EXPERIENCE

Correlation One

Data Analytics Training Program

January 2025 - July 2025

Amazon • Henderson

Warehouse Associate

February 2023 - Present

- Pioneered the adaptation of RC Sort processes for 20-pound items at Amazon, significantly increasing the warehouse's capacity to process approximately 3,000 larger items per machine per day and enhancing overall logistics efficiency.
- Innovated a barcode retrieval solution using the Amazon app for items lacking barcodes, successfully preventing approximately 200 products, mainly clothing without visible brands or sizes, from being discarded unnecessarily, thereby conserving inventory and reducing waste.
- Actively participated in safety improvement walks with management, identifying and communicating ergonomic risks associated with totes handling, which demonstrated a commitment to workplace safety and associate well-being, although no formal change was implemented.
- Enhanced team communication at Amazon by leveraging bilingual abilities to assist Spanish-speaking associates with HR matters, impacting over 10 team members by facilitating effective dialogue with management.
- Enriched logistical knowledge by completing a data analytics course through Career Choice, integrating analytical skills to optimize Warehouse Associate functions and support Amazon's operational excellence.
