● GPA: 3.42

EXPERIENCE**Data Analyst Intern**, Dexwell, Carlsbad, California

03/2024 - Current

Dexwell is a global software development company specializing in custom solutions and web applications for businesses of all sizes mostly focused on Environmental health and Sustainability.

- As an EDA expert, I gathered and analyzed over 100 GB of data, identifying key trends and insights that significantly improved decision-making processes and strategic planning.
- Presented complex data findings effectively to both the CEO and CTO, facilitating informed decision-making and strategic planning.

Systems Engineer, Infosys, India

02/2021 - 07/2022

Infosys is a global leader in consulting, technology, and next-generation digital services, headquartered in India, employing over 300,000 professionals worldwide.

- Directed and streamlined operations for 18 projects as an internally certified Business Intelligence Associate, overseeing SharePoint and enhancing system functionality by 30% in Microsoft Power Platform.
- Spearheaded workshops on M365 platform adoption, leading to savings of 14 hours per month for around 1000 clients through specific implementations.
- Oversaw the development and launch of 12 power applications, resolved 50+ tier 1 level issues in Power Applications and Power Automate, and designed a system that improved stability and responsiveness by 30%.
- Trained 8 different teams which were ready for Knowledge Transfer and gave multiple presentations to multiple VP's, Directors and Managers.
- Took the initiative to spearhead a team to engineer an alternative to "Google Maps," utilizing plugins and APIs to support 1,000 locations, ultimately reducing user search time by 25%.
- As a Team Lead managed to get all the team members to achieve 90% competency in languages like JavaScript and Angular, as per the project evaluation report, and securing full-time roles at Infosys.

Business Analyst Intern, White-Leo Industries, India

03/2020 - 06/2020

Whiteleo is a multi-faceted global company offering a diverse range of services, including business solutions, waste management, e-commerce, and more, tailored to meet modern client needs with a focus on technology and customer satisfaction.

- Initiated and led a team to craft a "WilStop" marketing strategy, getting a 20% extra reach and 15% sustained post-Covid growth.
- Piloted a survey of 250 consumers, gaining actionable insights into grocery buying habits and preferences to shape future strategy.
- Created a comprehensive 80 Page document, projecting a growth rate of 22.7 percent by improving the deployment strategy.

RECENT PROJECT**Data Analyst**, Business Intelligence, University of California San Diego

03/2023

- Utilized regression, neural networks, random forests, and XGBoost to predict customer responses and profitability via campaigns.
- Fine-tuned each model to optimize predictive accuracy and crafted individualized predictions for customers.
- Enhanced the analytical phase, leading to more precise customer engagement strategies lead to a profit of 802,010.

Thesis, Colombian Business Landscape, University of California San Diego

12/2023

- Developed and evaluated predictive models tailored for rating 294,462 businesses in the Colombian market, enhancing market efficiency by utilizing advanced machine learning techniques, including Logistic Regression, Random Forest, and a customized deep learning model via TensorFlow's Keras API.
