

VARUN NARAYANAN

Data Analyst | Software Developer

Phone: +1 (951) 573-0737 | Email: varunnarayanan1999@gmail.com | LinkedIn: [LinkedIn](#)

Career Summary

- Over 3 years of experience as a Data Analyst and Backend Developer, including 2+ years as a Data Analyst focused on delivering insights and automating reporting workflows.
- Proficient in advanced Excel functions (VLOOKUP, Pivot Tables, Power Query) and data visualization tools such as Power BI and Tableau.
- Skilled in cloud technologies such as Snowflake, AWS RDS, and AWS S3, with experience in designing data pipelines, performing data modeling and managing cloud-based data sources.
- Worked in the U.S. healthcare industry at Optum (UnitedHealth Group), a Fortune 500 company, where I supported risk, claims, compliance, and operational reporting needs.
- Strong problem solver with 600+ LeetCode problems solved and top HackerRank badges; skilled in data structures and algorithms, effective communicator, critical & analytical thinker and detail-oriented team player known for translating business needs into high-quality, data-driven solutions.

Technical Proficiency

- **Programming:** Python, Java, C, C++, SQL
- **Databases:** SQL Server, Oracle, MySQL, PostgreSQL, Teradata, DB2, MongoDB (NoSQL), DynamoDB (NoSQL)
- **BI & Reporting:** Power BI, Tableau, SAP Business Objects, Alteryx
- **Technologies:** Flask, Django, Pandas, NumPy, Airflow, Git, Docker, Shell Scripting, Kubernetes, HTML, CSS
- **Cloud:** Snowflake, AWS (RDS, Redshift, S3), Azure SQL
- **Productivity Tools:** Microsoft Office Suite Excel (VLOOKUP, Pivot Tables, Power Query), Google Workspace, SharePoint
- **Others:** Problem Solving, Data Structures, Algorithms, Agile, Communication, Client Management

Work Experience

Information Systems Associate, Predica Inc

Feb 2025-Present

- Developed and deployed a full-stack resume modification web application using ReactJS (frontend) and Django (backend), integrated with a relational database and hosted on Microsoft Azure.
- Built and integrated RESTful APIs, including connecting to OpenAI's API for application's functionality.
- Implemented CI/CD pipelines to streamline deployment and updates, improving development cycle efficiency.
- Participated in usability testing and feedback sessions to enhance UI/UX and optimize user experience.
- Evaluated system architecture against best practices, conducted competitive benchmarking, and proposed improvements to enhance performance and scalability.

Associate Data Analyst, Optum (UnitedHealth Group)

July 2021 – July 2023

- Designed and delivered 80+ scheduled dashboards and ad hoc reports using Power BI, Tableau, and SAP Business Objects to support underwriting, compliance, and risk management teams, maintaining HIPAA compliance in handling sensitive healthcare data.
- Developed and optimized complex SQL queries and stored procedures in Teradata, applying star schema modeling, CTEs, window functions, and multi-table joins to efficiently extract, transform, and analyze healthcare datasets.
- Used Excel extensively for backend data validation and reconciliation:
 - Employed VLOOKUP and cross-sheet matching to verify data consistency across multiple databases.
 - Built Pivot Tables to summarize large datasets and detect anomalies prior to dashboard integration.
 - Utilized Power Query for cleaning, merging, and reshaping raw data to create structured inputs for BI tools.

- Automated cross-database schema validation using Python scripts and visualized inconsistencies through Plotly dashboards, improving audit-readiness and saving 7+ hours per month.
- Built and maintained custom KPIs, calculated columns (DAX), and advanced measures within Power BI to generate actionable insights for business users.
- Presented complex analytical findings to business and executive stakeholders through dashboards, ad hoc summaries, and executive presentations, facilitating data-driven decision-making.
- Designed and maintained batch ETL workflows using Airflow and shell scripting, streamlining reporting pipelines and improving data availability timelines.
- Conducted root cause analysis on data discrepancies, reducing production reporting errors by 40% and strengthening organizational data governance.
- Collaborated closely with business users, development teams, and QA teams during Agile ceremonies, ensuring evolving data requirements were captured and successfully implemented in reporting solutions.

Associate, Tekion

Jan 2021 – Jul 2021

- Contributed to backend development using Python and Java, assisting with feature implementation and bug fixes.
- Wrote unit tests and participated in code reviews to ensure code quality and maintainability.
- Collaborated with the dev team to troubleshoot issues during deployment and improve overall system stability.

Certifications

Red Hat Certified System Administrator (RHCSA):

- Managed Linux systems using Linux commands, shell scripting, software installation, hardware configuration, user/file/network management, security configuration, and troubleshooting.

Education

MS in Computer Science | CGPA: 3.66

Sep 2023 – Dec 2024

University of California - Riverside, California, USA

BTech in Computer Science and Engineering,

May 2017 – May 2021

SRM Institute of Science and Technology, Chennai, Tamil Nadu, India
