL | Axios | JSON | WebSockets

Build & DevOps Tools: Webpack | Vite | Rollup | Docker | Jenkins | Git | GitHub | GitHub Actions | CI/CD

Testing & Quality: Jest | Mocha | Cypress | Postman | ESLint | SonarQube | Unit & Integration Testing

Architecture & Patterns: MVC | Component-Based Design | Clean Architecture | Design Patterns (Observer, Singleton, Factory)

Methodologies: Agile/Scrum | Sprint Planning | Peer Code Reviews | Continuous Integration | Documentation

EXPERIENCE

Software Engineer
Kyndryl | USA

June 2024 - May 2025

Technologies: Javascript, Angular, MongoDB

Responsibilities:

- Designed, developed, and maintained scalable TypeScript-based web applications for enterprise clients.
- Created reusable UI components with React and TypeScript, adhering to functional programming and clean architecture principles.
- Integrated front-end components with RESTful APIs and GraphQL endpoints, ensuring smooth data flow across modules.
- Implemented state management using Redux and Context API to maintain predictable app behavior.
- Applied responsive design principles with CSS3, Flexbox, and Grid to ensure multi-device compatibility.
- Collaborated with UX designers to translate Figma wireframes into interactive, accessible interfaces.
- Refactored legacy JavaScript codebases to modern TypeScript syntax, improving readability and maintainability.
- Optimized front-end build performance using Webpack and Vite, reducing bundle sizes by 25%.
- Conducted unit and integration testing using Jest and Cypress to validate component reliability and performance.
- Participated in Agile sprint cycles, contributing to planning, retrospectives, and continuous improvement sessions.
- Managed Git version control workflows, handled branching strategies, and conducted peer code reviews.
- Troubleshooted and debugged production issues, ensuring quick resolution and minimal downtime.
- Configured CI/CD pipelines for automated build and deployment to staging and production environments.
- Ensured adherence to security best practices and code quality standards through linting and code scans.
- Worked with backend developers to standardize API contracts and improve data consistency.
- Mentored junior developers on TypeScript typing, async programming, and component lifecycle optimization.

Front End Developer

January 2022 - June 2023

CGI Information Systems and Management Consultings | INDIA

Technologies: Javascript, ReactJS, MongoDB, Chart.js

Responsibilities:

- Developed full-stack web applications using Angular and Node.js, focusing on front-end responsiveness and backend integration.
- Created interactive dashboards and form-driven interfaces using Angular Material and Bootstrap.
- Implemented RESTful APIs in Node.js and Express for seamless data exchange between client and server.
- Developed modular Angular services and directives, enhancing code reusability and maintainability.
- Used RxJS Observables and Promises for managing asynchronous data streams in Angular apps.
- Optimized performance by applying lazy loading, caching, and dynamic imports, reducing load times by 30%.
- Designed and executed SQL and NoSQL queries to support dynamic data operations.
- Conducted unit testing using Mocha and Karma for both front-end and backend validation.
- Integrated CI/CD pipelines using Jenkins for automated build, test, and deployment workflows.
- Collaborated in Agile sprints, providing technical input for feature estimation and risk assessment.

- Documented modules, API interfaces, and component libraries for easy onboarding and reuse.
- Implemented error handling and validation logic to enhance data integrity and user experience.
- Managed source control using Git and participated in peer reviews to maintain consistent coding standards.
- Collaborated cross-functionally with QA, design, and DevOps teams to deliver high-quality releases.
- Delivered multiple releases ahead of schedule while maintaining >95% customer satisfaction.

PROJECTS

Cross Border Connect

Technologies: React.js, MongoDB, Firebase

Responsibilities: Implemented Firebase authentication with role-based access control, allowing customers to connect with agents based on location. Developed a real-time order management system with status tracking, integrated live chat with notifications, and enabled secure Stripe payments with a 10% convenience fee. Optimized UI using React.js and Tailwind CSS, improved API efficiency with Node.js and Express.js, and connected multiple MongoDB databases for scalability. Added live order tracking, a prohibited items page, and secure token expiration handling for enhanced security and performance.

Amazon Price Guard

Technologies: Python, BeautifulSoup, GitHub Actions

Responsibilities: Developed a web scraping bot with BeautifulSoup to track Amazon prices, sending automated email alerts via SMTP for price drops. Integrated weekly analytics with Matplotlib, automated price checks using cron jobs, and CI/CD with GitHub Actions for seamless deployment and scheduling.

Instagram Reel News

Technologies: Python, Serper API, OpenAI API, MoviePy

Responsibilities: Developed an automated system for generating daily tech news reels by fetching news via Serper API and summarizing content with OpenAI's AI. Used a Hugging Face model for AI-generated backgrounds and MoviePy to create video reels with overlaid text. Automated Instagram uploads via the Instagram Graph API for seamless daily posting.
