Legally Authorized to Work in the USA

PROFESSIONAL SUMMARY

Detail-oriented **Software Development Engineer in Test (SDET)** with 1 year of experience in implementing **Manual and Automation Testing** as a Quality Analyst within the CRM industry. **Result-driven, cross-functional** team member, who is able to work independently or collaboratively with the development team to identify, report and validate **defects**.

WORK HISTORY

CrmTeractive

Software Development Engineer in Test (SDET),

February 2024 – Present

- Followed Agile development SDLC methodologies and participated in Scrum Meetings.
- Created and maintained Hybrid Automation Framework that is based on Page Object Model, Behavior Driven Testing using Selenium WebDriver, JUnit, Cucumber and Maven.
- Conducted API testing with RestAssured and Postman to validate RESTful services.
- Managed project dependencies and builds with Maven while using Jira as an issue/defect tracking and project management tool for designing and creating Test Scenarios and Test Cases manually.
- Implemented BDD frameworks with Cucumber and Gherkin to improve collaboration with stakeholders.
- Integrated test automation suites with Jenkins for continuous integration and delivery.
- Executed SQL queries for data validation across Oracle, MySQL, and PostgreSQL databases.
- Applied the Page Object Model (POM) design pattern to enhance test script maintainability.

Libsko

QA Analyst,

September 2023 – January 2024

- Performed Manual Testing of Web-based applications.
- Created detailed Test Cases in Jira based on Business Requirements, technical specifications and linked them to the appropriate user stories.
- Assisted in development of automated test cases using Java and Selenium WebDriver.
- Participated in functional and regression testing, identifying, and reporting defects.
- Contributed to integration of automated tests within Jenkins CI/CD pipeline.

- Collaborated with cross-functional teams to ensure comprehensive test coverage and adherence to requirements.
- Executed API tests using Postman to validate backend services.
- Enhanced test documentation and maintained detailed records of test cases in JIRA.
- Assisted in conducting SQL queries for backend data validation.

EDUCATION

Certification & Training

Software Development Engineer in Test (SDET)

CYDEO 2023-2024 - McLean VA

SKILLS

- Testing Tools: **Selenium WebDriver, Cucumber, Maven, Jenkins, TestNG, Junit, RESTAssured Library**
- Languages: **Java, HTML, SQL, Gherkin**
- Database: **Oracle, MySQL, PostgreSQL**
- IDE: **IntelliJ IDEA**
- Version Control System: **Git, Github**
- Browser: **Google Chrome, Safari, Firefox, Microsoft Edge**
- Framework: **BDD, DDT, Hybrid, POM Design Pattern**
- Operating System: **MacOS, Window**

SIGNIFICANT CONTRIBUTIONS

- Automated key regression tests, reducing manual testing efforts by 50%.
- Improved the reliability and coverage of test automation suites, contributing to faster release cycles.
