

Varshitha Bommaraju Full Stack Developer

varshitha@techcareermail.com | (203) 823-5284 | USA | [Linked In](#)

Summary

Full Stack Developer with 3+ years of expertise in designing and building scalable, secure web applications using modern frontend and backend technologies. Proficient in React, Angular, Python, and RESTful API development, with a solid foundation in cloud platforms like AWS and Azure. Skilled in database management, CI/CD pipelines, and implementing security best practices to ensure compliance. Adept at collaborating within agile teams to deliver high-quality software solutions that enhance user experience and system performance.

Technical Skills

- Frontend:** React, Redux, Angular, NgRx, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, WebSocket, Jasmine, Karma, A/B Testing
- Backend:** Python (Flask, Django REST Framework), RESTful APIs, Microservices, Unit & Integration Testing (PyTest, Jasmine, Karma), ML Model Integration
- Databases:** AWS RDS (PostgreSQL), Azure PostgreSQL, SQL, Query Optimization, Indexing, Data Encryption
- Cloud & DevOps:** AWS ECS, AWS CodePipeline, AWS CodeBuild, AWS CloudWatch, Auto-scaling, Load Balancing, Azure DevOps, Containerization, CI/CD Pipeline Automation, Monitoring
- Security & Compliance:** OAuth 2.0, Role-Based Access Control, GDPR, CCPA, RBI Compliance, Security Audits, Vulnerability Assessments
- Development Practices & Tools:** Agile, Sprint Planning, Requirement Gathering, Git/GitHub, Cross-functional Team Collaboration

Professional Experience

Full Stack Developer, Plaid 10/2024 – Present | Remote, USA

- Worked on agile development of Personal Finance Management (PFM) SaaS, aggregating bank data via Plaid API for expense tracking, budgeting, and savings goals. Collaborated with product managers, designers, and stakeholders in requirement gathering and sprint planning.
- Built React frontend featuring transaction filtering, budget progress UI, goal-setting wizard, and responsive design. Implemented state management with Redux and conducted A/B testing, improving user engagement by 25% through iterative UX enhancements.
- Developed secure AWS RDS databases with encryption and optimized queries, improving response times by 30%. Ensured compliance with GDPR and CCPA, safeguarding sensitive financial data with robust privacy and security controls.
- Created backend microservices using Python Flask, including Transaction Aggregation Service and Budgeting Engine Service. Integrated an ML model, Transaction Categorization Classifier, for automatic transaction categorization, improving accuracy by 40%. Ensured scalable performance and 99.9% uptime.
- Implemented unit tests and CI/CD pipelines via AWS CodePipeline and CodeBuild, reducing release time by 40%. Partnered with DevOps to deploy on AWS ECS with auto-scaling, load balancing, and CloudWatch monitoring for many active users.

Full Stack Developer, Cognizant Technology Solutions 06/2021 – 07/2023 | Hyderabad, India

- Developed the Customer Onboarding and KYC Automation Platform by collaborating with cross-functional teams, participating in Agile ceremonies, and gathering requirements to build a digital onboarding system enabling seamless account creation and KYC completion.
- Directed frontend development in Angular, implementing multi-step forms, document uploads, status tracking, and notifications. Utilized reactive state management (NgRx), reusable components, and integrated WebSocket for real-time updates in close collaboration with UX and backend teams.
- Designed and optimized the Azure-hosted PostgreSQL database with indexing and query tuning to ensure secure, fast data retrieval and storage of onboarding information, documents, and audit logs, improving overall performance and scalability.
- Developed backend RESTful APIs using Python (Django REST Framework) for user registration, KYC workflows, and real-time WebSocket endpoints, coordinating with frontend and infrastructure teams for seamless data flow and scalability.
- Implemented security protocols including OAuth 2.0 authentication, role-based access control, data encryption, and regulatory compliance (GDPR, RBI). Collaborated with security teams to perform audits and vulnerability assessments ensuring data protection.
- Executed unit and integration testing with PyTest and Jasmine/Karma, and automated CI/CD pipelines using Azure DevOps. Partnered with DevOps teams to deploy containerized microservices on Azure, enabling automated scaling, monitoring, and high-availability production rollout.

Jr. Developer, Cognizant Technology Solutions 06/2020 – 05/2021 | Remote, India

- Collaborated with cross-functional teams in Agile sprints to implement frontend features using Angular, including forms, status tracking, reusable components, and real-time updates through WebSocket, enhancing user interaction and interface responsiveness.
- Assisted in backend development using Python (Django REST Framework) by creating RESTful APIs for user workflows and integrating WebSocket endpoints, working closely with senior developers to ensure efficient and scalable data handling.
- Supported unit and integration testing efforts using PyTest and Jasmine/Karma, contributed to automating CI/CD pipelines with Azure DevOps, and collaborated with DevOps and security teams to deploy and monitor applications on Azure cloud.

Education

Master's in Computer and Information Science 08/2023 – 05/2025
University of New Haven, New Haven, CT, USA
Bachelor of Engineering in Computer Science 08/2017 – 05/2021
Sathyabama Institute of Science and Technology, Chennai, India

CERTIFICATIONS

JavaScript – Simplilearn
SQL Certification – HackerRank
Cloud Platform Job Simulation
Learning Linux Command Line
Generative AI Certification
