

Vaishnavi M
SQL BI Developer
Vaishnavi.m3948@gmail.com
(940) 305-6715

SUMMARY

- Experienced SQL BI Developer with 4+ years of expertise in SQL Server, Business Intelligence (BI) tools, and Data Analytics to drive business decision-making.
- Expertise in Database Design, Development, Implementation and Support of MS SQL Server 2016/2019/2022 and suite products like SSIS, SSRS, and SSAS.
- Extensive Experience in creating, configuring and Fine-tuning ETL workflows designed between Homogeneous and Heterogeneous Systems using DTS and SSIS of MS SQL.
- Ability to deliver comprehensive Business Intelligence through integration of BI suite of products (SSIS, SSRS, SSAS) including MS solutions like MS EXCEL, Microsoft Office.
- Skilled in Data warehousing tools, Data Mapping, Unit Testing, Migration, Conversions, and Process Documentation.
- Experience in designing and implementing ETL processes using SSIS, including data extraction, transformation, and loading (ETL) for efficient data flow.
- Excellent in writing T-SQL, working on DTS, SSIS, SSRS, SSAS, Data Cleansing, Data Scrubbing and Data Migration, also created Indexed Views, complex Stored Procedures, Triggers, effective functions to facilitate efficient data manipulation and data consistency.
- Highly Proficient in T-SQL DDL/DML, perform most of the SQL Server Enterprise Manager and Management studio functionality using T-SQL Scripts.
- Skilled in creating virtualization reports using Power BI.
- Extensive experience with data modeling, logical and physical database design using Erwin.
- Experience in using tools like Database engine tuning advisor, SQL Profiler, and Windows Performance Monitor for Monitoring and Tuning MS SQL Server Performance.
- Thorough understanding of Kimball's theory, KPIs and Perspective, Data mining structures.
- Experience in deploying reports on SharePoint Server using SharePoint Integrated Mode.
- Advanced extensible reporting skills using SQL Server reporting services (SSRS). Created & formatted Cross-Tab, Conditional, Drill-down, Top N, Summary, Form OLAP, Sub reports, ad-hoc reports, parameterized reports, interactive reports & custom reports.
- Experience in providing SSRS server level, item level Security & Accessibility to various reports in multi-user environment.
- Involved in Database Design, Data modeling, Development, Implementation, ETL and Reporting in SQL Server. In depth understanding of SQL Server Migrations and problem management.
- Creating and deploying parameterized reports using Power BI and Tableau.
- Experience in enhancing and deploying the SSIS Packages from development to production server.
- Good SQL Server Administration skills including, Backups, Restore, database maintenance, user authorizations and Database creation.
- Responsible to maintain the efficiency of the software and applications that run on UNIX system.
- Hands-on Experience in MDX & DAX Expressions, Power BI Power Pivot, Power integrated with Share Point and in creating dashboards in Power BI and Tableau visualization tools.
- Performed time series analysis using DAX expressions in Power BI, skilled in creating measures, calculated columns and performing time series analysis using DAX in Power BI.
- Experience in Migrating Data from an older version to newer version of MS SQL Server.
- Experienced in installing and configuring Reporting services and assigning permissions to different levels of users in SSRS.
- Excellent knowledge & experienced in creating databases, tables, stored procedures, DDL/DML Triggers, Views, User defined datatypes, effective functions, cursors and indexes using T-SQL.
- Experienced in creating interactive dashboards and scorecards utilizing Power BI.
- Hands on experience in MS Power BI desktop and Power BI service.
- Worked on Azure logic Apps to integrate Power BI and pass the data into Streaming Dataset using Power BI POST API.
- Hands on Experience in Data Migration from MS SQL Server to Oracle ERP Systems.

EDUCATION

- Master's Degree in Computer Science, University of North Texas, Denton, TX

TECHNICAL SKILLS

Databases	SQL Server (2016/2019/2022), MySQL, PostgreSQL
Operating Systems	Windows 10/8/7, LINUX , UNIX OS
Language	SQL, T-SQL, UNIX, PL/SQL, Python, Java, Bash/Shell Scripting
Database Tool	SQL Profiler, SSMS, Database Engine Tuning Advisor
Data Modeling Tools	Erwin, Red gate, Lite Speed
Design Methodologies	Logical and Physical Database Design, UML (Unified Modeling Language), Database Design and Normalization, Data Modeling.
BI Suit & Reporting Tools	SSIS, SSRS, SSAS, Crystal Reports, Dashboard Reports, Power BI (DAX, Power Query, Paginated Reports), Tableau, Qlik Sense
ETL & Data Integration	DTS, Azure Data Factory, Informatica PowerCenter, Talend, Apache Nifi
Data Warehousing & OLAP	Dimensional Data Modeling (Star & Snowflake Schema), Azure Synapse, Google BigQuery, Amazon Redshift
Other Tools	Erwin, Visio, Visual SourceSafe, MS Office Suite, Git, Jnkins, Docker & Kubernetes, Liquibase/ Flyway
Cloud & Big Data Technologies	Microsoft Azure (Azure SQL Database, Synapse, ADF, Logic Apps), AWS (RDS, Redshift, Glue, QuickSight), Google Cloud Platform (BigQuery, Cloud Functions), Snowflake Data Cloud

PROFESSIONAL EXPERIENCE

SQL BI Developer

UT Southwestern Medical Center

Jul 2023 - Present

Dallas, TX

Responsibilities:

- Designed and optimized complex SQL queries and stored procedures for data extraction, transformation, and loading (ETL) processes, improving query performance.
- Developed & maintained highly scalable ETL pipelines using SQL-based solutions, processing millions of records daily.
- Increased the speed and performance of Excel reports by restructuring Power BI.
- Engineered data models, schemas, and indexing strategies in relational databases like SQL Server, PostgreSQL, and MySQL to optimize data retrieval.
- Optimized performance using partitioning, indexing, and query tuning to speed up data processing.
- Built and automated ETL workflows using SQL, Python, and Apache Airflow, ensuring seamless data integration across multiple sources.
- Created PowerBI reports to provide metrics in pursuance of the supply chain data analytics implementation using the DAX, power query and SQL queries.
- Expertise in writing complex DAX functions in Power BI and Power Pivot.
- Work on SSIS performance tuning using counters, error handling, event handling, and re-running of failed SSIS packages using checkpoints.
- Developed and optimized ETL processes using IBM DataStage to integrate and transform large volumes of healthcare data from multiple sources into the data warehouse.
- Skilled in Data Warehousing concepts, Star and Snowflake Schema design, and implementation of OLAP Cubes using SSAS (SQL Server Analysis Services).

- Used various sources to pull data into Power BI such as Sql Server, SAP BW, Oracle, SQL Azure etc.
- Used Python for data analysis and data visualization as well as worked on different libraries like NumPy, metaplot, seaborn, pandas.
- Analyse and present data to help the company make important decisions by performing DAX queries using Power BI tools.
- Created calculated columns and measures using DAX queries in Power BI based on report requirements.
- Utilized Power BI Gateway to keep dashboards and reports updated with on-premise data sources, while managing report sharing and workspaces in Power BI Service.
- Troubleshooting within SQL codes, SSIS Packages, and SSRS as required. Work as a collaborative team member using software development life cycles (SDLC) including analysis of business functions, design, development, testing, and documentation as required by end-users.
- Enhancing and deploying the SSIS packages from the development server to the production server and scheduled jobs for executing the stored SSIS packages which were developed to update the database daily/Weekly/Monthly basis.

Environment : SQL & Database Development, Query optimization & performance tuning, and database schema design, Microsoft SQL Server, PostgreSQL, MySQL, ETL development, Apache Airflow, ETL processes, Power BI (DAX, Power Query, Power Pivot), SAP Crystal Reports & Tableau, Data Warehousing & OLAP, Star & Snowflake schema, OLAP cubes & SSAS, Python (NumPy, Pandas, Matplotlib, Seaborn), SQL, SSIS, and SSRS packages, Cloud-based data solutions (Azure, SQL Azure).

ETL / BI Developer
Lockton

Jul 2022 – Jun 2023
Plano, TX

Responsibilities:

- Experience in performance tuning, indexing strategies, execution plans, and database normalization for improved efficiency.
- Worked with Azure Data-bricks for ETL solutions using SQL I Extracted, Transformed, loaded a humongous amount of data and also analyzed the data using data-bricks.
- Used Spotfire to transform, pivot data before building Data Visualizations and also Wrote back data from TIBCO Spotfire to implement security.
- Performed data analysis along with building reports & deploying into Power BI Service.
- Developed Tabular Reports, Sub Reports, Matrix Reports, Drill down Reports and Charts using SQL Server Reporting Services (SSRS).
- Created stored procedures for generating reports using SQL Server Reporting Services (SSRS), Crystal Reports. Good command in generating on demand and scheduled reports for business Analysis and Management decisions using SSRS 2016/2014/2012/2008.
- Expertise in resolving SQL Reporting services (SSRS) and T-SQL related issues and Proficiency in creating different types of reports such as Cross-Tab, Conditional, OLAP and Sub reports in Business Intelligence Development Studio.
- Highly Skilful in working with the Microsoft Power BI Services and Microsoft Azure.
- Very good T-SQL Programming skills. Experience in query optimization & performance tuning used SQL Profiler, Execution Plan, Performance Monitor and DBCC Commands.
- Good Experience with PowerShell scripts using Azure Cloud modules in order to automate the resource creation under resource group.
- Experience in building SSIS packages involving ETL process, extracting data from various flat files, Excel files, legacy systems and loading into SQL server.
- Knowledge of Azure SQL Database, Azure Data Factory, and cloud-based BI solutions for modern data infrastructure. Created Process Flows and Activity Diagrams using MS Visio.
- Proficient in Requirement Gathering, Data Modeling, and Business Intelligence Reporting to support decision-making processes.
- Expert in Creating and developing Power Bi Dashboards in to rich Look.
- Develop reports in BIDS, SSRS, SQL-Server2014, stored procedures and perform ETL from various OLTP and OLAP databases.
- Strong analytical and problem-solving skills with the ability to work independently or within a team environment. Experience on Microsoft BI products Power Bi and reporting services.

- Created KPI's, Partitions, Perspectives, and Calculated Measures, used DAX queries, Roles.
- Created reports using SSRS from OLTP and OLAP data sources and deployed them on report server.

Environment: SQL Server 2016, ETL, SSIS, T-SQL, Power BI Gateway, Power BI Service, DAX, Python, Excel, Microsoft Power BI, SQL, No-SQL, Server Data Tools (SSDT), Azure Data bricks, OLAP, SAP BW, Oracle, SQL Azure

SQL Developer
HealthEdge

Jun 2020 – Dec 2021
Remote

Responsibilities:

- Designed and deployed data warehouses on cloud platforms like AWS Redshift, Snowflake, and Azure Synapse Analytics. Migrated on-premise SQL databases to cloud-based solutions, reducing operational costs.
- Worked on Change Data Capture and incremental data loading to optimize ETL performance.
- Developed data validation frameworks using SQL scripts for data integrity and consistency across multiple databases.
- Conducted performance tuning by analyzing execution plans and optimizing SQL queries, resulting in faster query execution.
- Implemented data governance best practices, ensuring compliance with industry standards and regulations.
- Built serverless ETL pipelines leveraging AWS services like Lambda, Glue, and S3, improving data processing efficiency.
- Integrated SQL-based solutions with Big Data platforms such as Spark, Databricks, and Hadoop for large-scale data processing. Developed real-time data streaming solutions using Kafka and SQL-based analytics tools.
- Developed custom visual reports, dashboards and KPI scorecards using Power BI desktop.
- Connected to data sources (SQL Data warehouse) importing data, and transforming data for Business Intelligence. Good understanding of writing queries and pulling data from SQL server.
- Resolved data gateway issues by reconfiguring settings, creating new data sources, and managing gateway clusters for scheduled refreshes.
- Implemented row level security on data and have a good understanding of application security layer models in Power BI.
- Created queries using DAX functions in Power BI desktop Expertise in using advanced level calculations on the data set.
- Created basic SSIS packages using excel or text files as source and Insert/Update records into SQL Server table Dealt with SSRS Reports which we are getting from SSAS cubes.
- Wrote calculated columns, Measures query's using DAX in Power BI to show good data analysis.
- Develop an understanding of OLAP processing to modify and manage multidimensional data warehousing, optimize dimensions and incorporate aggregations into OLAP Cubes.
- Excellent understanding of Relational Database Systems, Normalization, logical and physical data modeling for OLTP and dimensional modeling for OLAP.
- Created & supported production SQL Server jobs. Designed SSIS Packages to extract, transfer, load (ETL) existing data into SQL Server from different environments for the SSAS cubes.
- Developed reports with Charts, Grouping, Sorting and Multiple Datasets using Reporting Services (SSRS). Analyzed & Modified existing SSRS reports & SSIS packages.
- Designed high level ETL architecture for overall data transfer from the OLTP to OLAP with the help of SSIS.
- Created Data Mapping Document and road map for transition from current state to future state.
- Involved in various brainstorming sessions to discuss the standardization of the incoming files with various formats coming from various channels on how to perform Content Management and Data Management.

Environment: SQL Server, Business Intelligence Studio, T SQL, Erwin, MDX, Oracle 10g, ERWIN, MS Excel, OLTP, OLAP, ETL, SSRS, DAX, SSIS, AWS Redshift, Snowflake, and Azure Synapse Analytics.
